Loot The Heritage Of Plunder:

Loot! Eric Russell Chamberlin, 2003 **Loot!: The Heritage of Plunder** E. R. Chamberlin, 2020-09-28 An illuminating history of artefacts and the questions of ownership that surround them This should be essential reading for readers of Robert M Edsel Noah Charney and Alice Proctor Well researched and well written Everyone should read this book and ponder the issues involved Glyn Daniel The Times Venice holds the Horses of Saint Mark Berlin keeps the Nefertiti Bust the Louvre in Paris exhibits Veronese's Marriage at Cana and London famously retains the Parthenon Marbles None of these pieces of art were produced in the cities in which they now stand and debates about their ownership reverberate to this day How did these objects come to stand in the cities that now hold them And should one nation retain the historical treasures of another E R Chamberlin's fascinating book explores how historical sites across the globe have been pillaged by tourists archaeologists and infamous conquerors such as Napoleon and Hitler the looters par excellence He examines how artefacts have become symbols of nationhood and how attitudes towards ownership of some of these objects have changed in the last few decades as developing nations attempt to regain control of their identities Fluent and attractive clear and amusing accounts of a number of celebrated cases History Today An admirably researched and entertaining accounting of collecting with a cast list that ranges from mean tricksters to the world's best educated pillagers Economist In Chamberlin's fascinating account Elgin emerges as a quasi tragical figure Times Literary Supplement [Loot Heritage](#) Raeann Costagliola, 2021-04-02 It's an interesting overview which reminds us that the theft or unethical acquisition of cultural property goes well beyond the infamous Elgin marbles the Berlin bust of Nefertiti or the plunder of war that enabled Napoleon to fill the Louvre with treasures The author's fascinating book explores how historical sites across the globe have been pillaged by tourists archaeologists and infamous conquerors such as Napoleon and Hitler the looters par excellence He examines how artefacts have become symbols of nationhood and how attitudes towards ownership of some of these objects have changed in the last few decades as developing nations attempt to regain control of their identities **A History of the Laws of War: Volume 2** Alexander Gillespie, 2011-10-07 This unique new work of reference traces the origins of the modern laws of warfare from the earliest times to the present day Relying on written records from as far back as 2400 BCE and using sources ranging from the Bible to Security Council Resolutions the author pieces together the history of a subject which is almost as old as civilisation itself The author shows that as long as humanity has been waging wars it has also been trying to find ways of legitimising different forms of combatants and ascribing rules to them protecting civilians who are either inadvertently or intentionally caught up between them and controlling the use of particular classes of weapons that may be used in times of conflict Thus it is that this work is divided into three substantial parts Volume 1 on the laws affecting combatants and captives Volume 2 on civilians and Volume 3 on the law of arms control This second book on civilians examines four different topics The first topic deals with the targetting of civilians in times of war This discussion is one which

has been largely governed by the developments of technologies which have allowed projectiles to be discharged over ever greater areas and attempts to prevent their indiscriminate utilisation have struggled to keep pace The second topic concerns the destruction of the natural environment with particular regard to the utilisation of starvation as a method of warfare and unlike the first topic this one has rarely changed over thousands of years although contemporary practices are beginning to represent a clear break from tradition The third topic is concerned with the long standing problems of civilians under the occupation of opposing military forces where the practices of genocide collective punishments and or reprisals and rape have occurred The final topic in this volume is about the theft or destruction of the property of the enemy in terms of either pillage or the intentional devastation of the cultural property of the opposition As a work of reference this set of three books is unrivalled and will be of immense benefit to scholars and practitioners researching and advising on the laws of warfare It also tells a story which throws fascinating new light on the history of international law and on the history of warfare itself

Captured Heritage Douglas Cole, 2011-11-01 The heyday of anthropological collecting on the Northwest Coast took place between 1875 and the Great Depression The scramble for skulls and skeletons poles canoes baskets feast bowls and masks went on until it seemed that almost everything not nailed down or hidden was gone The period of most intense collecting on the coast coincided with the growth of anthropological museums which reflected the realization that time was running out and that civilization was pushing the indigenous people to the wall destroying their material culture and even extinguishing the native stock itself Douglas Cole examines the process of collecting in the context of the development of museums and anthropology The main North American museums with Northwest Coast collections the Smithsonian Institution the American Museum of Natural History Chicago s Field Museum of Natural History the Royal British Columbia Museum and the Canadian Museum of Civilization in Ottawa were intense rivals in the race against time For the new edition of **Captured Heritage** Douglas Cole has written a preface in which he outlines developments since the book s first publication in 1985 Since that time for example the Kwagiulth Museum and Cultural Center on Quadra Island and the U Mista Museum and Cultural Center at Alert Bay have been successful in having some of their artifacts repatriated

