Party Of Humanity Essays In The French Enlightenment:

The Party of Humanity Peter Gay, 2013-05-08 THE ENLIGHTENMENT has long been the victim of uninformed or hostile criticisms Even so respected a source as the Shorter Oxford English Dictionary defines the Enlightenment as shallow and pretentious intellectualism unreasonable contempt for authority and tradition thus collecting in one sentence most of our current prejudices In this provocative book at once a scholarly study and a vigorous polemic Peter Gay sets out to shatter old myths to sort out illusion from reality and to restore the men of the Enlightenment Voltaire Rousseau Diderot to the esteem they deserve The nine related essays in *The Party of Humanity* fall into three divisions three are on Voltaire presenting the great philosophe as a tough minded realistic man of letters who tried to reshape his world rather than as merely brittle and shallow wit Then three essays characterize the French Enlightenment as a whole and seek for the unity underlying the diversity of tempers and attitudes among its leaders The last three which include Mr Gay's well known critique of Carl Becker's *The Heavenly City of the Eighteenth Century Philosophers* are polemics against widely accepted views of the Enlightenment The longest chapter here is a detailed examination of Rousseau the philosopher and of his reputation among his interpreters What all nine essays have in common apart from their portrayal of the philosophes as serious and engage partisans of humanity is that they are all essays in the social history of ideas they all treat ideas as inseparable from the specific social and cultural setting from which they emerge and which they affect *The Party of Humanity* Peter Gay, 1964

17th and 18th Centuries Frank N. Magill, 2013-09-13 Each volume of the Dictionary of World Biography contains 250 entries on the lives of the individuals who shaped their times and left their mark on world history This is not a who's who Instead each entry provides an in depth essay on the life and career of the individual concerned Essays commence with a quick reference section that provides basic facts on the individual's life and achievements The extended biography places the life and works of the individual within an historical context and the summary at the end of each essay provides a synopsis of the individual's place in history All entries conclude with a fully annotated bibliography Heaven on Earth Richard Landes, 2011-08-04 A comprehensive examination of millennialism the belief that the grandest events of history and the cosmos will occur soon and suddenly whether as a religious *d nouement* with the coming of the Last Days or as a final social solution to resolve the human predicament forever Through analysis of diverse cases throughout history Richard Landes demonstrates that millennialism has been deliberately downplayed and even ignored by historians and shows that millenarian beliefs have played a role in many supposedly secular events movements and periods including modernity

Inventing Human Science Christopher Fox, Roy Porter, Robert Wokler, 2023-11-15 The human sciences including psychology anthropology and social theory are widely held to have been born during the eighteenth century This first full length English language study of the Enlightenment sciences of humans explores the sources context and effects of this major intellectual development The book argues that the most fundamental inspiration for the Enlightenment was the scientific revolution of the seventeenth century Natural philosophers from Copernicus to Newton had created a magisterial science of nature based on the realization that the physical world operated according to orderly discoverable laws Eighteenth century thinkers sought to cap this achievement with a science of human nature Belief in the existence of laws governing human will and emotion social change and politics economics and medicine suffused the writings of such disparate figures as Hume Kant and Adam Smith and formed the basis of the new sciences A work of remarkable cross disciplinary scholarship this volume illuminates the origins of the human sciences and offers a new view of the Enlightenment that highlights the period's subtle social theory awareness of ambiguity and sympathy for historical and cultural difference The human sciences including psychology anthropology and social theory are widely held to have been born during the eighteenth century This first full length English language study of the Enlightenment sciences of humans explores the sources context **Is there a Judeo-Christian Tradition?** Emmanuel Nathan, Anya Topolski, 2016-03-21 The term Judeo Christian in reference to a tradition heritage ethic civilization faith etc has been used in a wide variety of contexts with widely diverging meanings Contrary to popular belief the term was not coined in the United States in the middle of the 20th century but in 1831 in Germany by Ferdinand Christian Baur By acknowledging and returning to this European perspective and context the volume engages the historical theological philosophical and political dimensions of the term's development Scholars of European intellectual history will find this volume timely and relevant *The Idea of Progress in Eighteenth-century Britain* David

