Screens Of Power Ideology Domination And Resistance In Informational Society:

Screens of Power Timothy W. Luke, 1989 Explores how certain aspects of power work in contemporary information based societies North American Critical Theory After Postmodernism P. Nickel, 2012-08-21 In a series of interviews this book explores the formative experiences of a generation of critical theorists whose work originated in the midst of what has been called the postmodern turn including discussions of their views on the evolution of critical theory over the past 30 years and their assessment of contemporary politics **Getting Signed** David Arditi, 2020-09-28 Record contracts have been the goal of aspiring musicians but are they still important in the era of SoundCloud Musicians in the United States still seem to think so flocking to auditions for The Voice and Idol brands or paying to perform at record label showcases in the hopes of landing a deal The belief that signing a record contract will almost infallibly lead to some measure of success the ideology of getting signed as Arditi defines it is alive and well Though streaming social media and viral content have turned the recording industry upside down in one sense the record contract and its mythos still persist Getting Signed provides a critical analysis of musicians contract aspirations as a cultural phenomenon that reproduces modes of power and economic exploitation no matter how radical the route to contract Working at the intersection of Marxist sociology cultural sociology critical theory and media studies Arditi unfolds how the ideology of getting signed penetrated an industry created a mythos of guaranteed success and persists in an era when power is being redefined in the light of digital technologies **Spaces of Culture** Scott Lash, Mike Featherstone, 1999-03-28 In Spaces of Culture an international group of scholars examines the implications of questions such as What is culture What is the relationship between social structure and culture in a globalized and networked world Do critical perspectives still apply or does the speed and complexity of cultural production demand new forms of analysis They explore the key themes in social theory the nation state the city modernity and reflexivity post Fordism and the spatial logic of the informational city The contributors go on to analyze the public sphere questioning the reductive representation of technology as a form of instrumentality and demonstrating how new technologies can offer new spaces of culture This analysis International Handbook of Internet Research Jeremy Hunsinger, Lisbeth Kjastrup, Matthew Allen, 2010-06-17 Internet research spans many disciplines From the computer or information sciences through engineering and to social sciences humanities and the arts almost all of our disciplines have made contributions to internet research whether in the effort to understand the effect of the internet on their area of study or to investigate the social and political changes related to the internet or to design and develop software and hardware for the network The possibility and extent of contributions of internet research vary across disciplines as do the purposes methods and outcomes Even the epistemological underpinnings differ widely The internet then does not have a discipline of study for itself It is a field for research Baym 2005 an open environment that simultaneously supports many approaches and techniques not otherwise commensurable with each other There are of course some inhibitions that limit explorations in this field research ethics disciplinary conventions local

and national norms customs laws borders and so on Yet these limits on the internet as a field for research have not prevented the rapid expansion and exploration of the internet After nearly two decades of research and scholarship the limits are a positive contribution providing bases for discussion and interrogation of the contexts of our research making internet research better for all These limits challenges that constrain the theoretically limitless space for internet research create boundaries that give definition to the field and provide us with a particular topography that enables research and investigation

Agricultural Standards Jim Bingen, Lawrence Busch, 2006-03-08 Food and agricultural standards have recently risen to the top of both national and international agendas Popular concerns about the power of the World Trade Organization focus on the intertwined relationships between environmental protection labor and human rights and the standards used to produce and supply our food and fiber globally In the developing world agricultural grades and standards are an important part of the reconfiguration of roles and responsibilities between various public and private actors in market reform This original and informative collection of studies of agricultural standards in the modern economy addresses these and helps to define the scope of the emerging study of the politics of standards setting Following an overview essay dealing with the multiple ways of thinking about approaching and defining food and agricultural standards eleven case studies offer a rich body of evidence that assesses the processes dynamics and potential consequences of global agricultural standards For all interested in the strategic use of food and agricultural standards from those in national and international governmental agencies researchers and others in the academic and private sector to those in the private business sector this volume offers a broader perspective on and will serve as an important resource

Fast Families, Virtual Children Ben Agger, Beth Anne Shelton, 2016-01-20 The Internet cell phones and other technologies have changed the ways in which people conduct their family lives raise children and navigate the blurry boundary between work and home Private life is colonized by employers teachers corporations family time is taken up by work homework and shopping What it means to be parents and children has changed dramatically This book shows how the nurturance of family has increasingly become a willful radical idea in an era of pervasive technology The authors analyze important trends including the acceleration and attenuation of childhood and offer a children's bill of rights and accompanying parental responsibilities

The New Politics of Class Prof Klaus Eder, 1993-06-10 Are contemporary societies organized by class In recent years the apparent fragmentation of established class structures and the emergence of new social movements in particular the women's movement and environmentalism have altered the traditional expressions of class in society At the same time these changes have posed fundamental questions for the concept of class in sociology and political science In this major reassessment Klaus Eder offers a new perspective on the status of class in modernity Drawing on a critique of Bourdieu Touraine and Habermas he outlines a cultural conception of class as the basis for understanding contemporary societies His model reevaluates the role of the middle classes traditionally the crux of class analysis and links class to social theories of power and cultural capital The result is a cultural

theory of class which incorporates the changing forms of collective action and the new social movements of contemporary societies The Sociology of Disruption, Disaster and Social Change Hendrik Vollmer, 2013-04-18 In the wake of disruption and disaster cooperation among members of a collective is refocused on matters of status membership and the formation of coalitions In an important contribution to sociological theory Hendrik Vollmer emphasizes the processes through which disruptions not only affect but also transform social order Drawing on Erving Goffman's understanding of framing and the interaction order as well as from a range of insights from contemporary sociological theory and ethnographic historical and organizational research Vollmer addresses the dynamics of disaster and disaster response within the framework of a general theory of disruption and social order It is proposed that the adjustment of cooperation in favour of coalition forming strategies is robust in both informal and organized social settings and transcends the micro and macro approaches currently favoured by theorists Offering a systematic sociological analysis of the impact of disruptiveness this book investigates how punctuated cooperation precipitates social change Culture, Politics and Governing P. Nickel, 2015-02-10 Culture Politics and Governing The Contemporary Ascetics of Knowledge Production is a critical interdisciplinary approach to how the practices that govern the production of knowledge and culture have material consequences for how we experience everyday life
