agencies which are co fabricated with social and cultural life This book features twelve chapters authored by key academics contributing to this growing field of research The book is divided into three sections including an Introduction by the editors and a foreword by Prof Philip E Steinberg the leading scholar in the field of maritime geographies The first section of the book considers the ways in which different watery spaces from the Atlantic Ocean to the Mediterranean Sea have been conceptualized theorized and known through metaphors voyages of discovery and scientific endeavour The second section examines how oceans are experienced through various activities including driving on water kayaking in water and diving under water The final section explores the relations between human life and the nature of the sea as a material mobile and more than human spa