Spadafora, James Spada, 1990-01-01 The idea of progress stood at the very center of the intellectual world of eighteenth century Britain closely linked to every major facet of the British Enlightenment as well as to the economic revolutions of the period Drawing on hundreds of eighteenth century books and pamphlets David Spadafora here provides the most extensive discussion ever written of this prevailing sense of historical optimism **Habermas's Public Sphere** Michael Hofmann, 2017-05-24 Habermas's Public Sphere A Critique analyzes the evolution of Juergen Habermas's social and political theory from the 1950s to the present by focusing on the explicit and on the tacit changes in his thinking about The Structural Transformation of the Public Sphere his global academic bestseller which has been translated into 30 languages Integrating public sphere discourse and reason the three categories at the center of his lifelong work as a scholar and as a public intellectual Habermas's classic public sphere concept has deeply influenced an unusually high number of disciplines in the social sciences and in the humanities In the process its complex methodology whose sources are not always identified can be perplexing and therefore lead to misunderstandings While Habermas's Further Reflections on the Public Sphere 1992 contain several far reaching clarifications they still do not identify a number of the most important sources for his methodology above all Herbert Marcuse and Ernst Bloch Hence a key purpose of this study is to thoroughly analyze the Marxist critique of ideology that Habermas uses in dialectical fashion for his theory reconstruction of Immanuel Kant's liberal ideal of a rational critical public as the organizational principle of the constitutional state and as the method of Enlightenment Such dialectical thinking allows him to appropriate the structure of Reinhart Koselleck's Critique and Crisis and of Carl Schmitt's writings on the modern state while simultaneously upending their conservative critique of Liberalism and of the Enlightenment However this strategy restricts the application of his concept to his stylizations of the French Revolution and of his British model case This critique reinvigorates Habermas's seminal distinction between the purely political polis of antiquity which excludes the private economy from the res publica and the modern public sphere with its rational critical discourse about commodity exchange and social labor in the political economy At the same time it identifies the crises of seventeenth century England and the Dutch Republic as the origins of the new channels of public communication used to constantly evaluate the role of state power as political facilitator and regulator of an increasingly complex dynamic and crisis prone market economy **The Palgrave Handbook of Affect Studies and Textual Criticism** Donald R. Wehrs, Thomas Blake, 2017-12-01 This volume provides a comprehensive account of how scholarship on affect and scholarship on texts have come to inform one another over the past few decades The result has been that explorations of how texts address elicited shape and dramatize affect have become central to contemporary work in literary film and art criticism as well as in critical theory rhetoric performance studies and aesthetics Guiding readers to the variety of topics themes interdisciplinary dialogues and sub disciplinary specialties that the study of interplay between affect and texts has either inaugurated or revitalized the handbook showcases and engages the diversity of scholarly topics approaches and projects

Heinrich Von Kleist and Jean-Jacques Rousseau: Violence, Identity, Nation (Studies in German Literature, Linguistics, and Culture) Steven Howe, 2012 By reconsidering Kleist s reception of Rousseau and placing it in historical context this book sheds new light on a range of political and ethical issues at play in Kleist s work Heinrich von Kleist is renowned as an author who posed a radical challenge to the orthodoxies of his age Today his works are frequently seen to relentlessly deconstruct the paradigms of Idealism and to reflect a Romantic even postmodern perspective on the ambiguities of the world Such a view fails however to do full justice to the more complex manner in which Kleist articulates the tensions between the securities of Enlightenment thought and the anxieties of the revolutionary age Steven Howe offers a new angle on Kleist s dialogue with the Enlightenment by reconsidering his investment in the philosophy of Jean Jacques Rousseau Where previous critics have trivialized this as intense but fleeting and born of personal identification Howe here establishes Rousseau s importance as a lasting source of inspiration for the violent constellations of Kleist s fiction Taking account of both Rousseau s critique of modernity and his later propositions for
