

The background of the cover is an abstract architectural composition. A large, dark, semi-circular shape dominates the center-left. To its right is a textured, reddish-brown shape that resembles a stylized 'L' or a corner. The top-left corner features a series of parallel, light-colored lines radiating outwards. The bottom-left corner shows a series of parallel, light-colored lines running horizontally. The overall effect is one of modern, geometric design.

Sacral Space Modern Finnish Churches:

Sacral Space Jari Jetsonen, Sirkkaliisa Jetsonen, 2003 Exploring the beauty of Finnish modern church buildings this study demonstrates how they appeal to the visitor with their minimalist character The essential strength of their architecture is illustrated within the presence of light and nature and the buildings and their interiors are depicted as attuned to the passing of each day and the change of seasons Conducting a tour through twelve churches and chapels from the 1940s to 1990s this examination includes the Resurrection Chapel by Erik Bryggman the Otaniemi Chapel by Kaija and Heikki Siren the Church of the Three Crosses by Alvar Aalto and more Construction photographs architects drawings and commentary are included and an accompanying article commenting on the uniqueness and history of each church building is also featured revealing the essentials of Finnish sacral architecture

Finnish Summer Houses Jari Jetsonen, Jetsonen Sirkkaliisa, 2008-03-20 Summer is when Finland is at its spellbinding best Emerging from a seven month long winter Finns head outdoors to savor the magical light of the all too brief Scandinavian summer Cityscapes give way to pristine lakes endless forests and idyllic seaside vistas The Finnish summer house offers a unique opportunity for their owners to relax get back in touch with nature and enjoy outdoor activities such as boating swimming and hiking Not surprisingly the architecture of the Finnish summer house occupies an almost mythic even mystical place in the hearts of their inhabitants as well as their architects Indeed many Finnish architects regard the design of their own summer residence or weekend studio as one of their most important works For them the summer house is not only a place to spend leisure time but also a chance to study specific technical details and experiment with new spatial concepts Finnish Summer Houses presents in detail twenty villas cottages and cabins by architects such as Eliel Saarinen Oiva Kallio Alvar Aalto and Juhani Pallasmaa among many others Authors Jari and Sirkkaliisa Jetsonen use contemporary photographs archival images drawings and plans to illustrate the diversity found in the designs of Finnish summer residences From Lars Sonck's Lassas Villa 1895 with its traditional farmhouse elements and Alvar Aalto's Muuratsalo Experimental House 1952-54 to Erkki Kairamo's sparse Villa Aulikki 1995-2003 which seems to grow out of its landscape the works in this book are of a highly personal nature indeed most of the summer houses are still used by the architect or the families of their children The very best examples of these fantastic summer homes are collected here making Finnish Summer Houses an inspiration for anyone dreaming about a summer home of their own

Alvar Aalto Houses Jari Jetsonen,Alvar Aalto,Markku Lahti,2005 During the course of a career spanning over 50 years Alvar Aalto designed nearly 100 single family houses Many of them are architectural gems where his thoughts about dwelling and architecture come together Aalto considered experimental building to be very important in his opinion there should always be an opportunity for experimentation in every project for it is only in that way that architecture can be promoted and quality improved for the good of the little man It was specifically in the designing of single family houses that Aalto could realize new ideas Aalto s single family houses can be divided into three groups houses for individuals the client of which was nearly always a relative or friend houses designed for industrial institutions or other communities and type or standard houses All the houses presented in Alvar Aalto Houses were originally designed for private clients The book presents eight single family houses by Aalto from 1920s to the end of the 1960s built in Finland Estonia and France Book jacket

Sacred Buildings Rudolf Stegers,2008-05-16 The building of religious structures represents a rare opportunity for the architect to concentrate on the creation of volume space and form Sacred architecture is far less determined than other building tasks by functional requirements norms and standards As a rule it is free to unfold as pure architecture Thus in design terms this building task offers enormous freedoms to the architect At the same time however the special atmospherics of sacred spaces call on the part of the architect for a highly sensitive treatment of religion and the relevant cultural and architectural traditions In a systematic section this volume introduces the design technical and planning fundamentals of building churches synagogues and mosques In its project section it also presents about seventy realized structures from the last three decades Drawing upon his in depth knowledge of the subject and his many years of publishing experience the author offers a valuable analysis of the conceptual and formal aspects that combine to create the religious impact of spaces e g the ground plan the shapes of the spaces the incidence of light and materiality
