Sacreds Of The World:

Returning To Sacred World Stephen Gray, 2010-11-26 Powerful ancient and leading edge visions and teachings for healing ourselves and our world through meditation prayer and sacred plant practices *Embodied Spirituality in a Sacred World* Michael Washburn, 2012-02-01 Anyone seeking a deeper understanding of human spirituality will find something of value in Michael Washburn's new book Drawing on a rich variety of psychoanalytic Jungian and existential phenomenological sources and on both Western and Asian spiritual texts Embodied Spirituality in a Sacred World provides a theoretical foundation for the idea that human development follows a spiral path Washburn shows that ego development early in life requires us to turn our backs on original sources of our existence and therefore that spiritual development later in life requires us to spiral back to these sources on the way to whole psyche integration He elucidates the underlying causes and pivotal events that set development on its spiral course and traces six major dimensions of experience as they unfold along the spiral path the unconscious the energy system the ego system the perceived other the experiential body and the life world In providing a theoretical foundation for the idea of the spiral path Washburn defends the idea against its critics and helps explain why the idea has been compelling to so many people in diverse traditions The World's Great Religious Poetry Caroline Miles Hill, 1928 *Sacred Language, Sacred World* Joshua D. Broggi, 2015-12-17 Heidegger and Gadamer are typically read by different theologians Heidegger tends to be read by philosophical theologians examining his contribution to matters of doubt existential finitude and atheism Gadamer tends to be read by those with an interest in interpreting the Bible especially by those with more confessional or epistemically optimistic sensibilities In both cases Heidegger and Gadamer have well established associations with specific theological positions Joshua Broggi challenges this arrangement by re-reading the primary texts as theological resources he defends an alternative theological appropriation of their philosophical work through a close engagement with portions of their argument What emerges from Broggi's examination is an account of the unity of tradition reason and scriptural language This account goes beyond claims of their relatedness which are uncontroversial and advances the stronger argument that they name the very same thing Although initially counterintuitive the central task set by both Heidegger and Gadamer is the investigation of that one phenomenon This argument challenges the pervasive image in which Christians rely on tradition to reason about the meaning of scripture It puts into question the injunction that theologians should balance the resources of scripture tradition and reason Broggi offers an account of Christian life as more fundamental than certain entities which are distilled out of it namely scripture tradition and reason **Sacred America, Sacred World** Stephen Dinan, 2016-01-01 This book weaves the best of today's emergent spirituality with seasoned political wisdom demonstrating how America can grow beyond its current stagnation and political gridlock to become a world leader in peace and progress It promotes a transpartisan nonideological and pragmatic approach to social reform and includes practical ideas and innovative strategies that explore evolutions in political leadership

environmental concerns and economic reformation *Review of the World's Religious Congresses of the World's Congress Auxiliary of the World's Columbian Exposition* Lewis Pyle Mercer,1893 **Theory for Religious Studies** William E.

Deal,Timothy K. Beal,2004-11-01 In this handy volume two professors of religious studies provide the student of religious studies whether the motivated undergraduate graduate student or professor with a brief review of theorists work from the perspective of religious studies For example in 5 10 pages the reader will get a review of Emmanuel Levinas s work as it offers insights for scholars in religious studies followed by a selected bibliography In short this is a guide for students of religious studies that will take major theoretical writers in the humanities and social sciences and explain their relevance to the study of religion *The Religious Worlds of the Laity in Late Antique Gaul* Lisa Kaaren Bailey,2016-04-07 Christianity in the late antique world was not imposed but embraced and the laity were not passive members of their religion but had a central role in its creation This volume explores the role of the laity in Gaul bringing together the fields of history archaeology and theology First this book follows the ways in which clergy and monks tried to shape and manufacture lay religious experience They had themselves constructed the category of the laity which served as a negative counterpart to their self definition Lay religious experience was thus shaped in part by this need to create difference between categories The book then focuses on how the laity experienced their religion how they interpreted it and how their decisions shaped the nature of the Church and of their faith This part of the study pays careful attention to the diversity of the laity in this period their religious environments ritual engagement behaviours knowledge and beliefs The first volume to examine laity in this period in Gaul a key region for thinking about the transition from Roman rule to post Roman society *The Religious Worlds of the Laity in Late Antique Gaul* fills an important gap in current literature *The Holy Name Journal* ,1917 **The World's Religions** Peter B. Clarke,Peter Beyer,2009-05-07 This comprehensive volume focuses on the world s religions and the changes they have undergone as they become more global and diverse in form It explores the religions of the world not only in the regions with which they have been historically associated but also looks at the new cultural and religious contexts in which they are developing It considers the role of migration in the spread of religions by examining the issues raised for modern societies by the increasing interaction of different religions The volume also addresses such central questions as the dynamics of religious innovation which is evidenced in the rise and impact of new religious and new spirituality movements in every continent **The Sacred Universe** Thomas Berry,2009 A leading scholar cultural historian and Catholic priest who spent more than fifty years writing about our engagement with the Earth Thomas Berry possessed prophetic insight into the rampant destruction of ecosystems and the extinction of species In this book he makes a persuasive case for an interreligious dialogue that can better confront the environmental problems of the twenty first century These erudite and keenly sympathetic essays represent Berry s best work covering such issues as human beings modern alienation from nature and the possibilities of future regenerative forms of religious experience Asking that we create a new story of the universe and

