Seven Theories Of Human Nature:

Seven Theories of Human Nature Leslie Stevenson, 1974
Stevenson, 1976 *Ten Theories of Human Nature* Leslie Stevenson, David L. Haberman, 1998 A superb introduction to the timeless struggle to understand human nature this book compresses into a small volume the essence of such thinkers as Karl Marx Sigmund Freud Jean Paul Sartre B F Skinner and Plato *Seven Theories of Human Nature: Christianity, Freud, Lorenz, Marx, Sartre, Skinner, Plato* Leslie Stevenson, 1987 **On Being a Person** Todd Speidell, 2002-12-02 From the Introduction The approach of this text will be multidisciplinary psychologists philosophers theologians and ethicists grappling with what it means to be a person This volume will not attempt to provide a comprehensive history of psychology but will instead focus on selected representatives of various paradigms of psychology from the first systematic psychologist Aristotle through psychology's development as an empirical science and to recent developments in family systems theory It will especially emphasize a social relational spiritual view of the self namely human relations to God and to others are essential to humanity [The Anatomy of Neo-Colonialism in Kenya](#) W. O. Maloba, 2017-08-29 The successor to Kenyatta and Britain An Account of Political Transformation 1929 1963 this book completes the first systematic political history of Jomo Kenyatta by examining the mechanisms of installing a neo colonial regime in Kenya and how such regimes were duplicated elsewhere in Africa It analyzes the nature and extent of the collaboration between Kenyatta Britain and Western intelligence services to install and protect his government in Kenya a collaboration which is linked to some of Kenya's most intractable political social and economic problems Drawing heavily on primary sources it examines the legacy of Kenyatta's regime and how this legacy is felt in Kenya today **Human Nature, Ritual, and History** Antonio S. Cua, 2005-03 In this volume distinguished philosopher Antonio S Cua offers a collection of original studies on Xunzi a leading classical Confucian thinker and on other aspects of Chinese philosophy **The Modern Liberal Theory of Man** Gerald F. Gaus, 2019-11-19 First published in 1983 The primary argument of this book is that there is a coherent tradition of liberal thinking that extends from L S Mill through liberals like T H Green Bernard Bosanquet L T Hobhouse and John Dewey to John Rawls The author places Rawls within a longstanding tradition of liberal thinking while also arguing that Green and Hobhouse are not simply of historical interest but represent genuine and interesting attempts to develop a modern liberal theory It is argued that modern liberal theory centres on a conception of human nature that modern liberals have sought to harmonise the pursuit of individuality with participation in social and communal life Although the book focuses on six modern liberals the discussion proceeds topically rather than according to author thus highlighting similarities and disagreements and providing a comprehensive study of modern liberalism **Who Do I Say That You Are?** William Schumacher, 2010-01-04 The question of what it means to be a human creature lies at the heart of contemporary wrestling with anthropology and especially anthropology from a theological perspective Through both historical and systematic engagement with the so called Finnish school of Tuomo Mannermaa this

study explores and assesses the anthropological dimension of their theology of theosis or deification Mannermaa initiated a minor revolution in Luther studies and in contemporary Lutheran theology by interpreting Luther's doctrine of justification to be a close analog to the Eastern Orthodox doctrine of theosis but his ecumenical interests led him to minimize or overlook key themes in Luther and sharp distinctions between Luther and Orthodox theologians Mannermaa's colleague Simo Peura then developed this thesis with specific reference to anthropology in a way reminiscent of the sixteenth century reformer Andreas Osiander On closer inspection the project of Mannermaa and his Finnish colleagues fails to understand adequately both Luther's sources and his own theological development In this study a theological anthropology which is more consistent with Luther's theology is developed an anthropology which is determined by God's address to his human creatures what God himself says we are and what he makes us by that word Such an answer to the anthropological question refuses to flee from creation but instead upholds the complex and paradoxical nature of human beings as creatures sinners and saints What it means to be human has become the major topic in theology philosophy and the social sciences in our time On the basis of Luther's understanding this study proposes a view of humanity in which God's word determines what human identity and human existence are The Creator's address to his creatures makes their existence possible and frees them to be human and nothing less Schumacher's proposal will command careful study and discussion throughout the world Robert A Kolb Concordia Seminary Saint Louis Missouri Schumacher provides the most comprehensive appraisal of the Finns to date He shows that Luther's is not an alternative view of divination to that of medieval theologians but a subversion of it No ontic category is as real or definitive of the sinful human as God's justifying word It is that word alone which imparts grace and new life Schumacher's work is required reading for any scholar of Reformation studies who wants to understand Luther on his own terms Mark C Mattes Grand View University Des Moines Iowa

conventional book It is designed to stimulate and challenge all people who are curious to find out about the world they inhabit and their place within it It does this by suggesting questions and lines of questioning on a wide range of topics The book does not provide answers or model arguments but prompts people to create their own questions and a reading log or journal To this end almost all questions have a list of books or articles to provide a starter for stimulating further reading Once you start you will be hooked Never stop questioning

Conservatism Ted Honderich,2005-01-20 This is a new edition of a classic work by one of the world s leading progressive political philosophers Ted Honderich examines ideology and reality in British and American politics in order to establish the true distinctions of conservatism Conservatives often claim to believe in reform but not change to rely on instinct rather than abstract theories So what is the conservative rationale Does conservatism have a philosophical founding principle that unifies it Ted Honderich s search for the fundamental principle of conservatism is an enlightening one He examines influential thinkers in the conservative tradition from Edmund Burke and Adam Smith to Michael Oakeshott and Robert Nozick He brings rigorous analytic philosophy to bear on the Republican party in the United States and the Conservative party and the New Labour party in Britain

Biopolitics and International Values Ralph Pettman,2016-07-01 Biopolitics and International Values Confucian Role Ethics Roger T Ames,2011-08-03 In this landmark work noted comparative philosopher Roger T Ames interprets how the classics of the Confucian canon portray the authentic ethical human being He argues that many distinguished commentators on Confucian ethics have explained the fundamental ideas and terms of this distinctively Chinese philosophy by superimposing Western concepts and categories effectively collapsing this rich tradition into a subcategory of virtue ethics Beginning by addressing the problem of responsible cultural comparisons Ames then formulates the interpretive context necessary to locate the texts within their own cultural ambiance Exploring the relational notion of person that grounds Confucian philosophy he pursues a nuanced understanding of the cluster of terms through which Confucian role ethics is expressed Drawing on Western and Chinese sources Ames provides a convincing argument that the only way to understand the Confucian vision of the consummate life is to take the tradition on its own terms

Sport and Physical Activity Earle F. Zeigler, 2011-07-14 I am not against sport and related physical activity What I am arguing is that employed properly and correctly exercise and sport as one of a number of vital social forces e g nationalism ecology could contribute to the improvement of the current situation in human health enormously Additionally in the case of related physical activity i e regular exercise or physical activity education in the developed world I believe humans are too often abusing it by first not understanding it and then by not using it more intelligently Ironically in the undeveloped world people often get too much exercise just to stay alive Moreover I believe that the active use of competitive sport worldwide to promote what have been called moral values traits or attributes leading to world peace and good will as opposed to so called socio instrumental values that often are overly self serving This would tend to create a social force of such strength and power that humankind might be helped as it confronts the social and physical devastation looming ahead At the very least I

believe such active promotion would delay to a considerable degree the onset of what is increasingly becoming a destructive societal situation
