Valdez, Nicholas P. Dunning**

## **Settlement And Politics In Three Classic Maya Polities:**

*Settlement and Politics in Three Classic Maya Polities* Olivier De Montmollin, 1995 Original survey research in the Greater Rosario Valley provides the background to this comparative study of three Maya polities Rosario Ojo de Agua and Los Encuentros Comparison of these three adjoining states is made with reference to multiple features including civic hierarchies territorial divisions political boundaries capitals civic plaza layouts residential compositions population distributions civic distributions and government sizes Because these three polities are outside the most heavily urbanised areas of Maya settlement the role of peripheries is a central theme in this book which makes advances in the understanding of political centralization pyramidal vs hierarchical regimes and the integration of diverse populations divided by status and ethnicity

*The Archaeology of Political Structure* Olivier de Montmollin, 2004-01-22 This innovative analysis of archaeological settlement patterns as a guide to ancient political structure focuses on the Maya of Southeastern Mexico Working principally with data from the Classic Period in the Rosario Valley Dr de Montmollin relates problem orientation and theory to themes with wide currency in political anthropology For archaeologists interested in complex societies the handling of the settlement evidence and the close attention paid to bridging arguments provide valuable guidance on analysing a multiscale settlement record when reconstructing political structure For Mayanists the characterization of settlement and political structure is unprecedented in its rigour and scope The Archaeology of Political Structure thus blends the particular fascination of Maya archaeology with developments of more general interest in anthropological archaeology to make a substantial contribution to the practice and theory of settlement studies within complex societies

*Classic Maya Polities of the Southern Lowlands* Damien B. Marken, James L. Fitzsimmons, 2015-11-21 Classic Maya Polities of the Southern Lowlands investigates Maya political and social structure in the southern lowlands assessing comparing and interpreting the wide variation in Classic period Maya polity and city composition development and integration Traditionally discussions of Classic Maya political organization have been dominated by the debate over whether Maya polities were centralized or decentralized With new largely unpublished data from several recent archaeological projects this book examines the premises strengths and weaknesses of these two perspectives before moving beyond this long standing debate and into different territory The volume examines the articulations of the various social and spatial components of Maya polity the relationships strategies and practices that bound households communities institutions and dynasties into enduring or short lived political entities By emphasizing the internal negotiation of polity the contributions provide an important foundation for a more holistic understanding of how political organization functioned in the Classic period Contributors include Francisco Estrada Belli James L Fitzsimmons Sarah E Jackson Caleb Kestle Brigitte Kovacevich Allan Maca Damien B Marken James Meierhoff Timothy Murtha Cynthia Robin Alexandre Tokovinine and Andrew Wyatt

*Motul de San José* Antonia E Foias, Kitty F Emery, 2012-09-23 Scholars have long debated the nature of Maya political organization during the Classic period AD 250

950 Complex questions regarding political centralization economic change and the role of politics and economics in the rise and collapse of the civilization have been examined and reexamined from a variety of perspectives Antonia Foias and Kitty Emery have assembled a broad collection of essays all focused on a single polity that of Motul de San Jos By presenting a coherent interdisciplinary body of archaeological and environmental data the volume offers an intensely deep focused investigation of the various models of the ancient Maya political and economic systems Research conducted over six seasons of fieldwork reveals a more centralized political system than expected and uncovers the workings of the ancient economic structure The contributors offer new details concerning how involved royals and nonroyal elites were in the politics of nearby states as well as an extensive tribute system

*MAYA POLITICAL ORGANIZATION DURING THE TERMINAL CLASSIC PERIOD IN THE COCHUAH REGION, QUINTANA ROO, MEXICO, FROM THE PERSPECTIVE OF A SECONDARY SITE*

Tatiana Zelenetskaya Young, 2016 The dissertation examines the political organization of the ancient Maya during the Terminal Classic Period in the Cochuah Region of Quintana Roo It evaluates the architecture and site layout of the secondary sites of Sacalaca and San Felipe and tertiary and quaternary sites surrounding them in order to test political models Our understanding of the ancient Maya political organization largely comes from Classic Period hieroglyphic texts recorded by Maya kings on public monuments This reliance on only these kinds of data creates a limitation on the interpretation of political organization and does not address the local scale of political institution within Maya polities It also creates the illusion of a centralization of political organization and biases towards primary sites where hieroglyphic monuments are located The alternative data available for the evaluation of political organization are the regional settlement pattern individual site layouts and site architecture Certain types of architecture such as acropoli mortuary temples formal plazas and ballcourts are representative of the institutions of rulership permitting to determine the type of political organization The distribution of this architecture within the primary secondary tertiary and quaternary sites will correlate to respective political models Three models were chosen to be tested after reviewing the various models proposed for the political organization of the ancient Maya These models are Dynastic Kingship Mul Tepal and the Segmentary State The archaeological correlates of these models are identified and compared with the evidence provided by twenty sites in the Cochuah Region for both the early Terminal Classic Period the Florescent Phase and the late Terminal Classic Period the Post Florescent Phase The conclusion is made that during the Florescent Phase the political organization in the Cochuah Region was a Segmentary State In the Segmentary State the institution of rulership is found in sites occupying different levels in the settlement hierarchy Sacalaca and San Felipe and their satellites exhibit a duplication of the institutions of rulership on a smaller scale During the Post Florescent Phase data indicate the absence of authorities capable of providing order or enforcing laws and perhaps the absence of rulers during this time in the region This case study demonstrates that some types of political organizations would be only visible through examination of secondary sites and their satellites Also

