Terrill, 2010-04-07 This comparative text provides an understanding of major foreign criminal justice systems by discussing and comparing the systems of six of the world's more industrialized countries England France Sweden Russia China and Japan each representative of a different type of legal system as well as a chapter on Islamic law that uses Saudi Arabia Iran and Turkey as main examples Political historical organizational procedural and critical issues confronting the justice systems are explained and analyzed Each chapter contains material on government police judiciary law corrections juvenile justice and other critical issues Each chapter introduces a country and then covers concepts to know government police judiciary law corrections and juvenile justice Building The Russian State Valerie Sperling, 2018-02-13 Has the Russian state managed to lay the institutional groundwork for long term stability and democratic governance In *Building the Russian State* Valerie Sperling assembles a group of cutting edge scholars to critically assess the crises in Russia's transitional institutions Part I of the book shows that Russia's political elites are less focused on serving public interests than on enriching themselves and examines how these elites are ruling Russia Part II focuses on the growth of organized crime the decay of the military the precariousness of the Russian Federation the weakness of the labor movement the corruption of the courts the challenges facing international reformers and the authoritarianism of the super presidential political system By focusing on the challenges failures and occasional successes of the Russian political system this volume offers upper level undergraduates and other scholars valuable insight into post Soviet politics state building and transitions to democracy **Changing Legal and Civic Culture in an Illiberal Democracy** István H. Szilágyi, László Kelemen, Sam Gilchrist Hall, 2021-05-25 *Changing Legal and Civic Culture in an Illiberal Democracy* is a unique empirical study on recent developments in legal and civic consciousness in Hungary Drawing its methodology from social psychology this book illuminates a shift in legal consciousness during the time in which Orbán's government has cemented Hungary's reputation as

an illiberal democracy The book foregrounds the voices of the Hungarian population in how they view the shift towards increasingly right wing politics and an erosion of the rule of law It opens with an extensive theoretical introduction of the historical development and psychological dimensions of legal consciousness in Hungary and relates the Hungarian research to international developments It then presents its empirical results and offers a jargon free account of ordinary people s changing perceptions of their relationship to Hungary s civic and legal cultures before finally examining the correlations between surveys Methodologically the book establishes that theories of legal consciousness and social change are bolstered by empirical data Offering a new way of approaching shifts in legal consciousness and the rule of law in Balkan and Eastern European countries this text will be of great interest to researchers and students of social psychology law international relations and Central European studies Realizing the Potential of Immigrant Youth Ann S. Masten,Karmela

Liebkind,Donald J. Hernandez,2012-05-21 The well being and productivity of immigrant youth has become one of the most important global issues of our times as a result of mass migration and resettlement In this unique volume leading scholars from multiple nations and disciplines provide a state of the art overview of contemporary research on immigrant youth and delineate the most promising future directions for research on their success suggesting implications for policy and interventions that will benefit host societies as well as immigrant youth The contributors to Realizing the Potential of Immigrant Youth include many of the leading international experts on migration acculturation intergroup issues and immigrant youth development with contributions from the fields of child development demography economics education immigrant mental health social psychology and sociology *Youth in a Changing Karelia* Vesa Puuronen,Pentti Sinisalo,Larissa Shvets,2018-04-27 This title was first published in 2000 The book is aimed at uncovering certain features of the future of Karelia which is partly situated in Russia and Finland The authors believe that this can be done by studying in depth the opinions values norms beliefs fears and hopes of young people living in two neighbouring but profoundly different societies Russia and Finland Young people are constructing these societies in the 20th century The book is based on a comparative research project financed by the Academy of Finland which was carried out during 1995 1997 by an international inter disciplinary research group The novelty of the book is based on the use of different research methods and theoretical starting points One of the crucial questions raised by the book concerns the applicability of Western theories in research into Russian society and people The analysis shows that many of the concepts applied frequently in Western social sciences do not apply in research relating to Russian specific culture The book proposes that more attention should be paid to the challenges of comparative research **The Institutions of Education** William K. Cummings,2003-01-01 At many times in educational history including the past decade there are reports of crisis and cries for reform The successes of foreign competitors are pointed to new moneys are sought and laws passed Occasionally these reform efforts make a difference Just as often they end up as mere rhetoric and the educational indicators continue to slide Education is a dynamic

sector with its ups and downs To understand these ups and downs and to gain a clearer grasp of the essentials of reform we need to look deeply into the origins and development of successful and failed reforms This book seeks to answer that need To do so it stresses two important themes First the essence of educational practice lies in the institutionalised ideals and norms of an educational system not in how much is spent on education or how many people are involved in education Second while many contemporary observers of education tend to think that sound educational practice is pretty much the same around the world this book argues that these are at least six distinctive educational Institutions currently in place in the modern world each with its unique strengths and weaknesses Each also has its own cycle of reform and renewal So the landscape of educational reform is much broader than most observers acknowledge The book is unique in highlighting the principle characteristics of Japanese education alongside those of Soviet Russia and the core educational systems of Western Europe and North America While the account focuses on national differences the analysis actually begins from the ground up looking at particular schools that emerged early in the six modernising experiences These early schools are described here as representative schools for the practices they initiated have had a profound influence on the direction of subsequent reforms in their respective national settings *The Challenges of Diaspora Migration* Rainer K. Silbereisen, Peter F.

