Seurat, Paintings and Drawings. Edited by Daniel Catton Rich. With an Essay on Seurat's Drawings by Robert L. Herbert. [Exhibition at the Art Institute of Chicago.] Art institute (Chicago, Ill.),1958 *Georges Seurat* Michelle Foa,2015-07-14 This revelatory study of Georges Seurat 1859 1891 explores the artist s profound interest in theories of visual perception and analyzes how they influenced his celebrated seascape urban and suburban scenes While Seurat is known for his innovative use of color theory to develop his pointillist technique this book is the first to underscore the centrality of diverse ideas about vision to his seascapes figural paintings and drawings Michelle Foa highlights the importance of the scientist Hermann von Helmholtz whose work on the physiology of vision directly shaped the artist s approach Foa contends that Seurat s body of work constitutes a far reaching investigation into various modes of visual engagement with the world and into the different states of mind that visual experiences can produce Foa s analysis also brings to light Seurat s sustained exploration of long standing and new forms of illusionism in art Beautifully illustrated with more than 140 paintings and drawings this book serves as an essential reference on Seurat **Nineteenth- and Twentieth-century European Drawings** Richard R. Rosen brings a new formal and conceptual rubric to the study of turn of the century modernism transforming our understanding of the era's canonical works. Butterfield Rosen analyzes a hitherto unexamined formal phenomenon in European art: how artists departed from conventions for posing the human figure that had long been standard. In the decades around 1900, artists working in different countries and across different media began to present human figures in strictly frontal, lateral, and dorsal postures. The effect, both archaic and modern, broke with the centuries-old tradition of rendering bodies in torsion with poses designed to simulate the human being's physical volume and capacity for autonomous thought and movement. This formal departure destabilized prevailing visual codes for signifying the existence of the inner life of the human subject. Exploring major works by Georges Seurat, Gustav Klimt, and the dancer and choreographer Vaslav Nijinsky, replete with new archival discoveries, *Modern Art and the Remaking of Human Disposition* combines intensive formal analysis with inquiries into the history of psychology and evolutionary biology. In doing so, it shows how modern understandings of human consciousness and the relation of mind to body were materialized in art through a new vocabulary of postures and poses.

Art Books Wolfgang M. Freitag, 1997. Expanded to twice as many entries as the 1985 edition and updated with new publications, new editions of previous entries, titles missed the first time around, more of the artists' own writings, and monographs that deal with significant aspects or portions of an artist's work, though not all of it. The listing is alphabetical by artist, and the index by author. The works cited include analytical and critical biographical and enumerative; their formats range from books and catalogues raisonnés to exhibition and auction sale catalogues. A selection of biographical dictionaries containing information on artists is arranged by country. Annotation copyrighted by Book News Inc., Portland, OR.

Neo-Impressionist Painters Russell T. Clement, Annick Houzé, 1999-09-30. This reference provides biographical, historical, and critical information on Neo-Impressionist painting and its most significant painters. Neo-Impressionism, also called Divisionism and Pointillism, was one of the most innovative and startling late 19th-century French avant-garde styles. Over 2,000 books, articles, manuscripts, and audiovisual materials, as well as chronologies, biographical sketches, and exhibition lists, are cited. Also provided are both primary and secondary bibliographies for each artist. Secondary bibliographies capture details about each artist's life and career, relationships with other artists, work in various media, iconography, critical reception, and interpretation, archival sources, and more. Art scholars will appreciate the comprehensive bibliographic research contained in this one volume. Entries on Neo-Impressionism in general, on exhibitions, and the primary and secondary bibliographies of artists follow an introduction about Neo-Impressionism and a Neo-Impressionism chronology that spans the years 1881 to 1905. An index of art works and an index of personal names complete the volume.

Seurat Hajo Düchting, Georges Seurat, 2000. Georges Seurat died in 1891, aged only 32, and yet in a career that lasted little more than a decade, he revolutionized technique in painting, spearheaded a new movement, Neo-Impressionism, and brought a degree of scientific rigour to his investigations of colour that would prove profoundly influential well into the 20th century. As a student

at the Ecole des Beaux Arts Seurat read Chevreul's 1839 book on the theory of colour and this along with his own analysis of Delacroix paintings and the aesthetic observations of scientist Charles Henry led him to formulate the concept of Divisionism. This was a method of painting around colour contrasts in which shade and tone are built up through dots of paint, pointillism, that emphasise the complex inter relation of light and shadow.
