Arbitration and Mediation in International Business Christian Bühring-Uhle, Lars Kirchhoff, Gabriele Scherer, 2006-01-01 Arbitration and mediation in international business was first published in 1996 and was one of the first comprehensive studies on the practice of

international business dispute resolution covering both international commercial arbitration and the so called alternative techniques such as mediation The book also provided an empirical analysis of how both arbitration and mediation are conducted in a crossborder context along with a normative guide to the relative costs and benefits of these two methods This second edition is not just an updated version of the first edition but a new book in itself Benefitting from the contributions of two co authors the work has been enhanced by discussions of innovative tools for making settlement negotiations more effective and by the in depth analysis of practical techniques to integrate mediation and arbitration in international business Also a comprehensive new empirical survey was conducted in order to capture new trends in this rapidly developing field The result is a must have resource for anyone having to deal with potential conflict in international business relationships

Nation-building and Identity Conflicts Ariel Hernandez, 2014-07-08 Ending identity conflicts through negotiated agreements is an intractable process that is embedded complexly in the nation building process Ariel Hernandez looks on the complexity of the nation building process in the Philippines and how its social and political context constrains the achievement of a peace agreement that would withhold new challenges as the process unfolds Mediation as one of the possible modes of intervention to resolve identity conflicts is taken as the self evident instrument to end the 40 year old conflict between the Filipino society at large and the Bangsamoro The analysis confirms that mediation and other types of intervention are contributing to the intractability of identity conflicts by bringing in further complexities in the negotiation process The conceptualization of stumbling blocks may provide knowledge based resources to develop strategies to facilitate the mediation process that allows negotiating parties to cope with the complexity of the bargaining table