Cultural Diplomacy and the Heritage of Empire Cynthia Scott, 2019-11-12 **Cultural Diplomacy and the Heritage of Empire** analyzes the history of the negotiations that led to the atypical return of colonial era cultural property from the Netherlands to Indonesia in the 1970s By doing so the book shows that competing visions of post colonial redress were contested throughout the era of post World War II decolonization Considering the danger this precedent posed to other countries the book looks beyond the Dutch Indonesian case to the Elgin Parthenon Marbles and Benin Bronzes controversies as well as recent developments relating to returns in France and the Netherlands Setting aside the universalism versus nationalism debate Scott asserts that the deeper meaning of post colonial cultural property disputes in European history has more to do with how officials of former colonial powers negotiated decolonization while also creating contemporary understandings of their nations pasts As a whole the

book expands the field of cultural restitution studies and offers a more nuanced understanding of the connections drawn between postcolonial national identity making and the extension of cultural diplomacy Cultural Diplomacy and the Heritage of Empire offers a new perspective on the international influence of the UNGA and UNESCO on the return debate As such the book will be of interest to scholars students and practitioners engaged in the study of cultural property diplomacy and law museum and heritage studies modern European history post colonial studies and historical anthropology *The Oxford Handbook of Crime and Public Policy* Michael Tonry, 2009-04-22 Much of the scholarly literature and principal books on criminal justice and crime control policy take the operations of the criminal justice system the causes of crime and delinquency theories about crime and justice and crime prevention as the central topics for study and policy analysis But law enforcement and public officials create policy responses to specific crimes not broad categories of offenses In order to develop the most effective policies one needs to understand why particular crimes occur and what approaches might best prevent them or minimize the harm they cause Taking this fresh perspective *The Oxford Handbook of Crime and Public Policy* offers a comprehensive examination of crimes as public policy subjects Michael Tonry a leading authority on criminology has brought together the most distinguished active scholars in the field to present a wide ranging overview and analysis of violent and sexual crimes property crimes transactional crimes transnational crimes and crimes against morality The crimes investigated range from often discussed offenses homicide auto theft sexual violence to those that only recently began to receive attention child abuse domestic violence environmental crimes it includes new crimes identity theft cybercrime as well as age old crimes drug abuse gambling prostitution Written in a straightforward and accessible manner each chapter explains why crimes happen how often and what we know about efforts to prevent or control them Aimed at a wide audience of scholars students and policy makers the Handbook is the definitive reference work on crimes and public policy responses to them *Heritage and Tourism in The Global Village* Priscilla Boniface, Peter Fowler, 2002-11-01 A nation's heritage is one of the most potent forces for generating tourism the Tower of London is the greatest visitor attraction in Britain But it is pushed into insignificance by comparison with the visitors travelling to Disneyland Epcot and the other entertainment complexes in the USA and it will be dwarfed by Euro Disneyland east of Paris So how should heritage attractions respond should they find their own specific audiences and resources This book written by a leading heritage specialist is essential reading for all those concerned both with heritage and leisure management International in scope it examines successful examples of heritage management for tourism and equally some failures It aims to lay some useful ground rules which should underpin all heritage developments designed to attract tourism on a major scale **Was Greek Thought Religious?** L. Ruprecht, 2002-06-28 The Greeks are on trial They have been for generations if not millennia from Rome in the First century to Romanticism in the Nineteenth We debate the place of the Greeks in the university curriculum in New World culture we even debate the place of the Greeks in the European Union This book notices the lingering and half

hidden presence of the Greeks in some strange places everywhere from the U S Supreme Court to the Modern Olympic Games and in doing so makes an important new contribution to a very old debate *The Art of Being Jewish in Modern Times* Barbara Kirshenblatt-Gimblett, Jonathan Karp, 2008 This richly illustrated volume illuminates how the arts have helped Jews confront the challenges of modernity There truly is an art to being Jewish in the modern world or alternatively an art to being modern in the Jewish world and this collection fully captures its range diversity and historical significance

