Scientific Realism A Critical Reappraisal

N Rescher

Scientific Realism A Critical Reappraisal:

Scientific Realism N. Rescher, 2012-12-06 The increasingly lively controversy over scientific realism has become one of the principal themes of recent philosophy. In watching this controversy unfold in the rather technical way currently in vogue, it has seemed to me that it would be useful to view these contemporary disputes against the background of such older epistemological issues as fallibilism, scepticism, relativism, and the traditional realism/idealism debate. This then is the object of the present book, which will reconsider the newer concerns about scientific realism in the context of these older philosophical themes. Historically, realism concerns itself with the real existence of things that do not meet the eye with suprasensible entities that lie beyond the reach of human perception. In medieval times, discussions about realism focused upon universals. Recognizing that there are physical objects such as cats and triangular objects and red tomatoes, the medievals debated whether such abstract objects as cathood and triangularity and redness also exist by way of having a reality independent of the concretely real things that exhibit them. Three fundamentally different positions were defended: 1. Nominalism: Abstracta have no independent existence as such; they only exist in and through the objects that exhibit them. Only particulars/individual substances exist. Abstract objects are existents in name only, mere thought-fictions by whose means we address concrete particular things. 2. Realism: Abstracta have an independent existence as such. Scientific Realism N. Rescher, 1987-08-31

Philosophy of Language and the Challenge to Scientific Realism Christopher Norris, 2004-06-02 In this book, Christopher Norris develops the case for scientific realism by tackling various adversary arguments from a range of anti-realist positions. Through a close critical reading, he shows how they fail to make adequate sense on any rational, consistent, and scientifically informed survey of the evidence. Along the way, he incorporates a number of detailed case studies from the history and philosophy of science. Norris devotes much of his discussion to some of the most prominent and widely influential source texts of anti-realism. Also included are the sophisticated versions of verificationism developed, albeit in very different ways, by thinkers such as Michael Dummett and Bas van Fraassen. Central to Norris's argument is a prolonged engagement with the once highly influential but nowadays neglected work of Norwood Russell Hanson. This book will be welcomed especially by readers who possess some knowledge of the background debate and who wish to deepen and extend their understanding of these issues beyond an introductory level.

Resisting Scientific Realism K. Brad Wray, 2018-11 Provides a spirited defence of anti-realism in philosophy of science. Shows the historical evidence and logical challenges facing scientific realism.

Varieties of Scientific Realism Evandro Agazzi, 2017-03-08 This book offers a comprehensive update on the scientific realism debate, enabling readers to gain a novel appreciation of the role of objectivity and truth in science and to understand fully the various ways in which antirealist conceptions have been subjected to challenge over recent decades. Authoritative representatives of different philosophical traditions explain their perspectives on the meaning and validity of scientific realism and describe the strategies being adopted to counter persisting antirealist

positions The coverage extends beyond the usual discussion of realism within the context of the natural sciences and especially physics to encompass also its applicability in mathematics logic and the human sciences The book will appeal to all with an interest in the recent realist epistemologies of science the nature of current philosophical debate and the ongoing rehabilitation of truth as the legitimate goal of scientific research **Metamodernism** Jason Ananda Josephson

Storm,2021-06-07 Not only an astute diagnosis of the confusions and contradictions of contemporary thought it also offers compelling alternatives Rita Felski author of *Hooked Art and Attachment* For decades scholars have been calling into question the universality of disciplinary objects and categories The coherence of defined autonomous categories such as religion science and art has collapsed under the weight of postmodern critiques calling into question the possibility of progress and even the value of knowledge Jason nanda Josephson Storm aims to radicalize and move beyond these deconstructive projects to offer a path forward for the humanities and social sciences using a new model for theory he calls metamodernism Metamodernism works through the postmodern critiques and uncovers the mechanisms that produce and maintain concepts and social categories In so doing Storm provides a new radical account of society s ever changing nature what he calls a Process Social Ontology and its materialization in temporary zones of stability or social kinds Storm then formulates a fresh approach to philosophy of language by looking beyond the typical theorizing that focuses solely on human language production showing us instead how our own sign making is actually on a continuum with animal and plant communication Storm also considers fundamental issues of the relationship between knowledge and value promoting a turn toward humble emancipatory knowledge that recognizes the existence of multiple modes of the real Metamodernism is a revolutionary manifesto for research in the human sciences that offers a new way through postmodern skepticism to envision a more inclusive future of theory in which new forms of both progress and knowledge can be realized *The Oxford*

