Dynamics of Forest Ecosystems in Central Africa During the Holocene: Past - Present - Future J. Runge, 2014-04-21 Bringing together experts from several disciplines this volume collects the best papers presented at the international workshop on Environmental and Cultural Change in West and Central Africa held in Cameroon March 2006 Problems of Holocene and Late Pleistocene modifications of the rain forest savanna fringe and their possible influence on cultural innovations are discussed This is an important resource for those concerned with tropical forests and related development problems of third world countries It is an excellent source of information for new original manuscripts on the topic of Late Pleistocene and Holocene landscape evolution in the lower latitudes of Africa **Forest Biodiversity in North, Central and South America, and the Caribbean** Francisco Dallmeier, James A. Comiskey, 1998 Biological diversity research environmental monitoring forest ecology Hurricane Hugo wildlife Canada French Guiana Virgin Islands Puerto Rico Brazil Amazonia Bolivia Peru Ecuador Venezuela flowers plant life Neotropical Savannas and Seasonally Dry Forests R. Toby Pennington, James A. Ratter, 2006-05-25 More often than not when people think of a neotropical forest what comes to mind is a rain forest rather than a dry forest Just as typically when they imagine a savanna they visualize the African plains rather than those dry woodlands and grasslands found in the Neotropics These same preconceptions can be found among scientists as these ne The Dynamics of Deforestation and Economic Growth in the Brazilian Amazon Lykke E. Andersen, 2002-12-12 A multi disciplinary team of authors analyze the economics of Brazilian deforestation using a large data set of ecological and economic variables They survey the most up to date work in this field and present their own dynamic and spatial econometric analysis based on municipality level panel data spanning the entire Brazilian Amazon from 1970 to 1996 By observing the dynamics of land use change over such a long period the team is able to provide quantitative estimates of the long run economic costs and benefits of both land clearing and government policies such as road building The authors find that some government policies such as road paving in already highly settled areas are beneficial both for economic development and for the preservation of forest while other policies such as the construction of unpaved roads through virgin areas stimulate wasteful land uses to the detriment of both economic growth and forest cover Vegetation Dynamics and Regeneration in Seasonal Tropical Climates Håkan Hytteborn, 1992 **The U.S.-Mexican Border Environment** Erik Lee, Paul Ganster, 2012 Plant Migration Jonathan D. Sauer, 1988 Using cases of plant migration documented by both historical and fossil evidence Jonathan D Sauer provides a landmark assessment of what is presently known and not merely assumed about the process **Reframing Deforestation** James Fairhead, Melissa Leach, 2003-09-02 This study reviews how West African deforestation is represented and the evidence which informs deforestation orthodoxy On a country by country basis covering Sierra Leone Liberia Cote D Ivoire Ghana Togo and Benin and using historical and social anthropological evidence the authors evaluate this orthodox critically Reframing Deforestation suggests that the scale of deforestation wrought by West

African farmers during the twentieth century has been vastly exaggerated The authors argue that global analyses have unfairly stigmatised West Africa and obscured its more sustainable even landscape enriching practices Stressing that dominant policy approaches in forestry and conservation require major rethinking worldwide Reframing Deforestation illustrates that more realistic assessments of forest cover change and more respectful attention to local knowledge and practices are necessary bases for effective and appropriate environmental policies *Subject Guide to Books in Print* ,1993
