The Quiet Hero Nelson Price, 2015-03-06 In 1985 the eyes of the world turned to the Hoosier State and the attempt by a thirteen year old Kokomo Indiana teenager to do what seemed to be a simple task join his fellow classmates at Western Middle School in Russiaville the school to which his Kokomo neighborhood was assigned The teenager Ryan White however had been diagnosed with Acquired Immune Deficiency Syndrome from contaminated blood based products used to treat his hemophilia It was my decision White said to live a normal life go to school be with friends and enjoying day to day activities It was not going to be easy White s words were an understatement to say the least His wish to return to school was met with panic by parents and some school officials The controversy about White and the quiet

courage he and his mother Jeanne displayed in their battle to have him join his classmates is explored in the eleventh volume in the Indiana Historical Society Press's Youth Biography Series *A Quiet Hero* is written by Nelson Price who wrote about White's odyssey during his days as a reporter and columnist for the Indianapolis News Price goes behind the scenes and brings to light stories and individuals who might have been lost in the media spotlight After a nine month court battle White won the right to return to school but with concessions These were not enough for parents of twenty children who responded by starting their own school At school White became the target of slurs and lies and his locker was vandalized Although the White family received support from citizens and celebrities around the world particularly rock singer Elton John the situation grew so controversial in Kokomo that they moved to Cicero Indiana a community that greeted them much differently In Price's book White who succumbed to his disease in 1990 comes across as a normal teenager who met an impossible situation with uncommon grace courage and wisdom It was difficult at times to handle but I tried to ignore the injustice because I knew the people were wrong White said My family and I held no hatred for those people because we realized they were victims of their own ignorance

Ensuring early diagnosis and access to treatment for HIV/AIDS : can federal resources be more effectively targeted? : hearing , A National Strategy for the Elimination of Hepatitis

B and C National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Population Health and Public Health Practice, Committee on a National Strategy for the Elimination of Hepatitis B and C, 2017-07-30

Hepatitis B and C cause most cases of hepatitis in the United States and the world. The two diseases account for about a million deaths a year and 78 percent of world's hepatocellular carcinoma and more than half of all fatal cirrhosis. In 2013, viral hepatitis of which hepatitis B virus (HBV) and hepatitis C virus (HCV) are the most common types surpassed HIV and AIDS to become the seventh leading cause of death worldwide. The world now has the tools to prevent hepatitis B and cure hepatitis C. Perfect vaccination could eradicate HBV but it would take two generations at least. In the meantime, there is no cure for the millions of people already infected. Conversely, there is no vaccine for HCV but new direct-acting antivirals can cure 95 percent of chronic infections, though these drugs are unlikely to reach all chronically infected people anytime soon. This report is the second of two builds off the conclusions of the first report and outlines a strategy for hepatitis reduction over time and specific actions to achieve them.
