Russian Verb Prepositional Non Preposi:

Notes on the Russian Verbs S. G. Stafford, 1915 Prepositions, Case and Verbal Prefixes Petr Biskup, 2019-04-17 This monograph is concerned with prepositional elements in Slavic languages prepositions verbal prefixes and functional elements of prepositional nature It argues that verbal prefixes are incorporated prepositions projecting their argument structure in the complement of the verbal root and that their meaning is based on the two argument meaning of prepositions enriched with the CAUSE operator The book investigates idiomaticity in the realm of prefixed verbs and proposes a novel analysis of non compositional prefixed verbs based on the operation of predicate transfer It also offers a uniform analysis of cases Prepositional as well as non prepositional cases are treated as a reflection of the agreement operation whereat the type of prepositional case is determined by semantic properties of the decomposed preposition Furthermore it examines prepositions from a diachronic perspective and argues that they can be grammaticalised as future markers under certain circumstances The N-Factor and Russian Prepositions Steven P. Hill, 2012-02-13 No detailed description available for The N Factor and Russian Prepositions **A Cognitive Perspective on Spatial Prepositions** Maria Brenda, Jolanta Mazurkiewicz-Sokołowska, 2022-10-15 A Cognitive Perspective on Spatial Prepositions Intertwining networks is devoted to the issue of the relation between language and thought approached from the perspective of spatial relations encoded by four equivalent spatial prepositions English to German zu Polish do and Russian Regarding these prepositions as path prepositions the authors show that the prepositional semantic structures are conceptually grounded in the PATH and the MOTION EVENT frames and explain that prepositional senses emerge as a result of the PATH image schema transformations and metaphorical mappings related to the EVENT STRUCTURE metaphor Based on their findings the authors show how senso motoric functioning life experience individual knowledge imagery and different ways in which people conceptualize the world influence the relation between language and conceptualization Copular Sentences in Russian Asya Pereltsvaig, 2007-05-11 This book provides a detailed study and a novel Minimalist account of copular sentences in Russian focusing on case marking alternations nominative vs instrumental and drawing a distinction between two types of copular sentences On the assumption that Merge is defined in the simplest way possible it is argued that not all syntactic structures are a nti symmetrical One of the copular sentence types is analyzed as a poster child for symmetrical structures while the other type is treated as asymmetrical The originality of this study lies in treating the copula in the two types of copular sentences neither as completely identical nor as two distinct lexical items instead the two types of copula are derived through the process of semantic bleaching Furthermore it is argued that the two types of the copula need to combine with post copular phrases of different categories It is concluded that Russian draws a distinction between saturated DPs and unsaturated NPs in spite of its renowned lack of overt articles **Using Russian** Derek Offord, 2005-07-14 Using Russian is a guide to Russian usage for those who have already acquired the basics of the language and wish to extend their knowledge

Unlike conventional grammars it gives special attention to those areas of vocabulary and grammar which cause most difficulty to English speakers and focuses on questions of style and register which are all too often ignored. Clear, readable and easy to consult, it will prove invaluable to students seeking to improve their fluency and confidence in Russian. This second edition has been substantially revised and expanded to incorporate fresh material and up-to-date information. Many of the original chapters have been rewritten and one brand new chapter has been added, providing a clear picture of Russian usage in the 21st century.

Case and Gender Willem Andries Helden, 1993. The cybernetic dream which pervades Soviet bureaucracy after Stalin produced a relatively liberal and generous science policy. In linguistics the new spirit gave rise to a variety of trends professing to practise structural, mathematical or applied linguistics and promising practical applications in natural language processing. The trends originating in the sixties comprise the so-called Set theoretical School. In 1957 the mathematician Kolmogorov confronted the participants of a seminar on mathematical linguistics with a few pilot questions such as: what exactly do we mean when we say that two words are in the same case? The rigorous answers which the Set theoretical School worked out for Kolmogorov's questions turned out to have far-reaching implications for linguistic theory. Case and Gender examines both the contextual and the internal development of the Set theoretical School. The rise and decline of the School can be ascribed to Soviet humanities policy while the specifics of its linguistic development can be attributed to the non-linguistic backgrounds and applied goals of its first exponents. The two volumes contain a systematic account of the networks of definitions, models proposed by the School and provide a metamodel which facilitates providing a consistent formalization of the models and uncovering their implicit assumptions on the properties of language. The metamodel also enables an orderly comparison of the models with one another and with terminological systems developed elsewhere. Moreover, the models are evaluated, amended and confronted with linguistic material from various languages. The later chapters are concluded with more far-reaching proposals. Kolmogorov's questions must be taken seriously. The turn toward a semantics-orientated approach which is evident in the last stage of the development of the Set theoretical School must be pursued. New definitions of case and gender are proposed in accordance with the new approach. Case and Gender contains not only an analytical survey of the complete scientific output of the Set theoretical School on morphology and syntax but also a confrontation with contemporary western theories. It shows the viability of a tradition which was abandoned as a result of political developments. The long chapter on the history of the relationship between linguistics and politics in the Soviet Union contains new material on the 1950 linguistic discussion in Pravda which was decided by Stalin's contribution and whose impact would last for decades to come.