Titzmann, 2016-04-01 Diaspora or ethnic return migrants have often been privileged in terms of citizenship and material support when they seek to return to their ancestral land yet for many after long periods of absence sometimes extending to generations acculturation to their new environment is as complex as that experienced by other immigrant groups Indeed the mismatch between the idealized hopes of the returning migrants and the high expectations for social integration by the new host country results in particular difficulties of adaptation for this group of immigrants often with high societal costs This interdisciplinary comparative volume examines migration from German and Jewish Diasporas to Germany and Israel examining the roles of origin ethnicity and destination in the acculturation and adaptation of immigrants The book presents results from various projects within a large research consortium that compared the adaptation of Diaspora immigrants with that of other immigrant groups and natives in Israel and Germany With close attention to specific issues relating to Diaspora immigration including language acquisition acculturation strategies violence and breaches with the past educational and occupational opportunities life course transitions and preparation for moving between countries *The Challenges of Diaspora Migration* will appeal to scholars across the social sciences with interests in migration and ethnicity Diaspora and return migration

Grant, 2022-01-01 This book is the first interdisciplinary study of the rule of law in an environment of complementary culture It argues that the rule of law should not be defined solely through the development of institutions but also through the mobilization of existing culture towards support for law and its enforcement Recognizing that the rule of law is most often misunderstood by many the book describes the benefits of the rule of law and exposes its weaknesses and limitations It summarizes the history and practice through case studies where

Why Children Follow Rules Tom R. Tyler, Rick Trinkner, 2017-12-15 Legal socialization is the process by which children and adolescents acquire their law related values attitudes and reasoning capacities Such values and attitudes in particular legitimacy underlie the ability and willingness to consent to laws and defer to legal authorities that make legitimacy based legal systems possible By age eighteen a person's orientation toward law is largely established yet legal scholarship has largely ignored this process in favor of studying adults and their relationship to the law Why Children Follow Rules focuses upon legal socialization outlining what is known about the process across three related but distinct contexts the family the school and the juvenile justice system Throughout Tom Tyler and Rick Trinkner emphasize the degree to which individuals develop their orientations toward law and legal authority upon values connected to responsibility and obligation as opposed to fear of punishment They argue that authorities can act in ways that internalize legal values and promote supportive attitudes In particular consensual legal authority is linked to three issues how authorities make decisions how they treat people and whether they recognize the boundaries of their authority When individuals experience authority that is fair respectful and aware of the limits of power they are more likely to consent and follow directives Despite clear evidence showing the benefits of consensual authority strong pressures and popular support for the exercise of authority based on dominance and force persist in America's families schools and within the juvenile justice system As the currently low levels of public trust and confidence in the police the courts and the law undermine the effectiveness of our legal system Tom Tyler and Rick Trinkner point to alternative way to foster the popular legitimacy of the law in an era of mistrust

Juvenile Delinquency: Arnold Binder, Gilbert Geis, Dickson D Bruce Jr., 2001-01-01 Juvenile Delinquency

Criminal Justice 2000: Measurement and analysis of crime and justice, 2000 Measurement and Analysis of Crime and Justice, Vol. 4, Criminal Justice 2000, (July 2000), 2000 *Criminal Justice 2000*, 2000 **Handbook of Youth and Justice** Susan O. White, 2013-11-11 When approached by Plenum to put together a volume of social science research on the topic of youth and justice I found the interdisciplinary challenge of such a project intriguing Having spent 2 years as Director of the Law and

Social Science Program at the National Science Foundation I was well aware of the rich diversity of research that could fit within that topic I also knew that excellent research on youth and justice was coming from different communities of researchers who often were isolated from each other in their respective disciplines as psychologists sociologists criminologists or policy analysts I saw this project as an opportunity to break down some of this isolation by introducing these researchers and their work to each other and to the broader community of social scientists interested in law and justice There was another gap or set of gaps to be bridged as well The juvenile justice system and the criminal justice system differ in significant ways and the civil justice system which is a major venue for issues of youth and justice is yet another separate world Few researchers are likely to know the whole picture For example a focus on juvenile justice often ignores the extent to which civil justice proceedings shape the lives of young people through divorce custody adoption family preservation policies and other actions and vice versa
