A thoughtful reconsideration of China s actual place in the new world order based on reality rather than fanciful speculation Kirkus Reviews Can anything prevent China surpassing the United States and becoming the world s top superpower While predictions that China s rise to global supremacy is a near certainty have resulted in this belief becoming almost conventional wisdom this book boldly counters such widely held assumptions Investment strategist Timothy Beardson brings to light the daunting array of challenges that today confront China as well as the inadequacy of the policy responses Threats to China come on many fronts Beardson shows and by their number and sheer weight these problems will thwart any ambition to become the world s Number One power Drawing on extensive research and experience living and working in Asia over the last 35 years the author spells out China s situation an inexorable demographic future of a shrinking labor force

relentless aging extreme gender disparity and even a falling population Also the nation faces social instability a devastated environment a predominantly low tech economy with inadequate innovation the absence of an effective welfare safety net an ossified governance structure and radical Islam lurking at the borders Beardson's nuanced firsthand look at China acknowledges its historic achievements while tempering predictions of its imminent hegemony with a no nonsense dose of reality
