Science Under Scarcity Principles And Practice For Agricultural Research Evaluation And Priority Setting:

Science Under Scarcity Julian M. Alston, George W. Norton, Philip G. Pardey, 1998 Resources for agricultural science are scarce across the world Yet even as resources are shrinking agricultural science has expanded its inquiry into many new areas such as environmental preservation food quality and rural development without forsaking its more traditional concerns In a time of tight government budgets research administrators are faced with the need to provide strong evidence that costs are justified by benefits *Science under Scarcity* is an invaluable guide to the theory and methods necessary for evaluating research in agriculture and for setting priorities for resource allocation Although economists have made significant progress in developing more sophisticated methods for research evaluation and priority setting many research analysts and administrators do not have a working knowledge of those practices Without the assistance of formal economic analysis it is particularly difficult to assess the social value of new technologies or to make informed judgements about the trade offs that are involved in allocation decisions Addressing that knowledge gap this book reviews synthesizes and extends such methods as economic surplus analysis econometric techniques mathematical programming procedures and scoring models It discusses these practices in the context of scientific policy describes their conceptual foundations and explains how to do them Originally published in 1995 in hardcover by Cornell University Press it is now reissued in paperback by CAB

INTERNATIONAL **A Meta-analysis of Rates of Return to Agricultural R&D** Julian M. Alston, Connie Chan-Kang, Michele C. Marra, Philip G. Pardey, TJ Wyatt, 2000 Analyze alternative national and international strategies and policies for meeting food needs of the developing world on a sustainable basis with particular emphasis on low income countries and on the poorer groups in those countries **Prioritizing Agricultural Research for Development** David A.

Raitzer, George W. Norton, 2009 Priority assessment for commodity improvement programmes has received methodological attention yet innovation is needed for other newer areas of research which have impact pathways that are harder to predict Focusing on priority setting practices utilized in different international agricultural research institutes this book discusses real world experiences and innovations with priority assessment methods Chapters present approaches that have been used to articulate explore and assess impact pathways and research priorities while also considering their strengths and weaknesses and drawing together methodological lessons , **Improving investment in research and innovation to**

Masters, 2009-12-22 The globalization of goods services and capital for agriculture is fundamental to the future of developing countries and has major implications for the fight against poverty and sustainability of the environment In recent years agriculture has once again returned to a position of centre stage as food price volatility has led countries to re examine their development strategies This new edition of the essential textbook in the field builds on the 2006 original and reflects the

following developments the increased impact of climate change issues affecting agricultural markets such as bio fuels the rise in farm prices and energy costs the move to higher valued agricultural products The book contains a wealth of real world case studies and is now accompanied by a website that includes powerpoint lectures a photo bank and a large set of discussion and exam questions The accompanying website is available to view at <http://ecagdev.agecon.vt.edu>

Operational Research in Agriculture and Tourism Evangelia Krassadaki, George Baourakis, Constantin Zopounidis, Nikolaos Matsatsinis, 2020-05-05 This book presents a diverse range of recent operational research techniques that have been applied to agriculture and tourism management It covers both the primary sector of agriculture and agricultural economics and the tertiary sector of the tourism industry Findings and lessons learned from these innovations can be readily applied to various other contexts The book chiefly focuses on cooperative management issues and on developing solutions to provide decision support in multi criteria scenarios Integrated Natural Resource Management

Bruce Morgan Campbell, Jeffrey Sayer, 2003 This book which contains 15 separately authored chapters discusses both the principles and applications of an integrated approach to natural resource management Such an approach must embrace the complexity of systems and redirect research towards the greater inclusion of issues such as participatory approaches multi scale analysis and an array of tools for system analysis information management and impact assessment Case studies particularly from developing countries in Asia Africa and Latin America are included This book is of interest to a wide range of readers in many disciplines including forestry soil and management sciences agriculture and development studies
