*Saab Gripen* Gerard Keijsper, 2003 81 2 x 11 176 pgs 250 color b w photos b w line drawings The Saab Gripen first flown in 1988 entered service with the Swedish Air Force in June 1996 It represents one of the most advanced fighters in production today and follows a distinctive line of Swedish jets including the Viggen and Draken The Gripen is now raising particular interest in enthusiasts as the program has now become a joint SAAB BAe Systems venture and sales have now been made to the air forces of South Africa and more recently to Hungary and the Czech Republic with prospects of further sales including Poland

**Flight Test System Identification** Roger Larsson, 2019-05-15 With the demand for more advanced fighter aircraft relying on unstable flight mechanical characteristics to gain flight performance more focus has been put on model based system engineering to help with the design work The flight control system design is one important part that relies on this modeling Therefore it has become more important to develop flight mechanical models that are highly accurate in the whole flight envelope For today s modern fighter aircraft the basic flight mechanical characteristics change between linear and nonlinear as well as stable and unstable as an effect of the desired capability of advanced maneuvering at subsonic transonic and supersonic speeds This thesis combines the subject of system identification which is the art of building mathematical models of dynamical systems based on measurements with aeronautical engineering in order to find methods for identifying flight mechanical characteristics Here some challenging aeronautical identification problems estimating model parameters from flight testing are treated Two aspects are considered The first is online identification during flight testing with the intent to aid the engineers in the analysis process when looking at the flight mechanical characteristics This will also ensure that enough information is available in the resulting test data for post flight analysis Here a frequency domain method is used An existing method has been developed further by including an Instrumental Variable approach to take care of noisy data including atmospheric turbulence and by a sensor fusion step to handle varying excitation during an experiment The method treats linear systems that can be both stable and unstable working under feedback control An experiment has been performed on a radio controlled demonstrator aircraft For this multisine input signals have been designed and the results show that it is possible to perform more time efficient flight testing compared with standard input signals The other aspect is post flight identification of nonlinear characteristics Here the properties of a parameterized observer approach using a prediction error method are investigated This approach is compared with four other methods for some test cases It is shown that this parameterized observer approach is the most robust one with respect to noise disturbances and initial offsets Another attractive property is that no user parameters have to be tuned by the engineers in order to get the best performance All methods in this thesis have been validated on simulated data where the system is known and have also been tested on real flight test data Both of the investigated approaches show promising results

Lavi John W. Golan, 2016 The Lavi fighter program the largest weapons development effort ever undertaken by

the State of Israel envisioned a new generation of high performance aircraft In a controversial strategy Israel Aircraft Industries intended to develop and manufacture the fighters in Israel with American financial support The sophisticated planes developed in the mid 1980s were unique in design and intended to make up the majority of the Israeli air force Though considerable prestige and money were at stake developmental costs increased and doubts arose as to whether the Lavi could indeed be the warplane it was meant to be Eventually the program became a microcosm for the ambitions fears and internal divisions that shaped both the U S Israeli relationship and Israeli society itself But the fighter never made it to operational service and until now the full breadth and significance of the Lavi story have never been examined and presented Lavi The United States Israel and a Controversial Fighter Jet traces the evolution of the Lavi fighter from its genesis in the 1970s to its scrapping in August 1987 John W Golan examines the roles of Israeli military icons and political leaders such as Ezer Weizman Ariel Sharon Menachem Begin and Yitzhak Rabin in the program and in relation to their counterparts in the United States On the American side Golan traces the evolution of government policy toward the program detailing the complex picture of the U S foreign policy apparatus and of U S Israeli relations in general from President Reagan s public endorsement of the program on the White House lawn to Defense Secretary Caspar Weinberger s unremitting attempts to cancel it in succeeding years

macroeconomic effects of positive externalities or industrial spillovers around advanced production The case explored is the technology di dend around Swedish aircraft industry and in particular around the aircraft ma facturer Saab and the major industrial project of the JAS 39 Gripen multirole combat aircraft The project is partly an updating of my book in Swedish Technology 1 Generator or a National Presige Project from 1995 but extends the analysis in s eral directions The study includes a chapter on spillovers from advanced production in an industrially developing economy South Africa that has acquired the JAS 39 Gripen for its Air Force There is also a chapter in which the results for Sweden are discussed in the wider context of advanced public procurement in Europe The text has been organized such that the main chapters have been written for academic readers Two supplements include the technical details of data collection mathematical models and calculation methods The first chapter is brief and focused on the results It has the character of an extended executive summary The second chapter summarizes the entire story problems results and methods This project would not have been possible without the generous support of a number of people First of all great thanks go to all those people with crowded calendars in Swedish industrial firms that have set aside time to respond to my questions Most of them have been listed at the end of the book *Air University Library Index to Military Periodicals* ,1996
