series of International Conferences on Advanced Information System Engineering This edition continued the success of previous conferences a success largely due to that fact that since its first edition this series has evolved in parallel with the evolution of the importance of information systems in economic development CAiSE has been able to follow and often to anticipate important changes that have occurred since 1978 when the first CAiSE conference was organized by Arne S. Iyberg and Janis Bubenko In all these years modern businesses and IT systems have been facing an ever more complex environment characterized by openness variety and change Furthermore enterprises are experiencing ever more variety in their business in many dimensions In the same way the explosion of information technologies is overwhelming with a multitude of languages platforms devices standards and products Thus enterprises need to manage an environment to monitor the interplay of changes in the business processes in information technologies and at the ontological level in order to achieve a sustainable development of their information systems Enterprises must enter the era of sustainable information systems to face the important developmental challenges During all these years CAiSE researchers have been challenged by all these changes and the CAiSE conferences provide a forum for presenting and debating important scientific results In fact CAiSE is positioned at the core of these tumultuous processes hosting new emerging ideas fostering innovative processes of design and evaluation developing new information technologies adapted to information systems creating new kinds of models but always being subject to rigorous scientific selection
