Longing For Running Water Ecofeminism And Liberation:

Longing for Running Water Ivone Gebara, 1999-09-01 Gebara's succinct yet moving statement of her principles of ecofeminism shows how intertwined are the tarnished environment around her and the poverty that afflicts her neighbors. From her experiences with the Brazilian poor women's movement she develops a gritty urban ecofeminism and indeed articulates a whole worldview. She shows how the connections between Western thought, patriarchal Christianity, and environmental destruction necessitate personal conversion to a new relationship with the earth and with the entire cosmos.

Liberating Spiritualities Christopher D. Tirres, 2024-12-03 A new perspective on spirituality and social change as seen through the work of six visionary thinkers. In *Liberating Spiritualities* Christopher D. Tirres offers an in-depth exploration of spirituality as a catalyst for social transformation, showcasing the profound insights of six distinguished twentieth-century liberation thinkers from across the Americas. This thought-provoking work examines the contributions of Marxist philosopher Jos Carlos Mariátegui, renowned educator and philosopher Paulo Freire, innovative constructive theologian Virgilio Elizondo, influential cultural and feminist theorist Gloria Anzaldúa, activist *mujerista* theologian and social ethicist Ada María Isasi-Delgado, and groundbreaking ecofeminist theologian Ivone Gebara. Tirres examines the distinct yet interconnected philosophies of these figures, showcasing their unified critique of colonial Christendom and their deep commitment to the marginalized. He adeptly articulates how their diverse religious and philosophical backgrounds come together in a shared vision of spirituality as a fundamental aspect of human life and intelligence. He further illuminates how these thinkers advocate for spirituality as a non-reductive, life-affirming practice transcending traditional boundaries and offering an integrated approach to faith, culture, and social justice. Their collective insights form a persuasive case for re-envisioning spirituality as a crucial element in the quest for a more just and compassionate world. *Liberating Spiritualities* is not only a tribute to these six influential figures but also a critical reflection on the relevance of their ideas in today's global context. Tirres's transdisciplinary study bridges liberationist and pragmatic insights, offering readers a fresh, highly original interpretation of socially engaged spirituality, making this book an essential resource for those seeking to understand the transformative power of spirituality in the pursuit of social justice and human dignity.

Decolonial Theology in the North Atlantic World Joseph Drexler-Dreis, 2019-09-24 This essay develops a response to the historical situation of the North Atlantic world in general and the United States in particular through theological reflection. It offers an overview of some decolonial perspectives with which theologians can engage and argues for a general perspective for a decolonial theology as a possible response to modern colonial structures and relations of power, particularly in the United States. Decolonial theory holds together a set of critical perspectives that seek the end of the modern colonial world system and not merely a democratization of its benefits. A decolonial theology, Joseph Drexler-Dreis argues, critiques how the confinement of knowledge to European traditions has closed possibilities for understanding historical encounters with divinity and thus possibilities of critical reflection. A decolonial theology reflects critically on a

historical situation in light of faith in a divine reality the understanding of which is liberated from the monopoly of modern colonial ways of knowing in order to catalyze social transformation **The Future of Sustainability** Ray C. Anderson, Ian Spellerberg, Daniel E. Vasey, 2012-10-31 The Future of Sustainability the tenth and final volume of the Berkshire Encyclopedia of Sustainability brings together essays from a group of renowned scholars and well known environmentalist thinkers Crucial topics are considered in terms of the future of humanity and its relationship with the natural world from the outlook for nuclear energy cities energy agriculture water food security mobility and migration the role of higher education and the concept of collective learning The volume concludes with a resource guide for teaching materials at several levels a directory of leading undergraduate and graduate level programs in sustainability and a combined index of the 10 volume set
