**Learning to Live** James W.H. Sell, 2015-03-23 This is the story of my journey through the ordained ministry of the Episcopal Church Much to my surprise it was a life that suited my values and personality like no other It began when the American culture was fueled by the norms and standards of institutional religion in the late 1950s and early 1960s From the time of my ordination in 1969 up until the present moment we have watched international and American church worship life decline year after year Today almost all denominations and faiths are retracting into an uncertain future It can be argued that at the current rate of decline the entire religious enterprise in America has less than one hundred years of life remaining Somehow my life has run counter to the trends and demographic realities by which we have been surrounded I discovered solid spiritual values that gave my life a sense of abundance At the same time every church I was a part of grew and flourished So contrary to the cries of the legions of naysayers I am nothing if not hopeful To be a Christian is to live with a sense that resurrections are at the very core of every history I believe that in very real ways we are just getting ready to return to our most ancient roots where once again on the fragile edge of society we will become a steady pathway to an abundant life and ultimately the driving force for liberation and justice If you wish to learn more about this book and its author please visit [www.jameswhsell.com](http://www.jameswhsell.com)      **Exploding Stars, Dead Dinosaurs, and Zombies** Andrew Root, 2017-12-05 Many things threaten the faith of youth today but none more than science The commitments of science and Christianity seem to be at odds science makes truth claims based on experiments and proofs while religion asks for belief and trust But Andrew

Root demonstrates that in fact the two are not incompatible Root a renowned expert on adolescent spirituality shows how science overstates its claims on truth while faith often understates its own claims Both faith and science frame the experience and reality of teenagers and both have something valuable to offer as adolescents develop Drawing on a fictional account of a youth pastor and the various students he encounters Root paints a compelling picture of how faith can flourish even in our scientific age

Healing God's Earth S. Roy Kaufman,2013-08-02 Rural communities and traditional cultures throughout North America and around the world are being systematically dismantled by the forces of urban civilization It is no new phenomenon For over four millennia the powers of urban civilization have been playing God oppressing people and exploiting the earth This long history has brought us to the brink of disaster in the current economic ecological and energy crises confronting the dominant global culture This book reads the Bible through the lenses of rural communities The Bible has something to say about the origin and character of urban civilization and the dynamic of its relationship to rural communities Both Israel in the Old Testament and Jesus in the New Testament were engaged in the formation of rural communities of faith living as alternatives to the dominant cultures of the urban civilizations in which they lived It turns out that local face to face communities both rural and urban along with traditional cultures of all stripes are God s chosen instruments for the subversive nonviolent disarming of urban civilization and the healing of God s earth
