Ideas, Qualities and Corpuscles Peter Alexander, 1985-05-09 This study presents a substantial and often radical reinterpretation of some of the central themes of Locke's thought Professor Alexander concentrates on the Essay Concerning Human Understanding and aims to restore that to its proper historical context In Part I he gives a clear exposition of some of the scientific theories of Robert Boyle which he argues heavily influenced Locke in employing similar concepts and terminology Against this background he goes on in Part II to provide an account of Locke's views on the external world and our knowledge of it He shows those views to be more consistent and plausible than is generally allowed demonstrating how they make sense and enable scientific explanations of nature In examining the views of Locke and Boyle together the book throws light both on the development of philosophy and the beginnings of modern science and in particular it makes a considerable and original contribution to our understanding of Locke's philosophy

Ideas, Interests and the Development of the European Banking Systems Florian Brugger, 2020-08-17 What are the grand dynamics that drive the history of economies The laws of supply demand most economists would argue For the history of European banking this book offers an alternative explanation Rather than market forces the coincidence and coalitions of charismatic ideas and powerful interests is what shaped banking in Europe In *Ideas Interests and the Development of the European Banking Systems* Florian Brugger traced decisive moments in the history of the European Banking Sector from the time of the Italian City States to the post World War I period he shows how coalitions of ideas and interests built the tracks along which the European Banking Sector developed Inspired by Max Weber he argues that economic organizations and institutions like the Banking Sector are embedded into three fundamental orders the economic the cultural and the political order Enforced and institutionalized by vested interests ideas of the cultural order legitimate and empower interests of the economic and political order What is more decisive moments were frequently characterized by coalitions of ideas and interests between parties that in normal times had nothing in common or were even confronting each other in a hostile way

Supreme Court Decision-Making Cornell W. Clayton, Howard Gillman, 1999 What influences

decisions of the U S Supreme Court For decades social scientists focused on the ideology of individual justices Supreme Court Decision Making moves beyond this focus by exploring how justices are influenced by the distinctive features of courts as institutions and their place in the political system Drawing on interpretive historical institutionalism as well as rational choice theory a group of leading scholars consider such factors as the influence of jurisprudence the unique characteristics of supreme courts the dynamics of coalition building and the effects of social movements The volume s distinguished contributors and broad range make it essential reading for those interested either in the Supreme Court or the nature of institutional politics Original essays contributed by Lawrence Baum Paul Brace Elizabeth Bussiere Cornell Clayton Sue Davis Charles Epp Lee Epstein Howard Gillman Melinda Gann Hall Ronald Kahn Jack Knight Forrest Maltzman David O Brien Jeffrey Segal Charles Sheldon James Spriggs II and Paul Wahlbeck Compassionate Moral Realism Colin Marshall,2018-05-12 Colin Marshall offers a ground up defense of objective morality drawing inspiration from a wide range of philosophers including John Locke Arthur Schopenhauer Iris Murdoch Nel Noddings and David Lewis Marshall s core claim is compassion is our capacity to perceive other creatures pains pleasures and desires Non compassionate people are therefore perceptually lacking regardless of how much factual knowledge they might have Marshall argues that people who do have this form of compassion thereby fit a familiar paradigm of moral goodness His argument involves the identification of an epistemic good which Marshall dubs being in touch To be in touch with some property of a thing requires experiencing it in a way that reveals that property that is experiencing it as it is in itself Only compassion Marshall argues lets us be in touch with others motivational mental properties This conclusion about compassion has two important metaethical consequences First it generates an answer to the question Why be moral which has been a central philosophical concern since Plato Second it provides the keystone for a novel form of moral realism This form of moral realism has a distinctive set of virtues it is anti relativist naturalist and able to identify a necessary connection between moral representation and motivation The view also implies that there is an epistemic asymmetry between virtuous and vicious agents according to which only morally good people can fully face reality *On Drawing and Painting* Denman Waldo Ross,1912 This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it This work is in the public domain in the United States of America and possibly other nations Within the United States you may freely copy and distribute this work as no entity individual or corporate has a copyright on the body of the work Scholars believe and we concur that this work is important enough to be preserved reproduced and made generally available to the public We appreciate your support of the preservation process and thank you for being an important part of keeping this knowledge alive and relevant
