Set in Stone Kenneth Shefsiek, 2017-02-23 Challenges the belief that the Walloons and the Dutch of the Hudson Valley were cultural preservationists who resisted English culture In 1678 seven French speaking Protestant families established the village of New Paltz in the Hudson River Valley of New York Life on the edge of European settlement presented many challenges but a particular challenge for these ethnic Walloon families originally from the southern Spanish Netherlands was that they lived in a Dutch cultural region in an English colony In *Set in Stone* Kenneth Shefsiek explores how the founders and their descendants reacted to and perpetuated this multiethnic cultural environment for generations As the founding families controlled their town economically and politically they creatively and selectively blended the cultures available to them They allowed their Walloon culture to slip away early in the village s history but they continued to combine Dutch and English cultures for more than 150 years When they finally abandoned the last vestiges of Dutch culture in the early nineteenth century they did so just as descendants of English colonists began to claim that the national commitment to liberty and freedom was grounded in the nation s English heritage Not willing to be marginalized descendants of the New Paltz Walloons constructed an alternative national narrative placing their ancestors at the very center of the American story Kenneth Shefsiek demonstrates that he has a keen eye for detail and this careful attention to the small things helps bring New Paltz s past to life The book paints a surprising picture of one of the most intriguing communities in early America Andrew Lipman author of *The Saltwater Frontier Indians and the Contest for the American Coast* Set in Stone? economies and the technological catalyst can partially dematerialize growth it is unrealistic to separate growth from its basic food. And even if the fossil energies share oil gas coal will lose a few percent to nuclear and renewable energies over the next decades all the indicators point to a world mix in which the fossil energy share will still top 75% by 2035. Driven by growth in emerging countries the demand for oil and gas will continue to grow steadily. Even if there are enough oil and gas reserves to see us through the next three decades will the industry be able to exploit and produce new resources that are increasingly complex to develop at a sufficient rate and which are often located in politically unstable countries. Not to mention the added challenge of the growing numbers of stakeholders who are increasingly insistent on industrial safety environment and societal issues. In particular will non conventional resources whose production growth could defer the oil gas peaks by several decades be able to withstand political and environmental lobbies. The evolution of oil gas landscape over the past few years reveals a disturbing increase in the time required to develop large new fields and an accelerated decline of the production base due to the ageing of most of the mature field facilities. This book aims to analyze all the critical factors technical political economic social and human that could potentially accelerate or delay the maintenance and redevelopment of mature producing fields as well as the discovery and development of new conventional and unconventional resources. Insofar as in 2035 oil and gas still account for more than half of the world primary energy consumption the appropriate management of these critical factors is crucial to ensuring at least in the medium term the Grail of Growth. However the hope of achieving the 450 ppm targets of Copenhagen has been shattered bad news for the human population which is becoming more concerned with ensuring its short term growth than with its long term survival. Our energy future is not set in stone.

Contents 1 The food of growth 2 Limiting the decline of the basement 3 The increasing complexity of new developments 4 Reaching excellence in safety 5 Obtaining an environmental and social license to operate 6 The Energy of the Energy 7 Our energy future is not set in stone
