Scripts And Literacy:

Scripts and Literacy Insup Taylor, David R. Olson, 1995 Literacy is a concern of all nations of the world whether they be classified as developed or undeveloped A person must be able to read and write in order to function adequately in society and reading and writing require a script But what kinds of scripts are in use today and how do they influence the acquisition use and spread of literacy Scripts and Literacy is the first book to systematically explore how the nature of a script affects how it is read and how one learns to read and write it It reveals the similarities underlying the world's scripts and the features that distinguish how they are read Scholars from different parts of the world describe several different scripts e.g Japanese Chinese Korean Indian Amerindian and how they are learned Research data and theories are presented This book should be of primary interest to educators and researchers in reading and writing around the world Script Effects as the Hidden Drive of the Mind, Cognition, and Culture Hye K. Pae, 2020-10-14 This open access volume reveals the hidden power of the script we read in and how it shapes and drives our minds ways of thinking and cultures Expanding on the Linguistic Relativity Hypothesis i.e. the idea that language affects the way we think this volume proposes the Script Relativity Hypothesis i.e. the idea that the script in which we read affects the way we think by offering a unique perspective on the effect of script alphabets morphosyllabaries or multi scripts on our attention perception and problem solving Once we become literate fundamental changes occur in our brain circuitry to accommodate the new demand for resources The powerful effects of literacy have been demonstrated by research on literate versus illiterate individuals as well as cross scriptal transfer indicating that literate brain networks function differently depending on the script being read This book identifies the locus of differences between the Chinese Japanese and Koreans and between the East and the West as the neural underpinnings of literacy To support the Script Relativity Hypothesis it reviews a vast corpus of empirical studies including anthropological accounts of human civilization social psychology cognitive psychology neuropsychology applied linguistics second language studies and cross cultural communication It also discusses the impact of reading from screens in the digital age as well as the impact of bi script or multi script use which is a growing trend around the globe As a result our minds ways of thinking and cultures are now growing closer together not farther apart **21st Century Literacy** Renita Schmidt, Paul Lee Thomas, 2008-11-09 Renita Schmidt and P L Thomas The guiding mission of the teacher education program in the university where we teach is to create teachers who are scholars and leaders While the intent of that mission is basically sound in theory we instill the idea that teachers at all levels are professionals always learning and growing in knowledge that theory that philosophical underpinning does not insure that the students who complete our program are confident about the act or performance of teaching In our unique program students work closely with one teacher and classroom for the entire senior year and then are supervised and mentored during their first semester of teaching the program is heavily field based and it depends on the effectiveness of mentoring throughout the methods coursework and the

first semester of full time teaching Students tell us this guidance and support is invaluable and yet we feel the disjuncture between university and school just as many of you in more traditional student teaching settings Students hear best practice information from us in methods classes and they receive ample exposure to the research supporting our field but have a hard time implementing research based practices in their cla room settings and an even harder time finding it in the classrooms around them

Ancient Scripts and Phonological Knowledge D. Gary Miller,1994-09-06 This study investigates the properties of several ancient syllabic and linear segmental scripts to make explicit the aspects of linguistic knowledge they attempt to represent Some recent experimental work suggests that nonliterate speakers do not have segmental knowledge and that only syllabic knowledge is real or accessible whence the ubiquity of syllabaries Miller disputes this by showing that such tests do not distinguish relevant types of knowledge and that linguistic analysis of the ordering and writing conventions of early Western scripts corroborates the evidence from language acquisition use and change for segment awareness By coding segments the ancient syllabaries represented more phonological knowledge than the alphabet which was a poor compromise between the vowelless West Semitic scripts and the vowel redundant syllabic scripts A wide range of information about early scripts and their development is combined with a new theory of the syllable as Sonority Phrase The book s value is further enhanced by thorough discussion of the issues from a broad range of theoretical and applied viewpoints including language play and change cognition literacy and cultural history