Handbook of Philosophy of Science Paul Humphreys,2016-08-04 This handbook provides both an overview of state of the art scholarship in philosophy of science as well as a guide to new directions in the discipline Section I contains broad overviews of the main lines of research and the state of established knowledge in six principal areas of the discipline including computational physical biological psychological and social sciences as well as general philosophy of science Section II covers what are considered to be the traditional topics in the philosophy of science such as causation probability models ethics and values and explanation Section III identifies new areas of investigation that show promise of becoming important areas of research including the philosophy of astronomy and astrophysics data complexity theory neuroscience simulations post Kuhnian philosophy post empiricist epistemology and emergence Most chapters are accessible to scientifically educated non philosophers as well as to professional philosophers and the contributors all leading researchers in their field bring diverse perspectives from the North American European and Australasian research communities This volume is an essential resource for scholars and students **Recent Themes in the Philosophy of Science** S. Clarke,T.D. Lyons,2013-03-09 Australia and

New Zealand boast an active community of scholars working in the field of history philosophy and social studies of science Australasian Studies in History and Philosophy of Science aims to provide a distinctive publication outlet for their work Each volume comprises a group of thematically connected essays edited by scholars based in Australia or New Zealand with special expertise in that particular area In each volume a majority of the contributors are from Australia or New Zealand Contributions from elsewhere are by no means ruled out however and are actively encouraged wherever appropriate to the balance of the volume in question Earlier volumes in the series have been welcomed for significantly advancing the discussion of the topics they have dealt with I believe that the present volume will be greeted equally enthusiastically by readers in many parts of the world R W Home General Editor Australasian Studies in History And Philosophy of Science viii

ACKNOWLEDGEMENTS The majority of the papers in this collection had their origin in the 2001 Australasian Association for History Philosophy and Social Studies of Science annual conference held at the University of Melbourne where streams of papers on the themes of scientific realism and commonsense were organised Realism in the Sciences Igor Douven, Leon Horsten, 1996 This book contains ten papers that were presented at the symposium about the realism debate held at the Center for Logic Philosophy of Science and Philosophy of Language of the Institute of Philosophy at the Katholieke Universiteit Leuven on 10 and 11 March 1995 The first group of papers are directly concerned with the realism anti realism debate in the general philosophy of science This group includes the articles by Ernan McMullin Diderik Batens Joke Meheus Igor Douven and Herman de Regt The papers of the second group concentrate on specific problems arising from the realism anti realism debate Theo Kuipers contribution discusses the problem of truth approximation Roger Vergauwen s article pertains to the issue of realism in the philosophy of mind and semantics Jaap van Brakel s article focusses on the relation between everyday concepts and scientific concepts and on the theory dependence of observation Paul Cortois investigates the relation between the question of realism and Kuhn s concept of incommensurability between scientific theories The final group contains two papers on the realism anti realism debate in the special sciences James Cushing discusses the problem of underdetermination in quantum mechanics and Jean Paul van Bendegem addresses the question of the possibility of an empiricist philosophy of mathematics Culture and Modernity Eliot Deutsch, 1991-01-01 The crisis of modernity Incommensurability Relativism Language and non Western cultural traditions Culture and the ethical Culture and the aesthetic Culture and the religious Culture and the political Cultural identity Scientific progress
