Adkins, Glenn Morrison, 1981 The Different Faces of Motherhood Beverly Birns, Dale Hay, 2013-06-29 The Different Faces of Motherhood began during a conversation between the two editors developmental psychologists who have spent our professional careers working with infants and very young children We are well aware of the importance of infants to their mothers and of mothers to their infants However we were particularly aware of the fact that whereas our knowledge about infants increases exponentially each decade our assumptions about mothers change relatively little We were concerned about the theories that underlie the advice given to mothers and also about the assumption that mothers appear to be generic More and more we have learned about individual differences in babies but not

more and more about individual differences in mothers Our second concern has been to expand our knowledge about mothers Our assumptions were few and our questions were many We believed that the experience of women would vary greatly both in outlook and in behavior depending on each woman s age marital status financial status ethnicity health education and work experience as well as a woman s own experience in her family origin and her relationship to her husband If we are to understand child development and believe that the early years are important in a child s life then it seems critical to examine our beliefs about mothers If we are to understand human development then being a mother is surely an important area of inquiry     Whitaker's Cumulative Book List ,1978
