**The Settlement of the American Continents** C. Michael Barton, 2004-10 When many scholars are asked about early human settlement in the Americas they might point to a handful of archaeological sites as evidence Yet the process was not a simple one and today there is no consistent argument favoring a particular scenario for the peopling of the New World This book approaches the human settlement of the Americas from a biogeographical perspective in order to provide a better understanding of the mechanisms and consequences of this unique event It considers many of the questions that continue to surround the peopling of the Western Hemisphere focusing not on sites dates and artifacts but rather on theories and models that attempt to explain how the colonization occurred Unlike other studies this book draws on a wide range of disciplines archaeology human genetics and osteology linguistics ethnology and ecology to present the big picture of this migration Its wide ranging content considers who the Pleistocene settlers were and where they came from their likely routes of migration and the ecological role of these pioneers and the consequences of colonization Comprehensive in both geographic and topical coverage the contributions include an explanation of how the first inhabitants could have spread across North America within several centuries the most comprehensive review of new mitochondrial DNA and Y chromosome data relating to the colonization and a critique of recent linguistic theories Although the authors lean toward a conservative rather than an extreme chronology this volume goes beyond the simplistic emphasis on dating that has dominated the debate so far to a concern with late Pleistocene forager adaptations and how foragers may have coped with a wide range of environmental and ecological factors It offers researchers in this exciting field the most complete summary of current knowledge and provides non specialists and general readers with new answers to the questions surrounding the origins of the first Americans **The**

**Conquest of the American Continent** Madison Grant, 2023-12-17 In *The Conquest of the American Continent* Madison Grant presents a meticulous examination of the interplay between race civilization and environmental factors in shaping American demographics and policy throughout history His literary style fuses empirical research with a passionate narrative reflecting the early 20th century discourse on eugenics and nationalism Grant's work must be contextualized within the socio political climate of Progressive Era America where themes of social Darwinism were gaining traction influencing public policy and societal attitudes towards immigration and race This book serves as both a historical account and a philosophical treatise challenging readers to consider the implications of territorial expansion on American identity and ethics Madison Grant 1865-1932 was an influential American conservationist and a key figure in the early eugenics movement His pedigree as a member of the elite and his experiences as a conservationist shaped his perspectives on race and biology prompting him to explore the implications of these ideas on the American landscape Grant's connections with prominent figures of his time provided him access to influential discussions about race which ultimately informed the controversial views espoused in this work For readers interested in the intersections of race history and American identity *The Conquest of the American*

**History of the United States, from the Discovery of the American Continent** George Bancroft, 1851 [History of the United States, from the Discovery of the American Continent, to the War of Independence](#) George Bancroft (Historian.), 1854 *Selling America* Christina A. Ziegler-McPherson, 2023 An in depth look at the motivating factors behind immigration to America from 1607 to 1914 including what attracted people to America who was trying to attract them and why Between 1820 and 1920 more than 33 million Europeans immigrated to the United States seeking the American Dream They came in response to an image of America as a land of opportunity and upward mobility sold to them by state governments railroads religious and philanthropic groups and other boosters But as historian Christina A Ziegler McPherson shows in *Selling America* Immigration Promotion and the Settlement of the American Continent 1607 1914 the desire to make and keep America a white man's country meant that only Northern Europeans would be recruited as settlers and future citizens while Africans Asians and other non whites would be either grudgingly tolerated as slaves or guest workers or excluded entirely The work reframes immigration policy as an extension of American labor policy and connects the removal of American Indians from their lands to the settlement of European immigrants across the North American continent The author contends that Western and Midwestern states with large American Indian Asian and or Mexican populations developed aggressive policies to promote immigration from Europe to help displace those peoples while Southern states sought to reduce their dependency upon black labor by doing the same Chapters highlight the promotional policies and migration demographics for each region of the United States
