leaders retired senior officials and NGO officials that can bring new ideas and new relationships to the official process of diplomacy Sadly those involved in official diplomacy often have little understanding of and appreciation for the complex and nuanced role that Track Two can play or for its limitations And many Track Two practitioners are often unaware of the realities and pressures of the policy and diplomatic worlds and not particularly adept at framing their efforts to make them accessible to hard pressed officials At the same time those interested in the academic study of Track Two sometimes fail to understand the realities faced by either set of practitioners A need therefore exists for a work to bridge the divides between these constituencies and between the different types of Track Two practice and this book crosses disciplines and traditions in order to do just that It explores the various dimensions and guises of Track Two the theory and practice of how they work and how both practitioners and academics could more profitably assess Track Two Overall it provides a comprehensive picture of the range of activities pursued under this title to provoke new thinking about how these activities relate to each other to official diplomacy and to academe This book will be a classic that defines the field of Track Two diplomacy an exemplary work Esra Cuhadar Bilkent University

How Knowledge Moves John Krige, 2019-01-25 Knowledge matters and states have a stake in managing its movement to protect a variety of local and national interests The view that knowledge circulates by itself in a flat world unimpeded by national boundaries is a myth The transnational movement of knowledge is a social accomplishment requiring negotiation accommodation and adaptation to the specificities of local contexts This volume of essays by historians of science and technology breaks the national framework in which histories are often written Instead How Knowledge Moves takes knowledge as its central object with the goal of unraveling the relationships among people ideas and things that arise when they cross national borders This specialized knowledge is located at multiple sites and moves across borders via a dazzling array of channels embedded in heads and hands in artifacts and in texts In the United States it shapes policies for visas export controls and nuclear weapons proliferation in Algeria it enhances the production of oranges by colonial settlers in Vietnam it facilitates the exploitation of a river delta In India it transforms modes of agricultural production It implants American values in Latin America By concentrating on the conditions that allow for knowledge movement these essays explore travel and exchange in face to face encounters and show how border crossings mobilize extensive bureaucratic technologies

Knowledge Regulation and National Security in Postwar America Mario Daniels, John Krige, 2022-04-25 The first historical study of export control regulations as a tool for the sharing and withholding of knowledge In this groundbreaking book Mario Daniels and John Krige set out to show the enormous political relevance that export control regulations have had for American debates about national security foreign policy and trade policy since 1945 Indeed they argue that from the 1940s to today the issue of how to control the transnational movement of information has been central to the thinking and actions of the guardians of the American national security state The expansion of control over knowledge and know how is apparent from the increasingly systematic inclusion of universities and

research institutions into a system that in the 1950s and 1960s mainly targeted business activities As this book vividly reveals classification was not the only and not even the most important regulatory instrument that came into being in the postwar era *Track Two Diplomacy and Jerusalem* Tom Najem, Michael James Molloy, Michael Dougall Bell, John Bell, 2017-02-03 *Track Two Diplomacy and Jerusalem* is the first in a series of three books which collectively present the work of the Jerusalem Old City Initiative or JOCI a major Canadian led Track Two diplomatic effort undertaken between 2003 and 2014 JOCI's raison d'être was to find sustainable governance solutions for the Old City of Jerusalem arguably the most sensitive and intractable of the final status issues dividing Palestinians and Israelis *Track Two Diplomacy and Jerusalem* includes a series of studies that place JOCI within its historical setting and explain the theoretical context of Track Two diplomacy The book then proceeds to present the Initiative's culminating documents which outline in detail its proposed Special Regime governance model Until now the proposals have remained unpublished and available only to a limited audience of key stakeholders Presenting the information in an accessible format this book will contribute positively to the wider conversation on Jerusalem especially with respect to the longstanding conflict over control and governance of this holy city It will therefore be of value to several audiences from the policy making community to the various traditions found in academia

Europe 1967 2009 documents how interacademy programs have played a significant role in establishing and maintaining American scientific contacts with colleagues in Eastern Europe prior to and following the lifting of the Iron Curtain The book also discusses the changing roles of the academies of the region and the changing nature of interacademy cooperation that has emerged since 1991 The countries of interest are Poland the Czech Republic Slovakia Hungary Romania Bulgaria the former German Democratic Republic and the countries that previously were united politically within the framework of the former Yugoslavia The book should be of interest to officials and specialists in both the United States and the countries of Eastern Europe who are actively engaged in promoting scientific cooperation through bilateral and other channels Also an emerging audience for this book is the growing group of analysts in the United States interested in science diplomacy involving U S cooperation with countries that have political agendas that differ in important respects from the objectives of U S policies

Freedom's Laboratory Audra J. Wolfe, 2020-08-04 The Cold War ended long ago but the language of science and freedom continues to shape public debates over the relationship between science and politics in the United States Scientists like to proclaim that science knows no borders Scientific researchers follow the evidence where it leads their conclusions free of prejudice or ideology But is that really the case In Freedom's Laboratory Audra J Wolfe shows how these ideas were tested to their limits in the high stakes propaganda battles of the Cold War Wolfe examines the role that scientists in concert with administrators and policymakers played in American cultural diplomacy after World War II During this period the engines of US propaganda promoted a vision of science that highlighted empiricism objectivity a commitment to pure research and internationalism Working both overtly and covertly wittingly and unwittingly with governmental and private organizations scientists attempted to decide what exactly they meant when they referred to scientific freedom or the US ideology More frequently however they defined American science merely as the opposite of Communist science Uncovering many startling episodes of the close relationship between the US government and private scientific groups Freedom's Laboratory is the first work to explore science's link to US propaganda and psychological warfare campaigns during the Cold War Closing in the present day with a discussion of the 2017 March for Science and the prospects for science and science diplomacy in the Trump era the book demonstrates the continued hold of Cold War thinking on ideas about science and politics in the United States
