transformation has undermined trade between Eastern Europe and Russia for several years there are medium prospects for growing trade in the whole of Europe Russia's case however is different from the EU accession countries as a major driving force of economic dynamics is the oil and gas sector which has considerable backward and forward linkages At the same time this sector apparently is politically quite sensitive The Transatlantic Transformation and Economic Development Research Group has organized several workshops within a major international research project The project is devoted to analyzing the internationalization of the Russian economy and the associated changes in major policy fields This book contains the revised analytical papers from the St Petersburg conference in 2003 when the city celebrated its 300 year anniversary We are very grateful to the Leontief Center for excellent organization of the conference The paper by Paul J J
