Fifty Key Thinkers on History Marnie Hughes-Warrington, 2014-09-04

Fifty Key Thinkers on History is an essential guide to the most influential historians, theorists and philosophers of history. The entries offer comprehensive coverage of the long history of historiography ranging from ancient China, Greece and Rome through the Middle Ages to the contemporary world. This third edition has been updated throughout and features new entries on Machiavelli, Ranajit Guha, William McNeil and Niall Ferguson. Other thinkers who are introduced include Herodotus, Bede, Ibn Khaldun, E. H. Carr, Fernand Braudel, Eric Hobsbawm, Michel Foucault, Edward Gibbon. Each clear and concise essay offers a brief biographical introduction, a summary and discussion of each thinker's approach to history and how others have engaged with it, a list of their major works and a list of resources for further study.

Rhetoric and the Writing of History, 400-1500 Matthew Kempshall, 2011-08-31. This book provides an analytical overview of the vast range of historiography which was produced in western Europe over a thousand year period between c. 400 and c. 1500. Concentrating on the general principles of classical rhetoric central to the language of this writing alongside the more familiar traditions of ancient history, biblical exegesis and patristic theology, this survey introduces the conceptual sophistication and semantic rigour with which medieval authors could approach their narratives of past and present events and the diversity of ends to which this history could then be put. By providing a close reading of some of the historians who put these linguistic principles and strategies into practice from Augustine and Orosius through Otto of Freising and William of Malmesbury to Machiavelli and Guicciardini, it traces and questions some of the key methodological changes that characterise the function and purpose of the western historiographical tradition in this formative period of its development.

A Critical Bibliography of French Literature V2 16th C, **Emotions in a Crusading Context, 1095-1291** Stephen J. Spencer, 2019. **Emotions in a Crusading Context** is the first book-length study of the emotional rhetoric of crusading. It investigates the ways in which a number of emotions and affective displays, primarily fear, anger and weeping, were understood, represented and utilised in twelfth and thirteenth century western narratives of the crusades, making use of a broad range of comparative material to gauge the distinctiveness of those texts: crusader letters, papal encyclicals, model sermons, chansons de geste, lyrics and an array of theological and philosophical treatises. In addition to charting continuities and changes over time in the emotional landscape of crusading, this study identifies the underlying influences which shaped how medieval authors represented and used emotions, analyzes the passions crusade participants were expected to embrace and reject and assesses whether the idea of crusading created a profoundly new set of attitudes towards emotions. **Emotions in a Crusading Context** calls on scholars of the crusades to reject the traditional methodological approach of taking the emotional descriptions embedded within historical narratives as straightforward reflections of protagonists' lived feelings and in so doing challenges the long historiographical tradition of

reconstructing participants beliefs and experiences from these texts Within the history of emotions Stephen J Spencer demonstrates that despite the ongoing drive to develop new methodologies for studying the emotional standards of the past typified by experiments in neurohistory the social constructionist or cultural historical approach still has much to offer the historian of medieval emotions Philippe de Commynes Irit Ruth Kleiman,2013-03-22 Philippe de Commynes a diplomat who specialized in clandestine operations served King Louis XI during his campaign to undermine aristocratic resistance and consolidate the sovereignty of the French throne He is credited with inventing the political memoir but his reminiscence has also been described as the confessions of a traitor Commynes had abandoned Louis rival the Burgundian duke Charles the Bold before joining forces with the king This study provides a literary re evaluation of Commynes text a perennial subject of scandal and fascination while questioning what the terms traitor or betrayed meant in the context of fifteenth century France Drawing on diplomatic letters and court transcripts Irit Kleiman examines the mutual connections between writing and betrayal in Commynes representation of Louis reign the relationship between the author and the king and the emergence of the memoir as an autobiographical genre This study significantly deepens our understanding of how historical narrative and diplomatic activities are intertwined in the work of this iconic iconoclastic figure Routledge Revivals: Medieval France (1995) William W. traditional ideals of kingship and ultimately redefined the theoretical and practical bases of medieval kingship This study of vernacular kings' lives illuminates the important role that literary works played in shaping ideas more traditionally discussed in legal historical or institutional terms Theorizing the Ideal Sovereign restores late medieval kings' lives to ethical and political conversations of which they were an integral part and revives the lively interaction between texts and readers that formed the basis for medieval reading experiences

Johann Sleidan and the Protestant Vision of History Alexandra Kess, 2017-03-02 One of the major challenges faced by the emergent Protestant faith was how to establish itself in a hitherto Catholic world A key way it found to achieve this was to create a common identity through the fashioning of history emphasising Protestantism's legitimacy and authority In this study the life and works of one of the earliest and most influential Protestant historians Johann Sleidan 1506-1556 are explored to reveal how history could be used to consolidate the new confession and the states which adopted it Sleidan was commissioned by leading intellectuals from the Schmalkadic League to write the official history of the German Protestant movement resulting in the publication in 1555 of *De statu religionis et reipublicae Carolo Quinto Caesare Commentarii* Overnight his work became the standard account of the early Reformation referenced by Catholics and Protestants alike in subsequent histories and polemical debates for the next three centuries Providing the first comprehensive account of Sleidan's life based almost entirely on primary sources this book offers a convincing background and context for his writings It also shows how Sleidan's political role as a diplomat impacted on his work as a historian and how in turn his monumental work influenced political debate in France and Germany As a moderate who sought to promote accommodation between the rival confessions Sleidan provides a fascinating subject of study for modern historians seeking to better understand the complex and multi-faceted nature of the early Reformation
