Life of the World Richard Lydekker,1916 *Physical Geography* Mary Somerville,1851 *Barrier World* Louis Charbonneau,2014-03-13 Beneath their perfect society hides an ugly truth Clockworld s General Rules of Conduct the very foundations of order have kept its citizens productive compliant and radiantly healthy for generations There is no room for imperfection illness age injury are all dealt with the same way Reprocessing No one Reprocessed ever returns His whole life Technician Cory questioned Clockworld s beliefs and practices thoughts he usually kept to himself But when his friend Owen is suddenly Reprocessed for a minor injury Cory openly rebels against the Authority He s arrested and sentenced to three months of hard labor among Clockworld s slave class the Grayshirts Intellectuals weeded out early as likely revolutionaries the Grayshirts are separated from the rest of society Here though Cory s lost the privileges of the exerciser class he is unrestricted by the conventions of society and soon finds himself part of a secret revolution With his new allies Cory sets off to debunk Clockworld s obscure rules and look for Owen What they discover will shatter everything they know about Clockworld and their own existence No Place on Earth Louis Charbonneau,2014-04-28 Some men weren t born to follow

In the 23rd Century science s triumph in prolonging life comes at a terrible cost Widespread famine and overpopulation spurred the creation of the Leader Party a Malthusian inspired dictatorship that controls the world with a ceaseless grip Though a mysterious rebel group The Underground works to dismantle the police state they ve been dealt a potentially fatal blow a traitor has infiltrated their ranks Now the success of a crucial operation and perhaps the entire resistance lies in the hands of one captured rebel Petr Clayborne Raised by the state after his father was executed for treason Petr never loved the Leader Party But unlike his dad he didn t see any point in opposing it That all changed when he found out he and his wife Alda would soon have a son of their own Under the Population Code unsanctioned birth is a crime punishable by death for the parents and the child Captain Kurt Hartog the Population Control Corps most ruthless leader will stop at nothing to crush

The Underground His brutal interrogation threatens Petr's sanity and his life But Petr guards the rebellion's most powerful secret For the sake of humanity for the sake of his son he must be willing to do anything to protect it *Our Vanishing Wild Life* William Temple Hornaday, 1913 William Temple Hornaday was the Director of the New York Zoological Society and the nation's leading advocate of wildlife conservation in this era This unsparing manifesto was written to accompany Hornaday's launching of the Permanent Wildlife Protection Fund it is thus in the words of the historian Stephen Fox both a campaign tract and one of the first books wholly devoted to endangered wild animals John Muir and His Legacy The American Conservation Movement Boston Little Brown and Company 1981 p 149 It is also a landmark of conservation history which had a profound effect on the thought of Aldo Leopold among others The book surveys the history and causes of wildlife destruction in America and elsewhere and sets forth a lengthy program to ensure the protection of remaining wildlife for the future often in militant and moralistic terms The work also throws light on some of the complexities inherent in the conservation movement at this time for example Hornaday accepts the classification of certain bird and mammalian predators as noxious or vermin and appropriate for destruction pp 77 81 there is no criticism here of the massive campaign for the extermination of wolves and coyotes being sponsored at the time by the Bureau of Biological Survey On a more general level Hornaday's fulminations against Italian immigrants as incorrigible bird killers suggest a connection between nativism and conservationism while his excoriations of market hunters set forth a deeply rooted class bias shared by many leading conservationists *Building Object Categories in Developmental Time* Lisa Gershkoff-Stowe, David H. Rakison, 2005-05-06 This book covers a broad range of current research topics in category development Its aim is to understand the perceptual and cognitive mechanisms that underlie category formation and how they change in developmental time The chapters in this book are *A World History of Railway Cultures, 1830-1930* Matthew Esposito, 2021-08-29 *A World History of Railway Cultures 1830 1930* is the first collection of primary sources to historicize the cultural impact of railways on a global scale from their inception in Great Britain to the Great Depression Its dual purpose is to promote understanding of complex historical processes leading to globalization and generate interest in transnational and global comparative research on railways In four volumes organized by historical geography this scholarly collection gathers rare out of print published and unpublished materials from archival and digital repositories throughout the world It adopts a capsule approach that focuses on short selections of significant primary source content instead of redundant and irrelevant materials found in online data collections The current collection draws attention to railway cultures through railroad reports parliamentary papers government documents police reports public health records engineering reports technical papers medical surveys memoirs diaries travel narratives ethnographies newspaper articles editorials pamphlets broadsides paintings cartoons engravings photographs art ephemera and passages from novels and poetry collections that shed light on the cultural history of railways The editor's original essays and headnotes on the cultural

politics of railways introduce over 200 carefully selected primary sources Students and researchers come to understand railways not as applied technological impositions of industrial capitalism but powerful fluid and idiosyncratic historical constructs
