Russian Architecture Trends In Nationalism And Modernism:

Russian Architecture Arthur Voyce, 1969 *Russian Architecture, Trends in Nationalism and Modernism*, by Arthur Voyce, ... Arthur Voyce, **Russian architecture** A. Voyce, 1948 **Nationalism in a Transnational Age** Frank Jacob, Carsten Schapkow, 2021-11-22 Nationalism was declared to be dead too early A postnational age was announced and liberalism claimed to have been victorious by the end of the Cold War At the same time postnational order was proclaimed in which transnational alliances like the European Union were supposed to become more important in international relations But we witnessed the rise a strong nationalism during the early 21st century instead and right wing parties are able to gain more and more votes in elections that are often characterized by nationalist agendas This volume shows how nationalist dreams and fears alike determine politics in an age that was supposed to witness a rather peaceful coexistence by those who consider transnational ideas more valuable than national demands It will deal with different case studies to show why and how nationalism made its way back to the common consciousness and which elements stimulated the re establishment of the aggressive nation state The volume will therefore look at the continuities of empire actual and imagined the role of foreign and otherness for nationalist narratives and try to explain how globalization stimulated the rise of 21st century nationalisms as well

The Theory of Architecture Paul-Alan Johnson, 1994-04-18 *The Theory of Architecture Concepts Themes Practices* Paul Alan Johnson Although it has long been thought that theory directs architectural practice no one has explained precisely how the connection between theory and practice is supposed to work This guide asserts that architectural theory does not direct practice but is itself a form of reflective practice Paul Alan Johnson cuts through the jargon and mystery of architectural theory to clarify how it relates to actual applications in the field He also reveals the connections between new and old ideas to enhance the reader s powers of critical evaluation Nearly 100 major concepts themes and practices of architecture as well as the rhetoric of architects and designers are presented in an easily accessible format Throughout Johnson attempts to reduce each architectural notion into its essential concept By doing so he makes theory accessible for everyday professional discussion Topics are arranged under ten headings identification definition power attitudes ethics order authority governance relationship and expression Areas covered under these headings include Utopic thought in theories of architecture Advocacy and citizen participation in architecture The basis of architectural quality and excellence The roles of the architect as artist poet scientist and technologist Ethical obligations of architecture Rationales for models and methods of design How authority is determined in architecture How architects structure their concepts Conventions of communication within the architectural profession Each section begins by showing the etymology of key terms of the topic discussed along with a summary history of the topic s use in architecture Discussions probe the conceptual and philosophical difficulties of different theories as well as their potential and limitations in past and present usage Among the provocative issues discussed in terms of their relationship to architecture are chaos theory feminism service to the community and the

use of metaphor Johnson points out with stunning clarity the intentions as well as the contradictions and inconsistencies of all notions and concepts All architects and designers as well as students and teachers in these disciplines will gain many insights about architectural thought in this groundbreaking text Chang'an Avenue and the Modernization of Chinese Architecture Shuishan Yu,2013-05-15 In this interdisciplinary narrative the never ending completion of China s most important street offers a broad view of the relationship between art and ideology in modern China Chang an Avenue named after China s ancient capital whose name means Eternal Peace is supremely symbolic Running east west through the centuries old heart of Beijing it intersects the powerful north south axis that links the traditional centers of political and spiritual legitimacy the imperial Forbidden City and the Temple of Heaven Among its best known features are Tiananmen Square and the Great Hall of the People as well as numerous other monuments and prominent political cultural financial and travel related institutions Drawing on Chang an Avenue s historic ties and modern transformations this study explores the deep structure of the Chinese modernization project providing both a big picture of Beijing s urban texture alteration and details in the design process of individual buildings Political winds shift architectural styles change and technological innovations influence waves of demolition and reconstruction in this analysis of Chang an Avenue s metamorphosis During collective design processes architects urban planners and politicians argue about form function and theory and about Chinese vs Western and traditional vs modern style Every decision is fraught with political significance from the 1950s debate over whether Tiananmen Square should be open or partially closed to the 1970s discussion of the proper location scale and design of the Mao Memorial Mausoleum to the more recent controversy over whether the egg shaped National Theater designed by the French architect Paul Andreu is an affront to Chinese national pride Art History Publication Initiative For more information visit <http://arthistorypi.org/books/chang-an>

Blueprints and Blood Hugh D. Hudson, Jr.,2015-03-08 Analyzing totalitarianism from below in a crucial area of Soviet culture Hugh Hudson shows how Stalinist forces within the architectural community destroyed an avant garde movement of urban planners and architects who attempted to create a more humane built environment for the Soviet people Through a study of the ideas and constructions of these visionary reformers Hudson explores their efforts to build new forms of housing and settlements designed to free the residents especially women from drudgery allowing them to participate in creative work and to enjoy the songs of larks Resolving to obliterate this movement of human liberation Stalinists in the field of architecture unleashed a little terror from below prior to Stalin s Great Terror Using formerly secret Party archives made available by perestroika Hudson finds in the rediscovered theoretical work of the avant garde architects a new understanding of their aims He shows for instance how they saw the necessity of bringing elite desires for a transformed world into harmony with the people s wish to preserve national culture Such goals brought their often divided movement into conflict with the Stalinists especially on the subject of collectivization Hudson s provocative work offers

evidence that in spite of the ultimate success of the Stalinists the Bolshevik Revolution was not monolithic at one time it offered real architectural and human alternatives to the Terror Originally published in 1993 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905
