Sex Race And The Law Legislating For Equality:

Sex, race, and the law Jeanne Gregory, 1987 In the last two decades many countries have recognized the existence of widespread and persistent discrimination against women and racial minorities and have sought to reduce or eliminate discrimination through legislation In this book Jeanne Gregory examines the British experience in using the law to reduce inequality and assesses what has been done and can be achieved in this way In Britain the passing of the Sex Discrimination Act 1975 and the Race Relations Act 1976 gave victims of discrimination direct access to the tribunals and courts for the first time and created two new Commissions with wide ranging powers In assessing how far these laws have been successful Jeanne Gregory offers a clear forceful analysis of the issues and problems raised by equal rights legislation She concentrates on the key employment provisions and compares the British experience with that of equal rights legislation elsewhere particularly in the USA Among the issues explored are the procedural obstacles encountered by people attempting to use the law and the conflicts internal and external that have dogged the two Commissions charged with its implementation Consideration is given throughout to the steps needed to close the gap between the ostensible aims of equal rights legislation and its actual achievements This book will be essential reading for students of law and social policy as well as for professionals concerned with the implementation and effects of contemporary equal rights legislation

Legislating for Equality Talia Naamat, Dina Porat, Nina Osin, 2012-07-19 This publication consists of a comprehensive collection of all UN member states legislation on non discrimination protection of minorities prohibition of hate crimes and hate speech The book divided into four volumes provides a legal model for combating discrimination through national legislation

Systemic Discrimination in Employment and the Promotion of Ethnic Equality Ronald L. Craig, 2007 This book argues that traditional complaint based antidiscrimination laws are inherently inadequate to respond to systemic discrimination in employment It examines the mechanisms and characteristics of systemic discrimination and the shortcomings of complaint based laws Yet these characteristics can also inform employers and government authorities of the kinds of preventive action that help alleviate systemic discrimination at the workplace In its search for a rational government policy response to systemic discrimination the book evaluates selected legal regimes which impose proactive obligations on employers to promote equality at the workplace Proactive regimes are regulatory in nature rather than adjudicatory They induce employer compliance through technical assistance dialogue and regulatory pressure rather than court orders By examining the key elements of these regimes the author explains why some proactive regimes function better than others and why proactive regimes function better than complaint based laws in addressing systemic discrimination
