Scientific Trends In The Quran:

The Scientific Trends in the Quran Aḥmad Maḥmūd Sulaymān, 1985 Scientific and Political Freedom in Islam Uriya Shavit, 2017-02-24 This book critically explores the modernist apologetic Islamic approach to the relation between revelation and science and politics which for over a century has been a central part of Arab discourses on the future of Muslim societies The main thesis of the book is that the modernist apologetic approach has great potential to be a force for liberalization but also possesses inherent limitations that render its theory on the relation between revelation and freedom self contradictory

An Illusion of Harmony Taner Edis, 2010-03-05 Current discussions in the West on the relation of science and religion focus mainly on science's uneasy relationship with the traditional Judeo Christian view of life But a parallel controversy exists in the Muslim world regarding ways to integrate science with Islam As physicist Taner Edis shows in this fascinating glimpse into contemporary Muslim culture a good deal of popular writing in Muslim societies attempts to address such perplexing questions as Is Islam a scientific religion Were the discoveries of modern science foreshadowed in the Quran Are intelligent design conjectures more appealing to the Muslim perspective than Darwinian explanations Edis examines the range of Muslim thinking about science and Islam from blatantly pseudoscientific fantasies to comparatively sophisticated efforts to Islamize science From the world's strongest creationist movements to bizarre science in the Quran apologetics popular Muslim approaches promote a view of natural science as a mere fact collecting activity that coexists in near perfect harmony with literal minded faith Since Muslims are keenly aware that science and technology have been the keys to Western success they are eager to harness technology to achieve a Muslim version of modernity Yet at the same time they are reluctant to allow science to become independent of religion and are suspicious of Western secularization Edis examines all of these conflicting trends revealing the difficulties facing Muslim societies trying to adapt to the modern technological world His discussions of both the parallels and the differences between Western and Muslim attempts to harmonize science and religion make for a unique and intriguing contribution to this continuing debate

Scientific Development in Islamic Civilization Aijaz Ahmad, 2023-01-01 This book Scientific Development in Islamic Civilization is a humble effort to highlight the scientific research conducted by Islamic scholars of the mediaeval world between the seventh and seventeenth centuries The Quranic verses and the traditions of the Prophet dealing with scientific enterprise have also been analysed and quoted in this work The works of the majority of Muslim scientists are also discussed in depth The scientific development during the periods of various ruling dynasties and caliphates is properly mentioned in various chapters Above all the goal of writing this book is to make Muslims in particular and non Muslims in general aware of the glorious past of Islamic civilization which has been washed out or purposefully ignored in historical texts these days

Three Testaments Brian A. Brown, 2014-01-02 From disagreement over an Islamic Center in New York to clashes between Christians and Muslims in Egypt tension between the three Abrahamic faiths often runs high Yet for all their

differences these three traditions Judaism Islam and Christianity share much in common Three Testaments brings together for the first time the text of the Torah the New Testament and the Quran so that readers can explore for themselves the connections as well as the points of departure between the three faiths Notable religion scholars provide accessible introductions to each tradition and commentary from editor Brian Arthur Brown explores how the three faiths may draw similarities from the ancient Zoroastrian tradition This powerful book provides a much needed interfaith perspective on key sacred texts

Global Trends 2025: A Transformed World C. Thomas Fingar, 2009-02 Prepared by the Nat Intell Council to stimulate strategic thinking about the future by identifying key trends the factors that drive them where they may be headed and how they might interact It uses scenarios to illustrate some of the many ways in which the drivers examined in the study e g globalization demography the rise of new powers the decay of internat institutions climate change and the geopolitics of energy may interact to generate challenges and opportunities for future decisionmakers Contents The Globalizing Economy The Demographics of Discord The New Players Scarcity in the Midst of Plenty Growing Potential for Conflict BRIC s Bust Up Will the Internat System Be Up to the Challenges Power sharing in a Multipolar World Illus *Global Trends 2025: A Transformed World* Office of the Director of National Intelligence (U.S.), 2013-08-15 NIC 2008 003 November 2008 Global Trends 2025 is the fourth installment in the National Intelligence Council led effort to identify key drivers and developments likely to shape world events a decade or more in the future It offers a fresh look at how key global trends might develop over the next 15 years to influence world events The primary goal is to provide US policymakers with a view of how world developments could evolve identifying opportunities and potentially negative developments that might warrant policy action

Egyptology: The Missing Millennium Okasha El Daly, 2016-07-01 Egyptology The Missing Millennium brings together for the first time the disciplines of Egyptology and Islamic Studies seeking to overturn the conventional opinion of Western scholars that Moslims Arabs had no interest in pre Islamic cultures This book examines a neglected period of a thousand years in the history of Egyptology from the Moslem annexation of Egypt in the seventh century CE until the Ottoman conquest in the 16th century Concentrating on Moslem writers as it is usually Islam which incurs blame for cutting Egyptians off from their ancient heritage the author shows not only the existence of a large body of Arabic sources on Ancient Egypt but also their usefulness to Egyptology today Using sources as diverse as the accounts of travelers and treasure hunters to books on alchemy the author shows that the interest in ancient Egyptian scripts continued beyond classical writers and describes attempts by medieval Arab scholars mainly alchemists to decipher the hieroglyph script He further explores medieval Arab interest in Ancient Egypt discussing the interpretations of the intact temples as well as the Arab concept of Egyptian kingship and state administration including a case study of Queen Cleopatra that shows how the Arabic romance of this queen differs significantly from Western views This book will be of great interest to academics and students of archaeology Islamic studies and Egyptology as well as anyone with a general interest in Egyptian history

In The Shadows of Glories Past John W.

Livingston,2018-02-01 The title of this volume implies two things the greatness of the scientific tradition that Muslims had lost and the power of the West in whose threatening shadow reformers now labored to modernize in order to defend themselves against those very powers they were taking as models Copernicus and Darwin were the names that dominated the debate on science whose arguments and rebuttals were published mainly in the religious and secular journals in Cairo and Beirut from the 1870s Analysis and interpretation of this literature shows the hope that Arab reformers had of duplicating the Japanese success followed by the despair when success was denied A cultural malaise festered from generations of despair defeat and foreign occupation and this feeling transmogrified after 1967 to a psychosis in a significant number of secular writers educators and religious reformers The great debate on assimilating science was turned inward where defensive mechanisms of denial spun out perversions of science the Quran becoming a thesaurus of science and a more extreme derivative of that something called Islamic Science arising as an alternate science that was to be in harmony with the Quran Shari a and Muslim belief This volume reveals the undermining effect of European imperialism on western oriented religious reformers and secular intellectuals for whom science and political reform went together and concludes with a chapter on the state of science in contemporary Muslim societies and the efforts to institutionalize science before the upheavals of 2011 so as to bring to life an authentic and indigenous culture that would sustain scientific study and research as autonomous pursuits Scientific Miracles Of Islam In Quran & Sunnah Mohamed Cherif,2015-07-18 Few people know about the Scientific Miracles of the Quran and Sunnah There are so many discoveries in different fields of sciences that occurred in the last two centuries by humans despite the Quran and Sunnah mentioning them more than fourteen centuries ago What are those discoveries and the fields that belonged to them What are the proofs that make them credible