this approach addresses the problem of relying on hieroglyphic texts and helps to overcome a bias of centralized political organization created by investigation limited to the primary centers      **Ancient Maya Political Dynamics** Antonia E. Foias, 2013-07-02 Foias argues that there is no single Maya political history but multiple histories no single Maya state but multiple polities that need to be understood at the level of the lived experience of individuals She explores the ways in which the dynamics of political power shaped the lives and landscape of the Maya and how this information can be used to look at other complex societies      **Heterarchy, Political Economy, and the Ancient Maya** Vernon L. Scarborough, Fred Valdez, Nicholas P. Dunning, 2003 In recent years the Three Rivers region of Belize and Guatemala has been the site of some of the most intensive archaeological research in the Maya Lowlands providing a wealth of regional data This volume brings together articles reporting on findings and interpretations of the Programme for Belize Archaeological Project that range over a 10 to 12 year period and that shed new light on how ecology economy and political order developed in the ancient past

**Classic Maya Provincial Politics** Lisa J. LeCount, Jason Yaeger, 2010-09-15 Most treatments of large Classic Maya sites such as Caracol and Tikal regard Maya political organization as highly centralized Because investigations have focused on civic buildings and elite palaces however a critical part of the picture of Classic Maya political organization has been missing The contributors to this volume chart the rise and fall of the Classic Maya center of Xunantunich paying special attention to its changing relationships with the communities that comprised its hinterlands They examine how the changing relationships between Xunantunich and the larger kingdom of Naranjo affected the local population the location of their farms and houses and the range of economic and subsistence activities in which both elites and commoners engaged They also examine the ways common people seized opportunities and met challenges offered by a changing political landscape The rich archaeological data in this book show that incorporating subject communities and people and keeping them incorporated was an on going challenge to ancient Maya rulers Until now archaeologists have lacked integrated regional data and a fine grained chronology in which to document short term shifts in site occupations subsistence strategies and other important practices of the daily life of the Maya This book provides a revised picture of Maya politics one of different ways of governing and alliance formation among dominant centers provincial polities and hinterland communities      **Classic Maya**

**Settlement and Politics in the Rosario Valley, Chiapas, Mexico** Olivier De Montmollin, 1991      **Ancient Maya Political Economies** Marilyn A. Masson, David A. Freidel, 2002 Ancient Maya Political Economies examines variation in systems of economic production and exchange and how these systems supported the power networks that integrated Maya society Using models originally developed by William L Rathje the authors explore core periphery relations the use of household analysis to reconstruct political economy and evidence for market development In doing so they challenge the conventional wisdom of decentralized Maya political authority and replace it with a more complex view of the political economic foundations of Maya civilization      *Maya settlement and its socio-political dimensions* Gordon R. Willey, 1999

**The Yalahau Regional Settlement Pattern Survey** Jeffrey Barron Glover, 2006      **CLASSIC MAYA SETTLEMENT AND POLITICS IN THE ROSARIO VALLEY, CHIAPAS, MEXICO. (VOLUMES I-III) (SURVEY, MESOAMERICA).** OLIVIER DE MONTMOLLIN, 1985 mechanical versus organic economic solidarity      *Motul de San José* Antonia E. Foias, Kitty F. Emery, 2012 This volume is the first of its kind A complex mosaic of how a relatively small Late Classic Maya polity was economically socially and politically organized A must read for all Maya scholars James F Garber editor of The Ancient Maya of the Belize Valley The editors have assembled a remarkable array of evidence including several innovative analytical methods The product is a synthetic model that will shape how we understand and study Classic Maya political economy for the next several decades Jason Yaeger editor of Classic Maya Provincial Politics Scholars have long debated the nature of Maya political organization during the Classic period AD 250 950 Complex questions regarding political centralization economic change and the role of politics and economics in the rise and collapse of the civilization have been examined and reexamined from a variety of perspectives Antonia Foias and Kitty Emery have assembled a broad collection of essays all focused on a single polity that of Motul de San Jose By presenting a coherent interdisciplinary body of archaeological and environmental data the volume offers an intensely deep focused investigation of the various models of the ancient Maya political and economic systems Research conducted over six seasons of fieldwork reveals a more centralized political system than expected and uncovers the workings of the ancient economic structure The contributors offer new details concerning how involved royals and nonroyal elites were in the politics of nearby states as well as an extensive tribute system Antonia E Foias is professor of anthropology at Williams College Kitty F Emery is associate curator of the Florida Museum of Natural History and associate professor at the University of Florida A volume in the series Maya Studies edited by Diane Z Chase and Arlen F Chase      **Emblem and State in the Classic Maya Lowlands** Joyce Marcus, 1976 Joyce Marcus reconstructs Classic Maya political organization through the use of evidence derived from epigraphy settlement pattern surveys and locational analysis This study describes the development of a four tiered settlement hierarchy and its subsequent collapse      **Lowland Maya Settlement Patterns** Wendy Ashmore, 1981      **Maya Settlement and Political Hierarchy in the Sibun River Valley, Belize, Central America** Ben Samuel Thomas, 2005      **The classic Maya secondary tier** Khristaan David Villela, 1993      Politics of the Maya Court Sarah E. Jackson, 2013      **Ancient Maya Settlement and the Alacranes Bajo** Gail A. Hammond, 2019
