Scientific Enterprise In Antiquity And The Middle Ages Readings From Isis:

The Scientific Enterprise in Antiquity and the Middle Ages Michael H. Shank, 2000 This stimulating collection of twenty two articles is intended not only to explore a range of scientific topics but to engage readers in historiographical debates and methodological issues that surround the study of ancient and medieval science A convenient sampling of classic and contemporary scholarship it will appeal to students and specialists alike Contributors include Francesca Rochberg David Pingree G E R Lloyd Heinrich von Staden Martin Bernal Alexander Jones Bernard Goldstein Alan Bowen Owsei Temkin David Lindberg Steven McCluskey Linda Voigts Edward Grant Bernard Goldstein Victor Roberts Lynn Thorndike Helen Lemay William Newman A Mark Smith Nancy Siraisi Michael McVaugh and Brian P Copenhaver *Routledge Handbook on the Sciences in Islamicate Societies* Sonja Brentjes, 2023-01-24 The Routledge Handbook on the Sciences in Islamicate Societies provides a comprehensive survey on science in the Islamic world from the 8th to the 19th century Across six sections a group of subject experts discuss and analyze scientific practices across a wide range of Islamicate societies The authors take into consideration several contexts in which science was practiced ranging from intellectual traditions and persuasions to institutions such as courts schools hospitals and observatories to the materiality of scientific practices including the arts and craftsmanship Chapters also devote attention to scientific practices of minority communities in Muslim majority societies and Muslim minority groups in societies outside the Islamicate world thereby allowing readers to better understand the opportunities and constraints of scientific practices under varying local conditions Through replacing Islam with Islamicate societies the book opens up ways to explain similarities and differences between diverse societies ruled by Muslim dynasties This handbook will be an invaluable resource for both established academics and students looking for an introduction to the field It will appeal to those involved in the study of the history of science the history of ideas intellectual history social or cultural history Islamic studies Middle East and African studies including history and studies of Muslim communities in Europe and South and East Asia The Genesis of Science James Hannam, 2011-03-22 Maybe the Dark Ages Weren t So Dark Afterall Here are some facts you probably didn t learn in school People in the Middle Ages did not think the world was flat in fact medieval scholars could prove it wasn t The Inquisition never executed anyone because of their scientific ideas or discoveries actually the Church was the chief sponsor of scientific research and several popes were celebrated for their knowledge of the subject It was medieval scientific discoveries methods and principles that made possible western civilization s Scientific Revolution If you were taught that the Middle Ages were a time of intellectual stagnation superstition and ignorance you were taught a myth that has been utterly refuted by modern scholarship As a physicist and historian of science James Hannam shows in his brilliant new book *The Genesis of Science* How the Christian Middle Ages Launched the Scientific Revolution without the scholarship of the barbaric Middle Ages modern science simply would not exist The Middle Ages were a time of one intellectual triumph after another As Dr Hannam writes The people of medieval Europe invented

spectacles the mechanical clock the windmill and the blast furnace by themselves Lenses and cameras almost all kinds of machinery and the industrial revolution itself all owe their origins to the forgotten inventors of the Middle Ages In The Genesis of Science you will discover Why the scientific accomplishments of the Middle Ages far surpassed those of the classical world How medieval craftsmen and scientists not only made discoveries of their own but seized upon Eastern inventions printing gunpowder and the compass and improved them beyond the dreams of their originators How Galileo's notorious trial before the Inquisition was about politics not science Why the theology of the Catholic Church far from being an impediment led directly to the development of modern science Provocative engaging and a terrific read James Hannam's Genesis of Science will change the way you think about our past and our future
