of the Expression Language EL incorporated into JSP 2.0 the JSTL 1.1 tag libraries and the new function library the new tag file format that enables custom tag library development without Java code the simplified Java tag library API improvements in the JSP XML syntax and more. Further it details setup of the Apache Tomcat server JSP and JSTL syntax and features error handling and debugging authentication and personalization database access XML processing and internationalization. This book recognizes the different needs of the two groups of professionals who want to learn JSP: page authors interested in using JSP elements in web pages and programmers concerned with learning the JSP API and using JSP effectively as a part of an enterprise application. If you're in the first group you'll learn from the practical web application examples in the second part of the book. If you're in the latter group you'll appreciate the detailed coverage of advanced topics in the third part such as how to integrate servlets and JavaBeans components with JSP using the popular Apache Struts MVC framework and how to develop custom tag libraries using the JSP API with realistic examples that you can use as a springboard for your own libraries.

Hans Bergsten a JSP expert group veteran and one of our most active contributors has thoroughly and accurately captured the new features of JSP 2.0 and JSTL 1.1 in a way that is well organized and easy to understand. With excellent to the point examples this book is a must have for any serious JSP 2.0 developer. Mark Roth JSP 2.0 Specification Lead Sun Microsystems Inc. Hans Bergsten is the founder of Gefion Software a company focused on Java services and products based on J2EE technologies. Hans has been an active participant in the working groups for both the servlet and JSP specifications since their inception and contributes to other related JCP specifications such as JSP Standard Tag Library JSTL and JavaServer Faces JSF and as one of the initial members of the Apache Jakarta Project Management Committee helped develop the Apache Tomcat reference implementation for the servlet and JSP specifications.

Oracle Database Programming using Java and Web Services Kuassi Mensah, 2011-04-08. The traditional division of labor between the database which only stores and manages SQL and XML data for fast easy data search and retrieval and the application server which runs application or business logic and presentation logic is obsolete. Although the book's primary focus is on programming the Oracle Database the concepts and techniques provided apply to most RDBMS that support Java including Oracle DB2 Sybase MySQL and PostgreSQL. This is the first book to cover new Java JDBC SQLJ JPublisher and Web Services features in Oracle Database 10g Release 2 the coverage starts with Oracle 9i Release 2. This book is a must read for database developers audience DBAs database applications developers data architects Java developers JDBC SQLJ J2EE and OR Mapping frameworks and to the emerging Web Services assemblers. Describes pragmatic solutions advanced database applications as well as provision of a wealth of code samples. Addresses programming models which run within the database as well as programming models which run in middle tier or client tier against the database. Discusses languages for stored procedures when to use proprietary languages such as PL SQL and when to use standard languages such as Java also running non Java scripting languages in the database. Describes the Java runtime in the Oracle database 10g i.e. OracleJVM its architecture.