International Law and the Protection of Cultural Heritage Craig Forrest, 2012-08-06 The world's cultural heritage is under threat from war illicit trafficking social and economic upheaval unregulated excavation and neglect Over a period of almost fifty years the United Nations Educational Scientific and Cultural Organisation has adopted five international conventions that attempt to protect this cultural heritage This book comprehensively and critically considers these five UNESCO cultural heritage conventions The book looks at the conventions in the context of recent events that have exposed the dangers faced by cultural heritage including the destruction of cultural heritage sites in Iraq and the looting of the Baghdad museum the destruction the Buddhas of Bamiyan in Afghanistan the salvage of artefacts from the RMS Titanic and the illicit excavation and trade in Chinese Peruvian and Italian archaeological objects As the only existing work to consider all five of the cultural heritage conventions adopted by UNESCO the book acts as an introduction to this growing area of international law However the book does not merely describe the conventional principles and rules but critically evaluates the extent to which these international law principles and rules provide an effective and coherent international law framework for the protection of cultural heritage It is suitable not only for those schooled in the law but also for those who work with cultural heritage in all its manifestations seeking a broad but critical consideration of this important area of international law *Chinese Politics* Daniel Lynch, Stanley Rosen, 2010-01-28 Written by a team of leading China scholars this text interrogates the dynamics of state power and legitimation in 21st Century China Despite the continuing economic successes and rising international prestige of China there has been increasing social protests over corruption land seizures environmental concerns and homeowner movements Such political contestation presents an opportunity to explore the changes occurring in China today what are the goals of political contestation how are Chinese Communist Party leaders legitimizing their rule who are the specific actors involved in contesting state legitimacy today and what are the implications of changing state society relations for the future viability of the People's Republic Key subjects covered include the legitimacy of the Communist Party internet censorship ethnic resistance rural and urban contention nationalism youth culture labour relations Chinese Politics is an essential read for all students and scholars of contemporary China as well as those interested in the dynamics of political and social change **A History of the Laws of War: Volume 3** Alexander Gillespie, 2011-10-07 This unique work of reference traces the origins of the modern laws of warfare from the earliest times to the present day Relying on written records from as far back as 2400 BCE and using sources ranging from the Bible to

Security Council Resolutions the author pieces together the history of a subject which is almost as old as civilisation itself The author shows that as long as humanity has been waging wars it has also been trying to find ways of legitimising different forms of combatants and ascribing rules to them protecting civilians who are either inadvertently or intentionally caught up between them and controlling the use of particular classes of weapons that may be used in times of conflict Thus it is that this work is divided into three substantial parts Volume 1 on the laws affecting combatants and captives Volume 2 on civilians and Volume 3 on the law of arms control This third volume deals with the question of the control of weaponry from the Bronze Age to the Nuclear Age In doing so it divides into two parts namely conventional weapons and Weapons of Mass Destruction The examination of the history of arms control of conventional weapons begins with the control of weaponry so that one side could achieve a military advantage over another This pattern which only began to change centuries after the advent of gunpowder was later supplemented by ideals to control types of conventional weapons because their impacts upon opposing combatants were inhumane By the late twentieth century the concerns over inhumane conventional weapons were being supplemented by concerns over indiscriminate conventional weapons The focus on indiscriminate weapons when applied on a mass scale is the core of the second part of the volume Weapons of Mass Destruction are primarily weapons of the latter half of the twentieth century Although both chemical and biological warfare have long historical lineages it was only after the Second World War that technological developments meant that these weapons could be applied to cause large scale damage to non combatants this is unlike nuclear weapons which are a truly modern invention Despite being the newest Weapon of Mass Destruction they are also the weapon of which most international attention has been applied although the frameworks by which they were contained in the last century appear inadequate to address the needs of current times As a work of reference this set of three books is unrivalled and will be of immense benefit to scholars and practitioners researching and advising on the laws of warfare It also tells a story which throws fascinating new light on the history of international law and on the history of warfare itself

Making Representations Moira G. Simpson, 2012-12-06 Drawing upon material from Britain Canada the United States Australia and New Zealand Making Representations explores the ways in which museums and anthropologists are responding to pressures in the field by developing new policies and practices and forging new relationships with communities Simpson examines the increasing number of museums and cultural centres being established by indigenous and immigrant communities as they take control of the interpretive process and challenge the traditional role of the museum Museum studies students and museum professionals will all find this a stimulating and valuable read
