**The Gender of Piety** Wendy Urban-Mead, 2015-07-15 The Gender of Piety is an intimate history of the Brethren in Christ Church in Zimbabwe or BICC as related through six individual life histories that extend from the early colonial years through the first decade after independence Taken together these six lives show how men and women of the BICC experienced and sequenced their piety in different ways Women usually remained tied to the church throughout their lives while men often had a more strained relationship with it Church doctrine was not always flexible enough to accommodate expected masculine gender roles particularly male membership in political and economic institutions or participation in important male communal practices The study is based on more than fifteen years of extensive oral history research supported by archival work in Zimbabwe the United Kingdom and the United States The oral accounts make it clear official versions to the contrary that the church was led by spiritually powerful women and that maleness and mission church notions of piety were often incompatible The life history approach illustrates how the tension of gender roles both within and without the church manifested itself in sometimes unexpected ways for example how a single family could produce both a legendary woman pastor credited with mediating multiple miracles and a man her son who joined the armed wing of the Zimbabwe African People s Union nationalist political party and fought in Zimbabwe s liberation war in the 1970s Investigating the lives of men and women in equal measure The Gender of Piety uses a gendered interpretive lens to analyze the complex relationship between the church and broader social change in this region of southern Africa

**Gendered Insecurities, Health and Development in Africa** Howard Stein, Amal Hassan Fadlalla, 2012 The concept of security has often narrowly focused on issues surrounding the protection of national borders from outside threats However a richer idea of human security has become increasingly important in the past decade or so The aim is to incorporate various dimensions of the downside risks affecting the generalized well being or dignity of people Despite this rising prominence the discourses surrounding human security have neglected to address the topic of gender particularly how issues of poverty and underdevelopment impact women's and men's experiences and strategies differently Since its introduction in the 1994 UNDP Human Development report the idea of human security has become increasingly influential among academics and international development practitioners However gendered dimensions of human security have not attracted enough attention despite their vital importance Women are disproportionately more vulnerable to disease and other forms of human insecurity due to differences in entitlement empowerment and an array of other ecological and socio economic factors These gendered insecurities are inextricably linked to poverty and as a result the feminization of poverty is a growing phenomenon worldwide The contributors to this volume rely on a gender focused analysis to consider a number of issues central to human security and development in Africa including food security environmental health risks discrimination within judicial and legal systems gendered aspects of HIV/AIDS transmission and treatment technologies neoliberalism and poverty alleviation strategies and conflict and women's political activism The gender focus of this volume points to the importance of power relationships and policy variability underlying human insecurities in the African context The insights of this book offer the potential for an improved human security framework one that embraces a more complex and context specific analysis of the issues of risk and vulnerability therefore expanding the capacities of the human security framework to safeguard the livelihoods of the most vulnerable
