Congressional Budget Office, *Irrational Security* Daniel Wirls, 2010-05-01 2011 Winner of the Selection for Professional Reading List of the U S Marine Corps The end of the Cold War was supposed to bring a peace dividend and the opportunity to redirect military policy in the United States Instead according to Daniel Wirls American politics following the Cold War produced dysfunctional defense policies that were exacerbated by the war on terror Wirls s critical historical narrative of the politics of defense in the United States during this decade of neglect and the military buildup in Afghanistan and Iraq explains how and why the U S military has become bloated and aimless and what this means for long term security Examining the recent history of U S military spending and policy under presidents George H W Bush Bill Clinton and George W Bush Wirls finds that although spending decreased from the close of the first Bush presidency through the early years of Clinton s both administrations preferred to tinker at the edges of defense policy rather than redefine it Years of political infighting escalated the problem leading to a military policy stalemate as neither party managed to craft a coherent winning vision of national security Wirls argues that the United States has undermined its own long term security through profligate and often counterproductive defense policies while critical national problems have gone unmitigated and unsolved This unified history of the politics of U S military policy from the end of the Cold War through the beginning of the Obama presidency provides a clear picture of why the United States is militarily powerful but otherwise insecure **Bulletin of the Atomic Scientists** , 1998-05 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin s iconic Doomsday Clock stimulates solutions for a safer world **Bulletin of the Atomic Scientists** , 1998-05 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin s iconic Doomsday Clock stimulates solutions for a safer world *Defense 101* Michael E. Hearings on National Defense Authorization Act for Fiscal Year 1998--H.R. 1119 and Oversight of Previously Authorized Programs Before the Committee on National Security, House of Representatives, One Hundred Fifth Congress, First Session United States. Congress. House. Committee on National Security. Subcommittee on Military Research and Development,1997 **Technological Change and the Future of Warfare** Michael E. O'Hanlon,2011-04-01 In light of the spectacular performance of American high technology weapons in the 1991 Persian Gulf War as well as the phenomenal pace of innovation in the modern computer industry many defense analysts have posited that we are on the threshold of a revolution in military affairs RMA The issue has more than semantic importance Many RMA proponents have begun to argue for major changes in Pentagon budgetary priorities and even in American foreign policy more generally to free up resources to pursue a transformed U S military and to make sure that other countries do not take advantage of the purported RMA before we do This book takes a more measured perspective Beginning with a survey of various types of defense technologies it argues that while important developments are indeed under way most impressively in electronics and computer systems the overall thrust of contemporary military innovation is probably not of a revolutionary magnitude Some reorientation of U S defense dollars is appropriate largely to improve homeland defense and to take advantage of the promise of modern electronics systems and precision guided munitions But radical shifts in U S security policy and Pentagon budget priorities appear unwarranted especially if those shifts would come at the expense of American military engagement in overseas defense missions from Korea to Iraq to Bosnia **Circular** United States. Constructing Regional Security W. Durch, 2016-04-30 In this book William Durch examines conventional weapons proliferation since World War II the role of arms transfers in fueling regional conflict and prospects for curbing the global arms trade Noting that supply side arms control efforts which seek to constrain the companies and countries that produce and distribute major conventional weapons have a poor international track record Durch argues for a broader approach that tries to get at the demand side of the equation Addressing the political and regional dynamics that impel arms acquisitions he looks at how arms control might be combined with confidence and security building measures to contain demand and how value based arms trade control measures like codes of conduct could be implemented in stepwise fashion consistent with US national interests in regional stability *Defense Policy Choices for the Bush Administration, 2001-2005* Michael E.

O'Hanlon, 2010-12-01 This latest study in the Brookings series on U S defense strategy and the defense budget reviews current American military capabilities and offers suggestions for the new administration and Congress Michael O Hanlon makes sense of the hot political topic of military readiness questions the continued relevance of the current two war framework for structuring most conventional combat forces and challenges the wisdom of current plans for the procurement of advanced jet fighters helicopters and submarines The book also focuses on missile defense other means of homeland defense the so called revolution in military affairs and possible conflicts between Taiwan and China that could involve U S forces Throughout the author looks for ways to close the gap between the cost of projected U S defense forces and the budget actually available to the Pentagon The Political Economy of NATO Todd Sandler, Keith Hartley, 1999-04-13 Using

simple economic methods while accounting for political and institutional factors this book puts forward a political economy viewpoint of NATO s current status and its future prospects A host of NATO policy concerns are addressed including the optimal membership for the alliance its role in peacekeeping missions worldwide the appropriate methods for deterring terrorism and proper procurement practices for the next generation of weapons Additional topics concern defense burden sharing arms trade NATO s institutional structure and NATO s role vis a vis other international organizations Although the analysis is rigorous the book is intended for a wide audience drawn from political science and economics **The Science of**