the emergence of the Earth within it Berry resituates the human spirit within a sacred totality Understanding New Religious Movements John A Saliba, 2004-09-08 Discussions of any religion can easily raise passions But arguments tend to become even more heated when the religion under discussion is characterized as new Divisions around the study of new religious movements NRMs or cults or nontraditional or alternative or emergent religions are so acute that there is even controversy over what to call them John Saliba strives to bring balance to these discussions by offering perspectives on new religions from different academic perspectives history psychology sociology law theology and counseling This approach provides rich descriptions of a broad range of movements while demonstrating how the differing aims of the disciplines can create much of the controversy around NRMs The new second edition has been updated and revised throughout and includes a new foreword by noted historian of religion J Gordon Melton For classes in religion or the social sciences or for interested individuals Understanding New Religious Movements offers the most objective introduction possible **Sacred Books of the East** Epiphanius Wilson, 1899 **Seeking the Sacred with Psychoactive Substances** J. Harold Ellens, 2014-10-28 Can drugs be used intelligently and responsibly to expand human consciousness and heighten spirituality This two volume work presents objective scientific information and personal stories aiming to answer the question The first of its kind this intriguing two volume set objectively reports on and assesses this modern psycho social movement in world culture the constructive medical use of entheogens and related mind altering substances Covering the use of substances such as ayahuasca cannabis LSD peyote and psilocybin the work seeks to illuminate the topic in a scholarly and scientific fashion so as to lift the typical division between those who are supporters of research and exploration of entheogens and those who are strongly opposed to any such experimentation altogether The volumes address the history and use of mind altering drugs in medical research and religious practice in the endeavor to expand and heighten spirituality and the sense of the divine providing unbiased coverage of the relevant arguments and controversies regarding the subject matter Chapters include examinations of how psychoactive agents are used to achieve altered states in Judaism Christianity Islam and Buddhism as well as in the rituals of shamanism and other less widely known faiths This highly readable work will appeal to everyone from high school students to seasoned professors in both the secular world and in devoted church groups and religious colleges

Space, Place and Religious Landscapes Darrelyn Gunzburg, Bernadette Brady, 2020-10-01 Exploring sacred mountains around the world this book examines whether bonding and reverence to a mountain is intrinsic to the mountain constructed by people or a mutual encounter Chapters explore mountains in England Scotland Wales Italy Ireland the Himalaya Japan Greece USA Asia and South America and embrace the union of sky landscape and people to examine the religious dynamics between human and non human entities This book takes as its starting point the fact that mountains physically mediate between land and sky and act as metaphors for bridges from one realm to another recognising that mountains are relational and that landscapes form personal and group cosmologies The book fuses ideas of space place and material religion with

cultural environmentalism and takes an interconnected approach to material religio landscapes In this way it fills the gap between lived religious traditions personal reflection phenomenology historical context environmental philosophy myths and performativity In defining material religion as active engagement with mountain forming and humanshaping landscapes the research and ideas presented here provide theories that are widely applicable to other forms of material religion
