Service Industry Growth Causes And Effects:

Service Industry Growth Herbert G. Grubel, Michael Walker, 1989 From the back cover Is the growth of the service sector a menace or a bounty Will our society degenerate into two solitudes the high skilled rich and the low skilled poor How can an export driven economy like Canada survive the growth of the service sector What should governments do to encourage or discourage service growth Service Industry Growth addresses these paradoxes and provides a summary of the most complete and far reaching research project ever conducted on the economics of the service sector *Services In World Economic Growth* Herbert Giersch, 2019-06-04 This volume is the outcome of the 19th Kiel Week Conference held at the Institute of World Economics 22-24 June 1988 It contains the revised versions of the papers and comments submitted after discussion

The Development of Service Economy Zhenhua Zhou, 2015-10-26 This book focuses on service economy development particularly on how an industrial economy evolves into a service economy The book is organized in three sections The first theoretically answers the general question what is the service economy The second explains the mechanism of the service economy's formation and development revealing the evolution trends and attempts to answer the question where does the service economy come from The third section includes an in depth analysis of Chinese case studies to answer the key question how can the service economy development be promoted Readers will discover what the service economy is and how it relates to and differs from the industrial economy More importantly it will provide policy makers with suggestions for how to promote service economy development

The Service Sector: Productivity and Growth Ernesto Felli, Furio C. Rosati, Giovanni Tria, 2012-12-06 The economics of the service sector has recently attracted a large attention At a macroeconomic level the discussion has been focused on the issues concerning the relationship between the expansion of the service industry and the potential for a stable and sustained growth Slow productivity growth due to the largely non tradable nature of the output lack of competition due either to regulations or to barriers to entry are among the bads sometimes associated with a service led growth On the other hand new working places are created in the service industries at a rate much higher than in the industrial ones Is a lower rate of technological change and the continuing of inflationary tensions the price to pay for a sustained expansion of employment in the service sector These are in a nutshell the questions that led CEIS Centre for International Studies on Economic Growth University of Rome Tor Vergata to organize the International Seminar on The Service Sector Productivity and Growth held in Rome in May 1993 whose revised proceedings are published in this volume The economists and academicians invited to the conference have faced the issues mentioned above from different perspectives but they concentrated especially on the problems relative to growth and productivity
