**Counterfactualism in the Fine Arts** Elke Reinhuber, 2022-10-14 Counterfactual thinking has become an established method to evaluate decisions in a range of disciplines including history psychology and literature Elke Reinhuber argues it also has valuable applications in the fine arts and popular media A fascination with the path not taken is a logical consequence of a world saturated with choices Art which provokes and explores these tendencies can help to recognise and contextualise the impulse to avoid or endlessly revisit individual or collective decisions Reinhuber describes the term in broad strokes through the disciplines to show how counterfactualism finds shape in contemporary art forms especially in photography film and immersive and interactive media art such as 360 content virtual reality and augmented reality She analyses the different stages of counterfactuals with examples where artists experience counterfactual thoughts in the process of art production explore these thoughts in their artwork and where the artwork itself evokes counterfactual thoughts in the audience A fascinating exploration for scholars and students of art media and the humanities and anybody else with an interest in choices the art of decisionmaking and counterfactualism [Oxford Dictionary of Quotations](#)

**Drift** Jeff Ferrell, 2018-03-16 This book was written late in the North American night with the rumbling thuds and booming train horns of the nearby rail yard echoing through my windows reminding me of the train hoppers and gutter punks out there rolling through the darkness In *Drift* Jeff Ferrell shows how dislocation and disorientation can become phenomena in their own right Examining the history of drifting he situates contemporary drift within today's economic legal and cultural dynamics He also highlights a distinctly North American form of drift that of the train hopping hobo by tracing the hobo's legal and political history and by detailing his own immersion in the world of contemporary train hoppers Along the way Ferrell sheds light on the ephemeral intensity of drifting communities and explores the contested politics of drift the strategies that legal authorities employ to control drifters in the interest of economic development the social and spatial dislocations that these strategies ironically exacerbate and the ways in which drifters create their own slippery forms of resistance Ferrell concludes that drift constitutes a necessary subject of social inquiry and a way of revitalizing social inquiry itself offering as it does new models for knowing and engaging with the contemporary world [Routledge International Handbook of Visual Criminology](#)

**The Violence of the Image** Liam Kennedy, Caitlin Patrick, 2020-09-13 Photography has visualized international relations and conflicts from the midnineteenth century onwards and continues to be an important medium in framing the worlds of distant suffering others Although photojournalism has been challenged in recent decades claims that it is dead are premature The

Violence of the Image examines the roles of image producers and the functions of photographic imagery in the documentation of wars violent conflicts and human rights issues tackling controversial ideas such as witnessing the making of appeals based on displays of human suffering and the much cited concept of compassion fatigue In the twenty first century the advent of digital photography camera phones and socialmedia platforms has altered the relationship between photographers the medium and the audience as well as contributing to an ongoing blurring of the boundaries between news and entertainment and professional and amateur journalism The Violence of the Image explores how new vernacular and artistic modes of photographic production articulate international friction This innovative timely book makes a major contribution to discussions about the power of the image in conflict *In/Visibility of Flight* Monika Mokre, Maria Six-Hohenbalken, 2024-03-04 In Visibility is unequally distributed in society and closely related to the distribution of power and privilege Using images and narratives to mobilize is part of political strategies The relationship of in visibility and migration is the guiding question for this edited volume The chapters discuss multidisciplinary perspectives and factors that contribute to the visibility of forced migration beyond a policy centered discourse They focus on the voices and agency of refugees in different countries and contexts By including research practical experiences and artistic methods the volume will be of interest to readers from different academic disciplines and the arts as well as to practitioners *Oxford Dictionary of Modern Quotations* Elizabeth Knowles, 2007-08-23 Containing more than 5 000 quotations from authors as diverse as Bertolt Brecht George W Bush Homer Simpson Carl Sagan William Shatner and Desmond Tutu the dictionary is organized alphabetically by author with generous cross referencing and keyword and thematic indexes This new edition features more than 500 new quotations and 187 new authors The book includes special sections featuring quotations from cartoons films political slogans famous last words misquotations official advice newspaper headlines and more *Framing Crime* Keith Hayward, the late Mike Presdee, 2010-07-02 In a world in which media images of crime and deviance proliferate where every facet of offending is reflected in a vast hall of mirrors Framing Crime Cultural Criminology and the Image makes sense of the increasingly blurred line between the real and the virtual Images of crime and crime control have become almost as real as crime and criminal justice itself The meaning of both crime and crime control now resides not solely in the essential and essentially false factuality of crime rates or arrest records but also in the contested processes of symbolic display cultural interpretation and representational negotiation It is essential then that criminologists are closely attuned to the various ways in which crime is imagined constructed and framed within modern society Framing Crime responds to this demand with a collection of papers aimed at helping the reader to understand the ways in which the contemporary story of crime is constructed and promulgated through the image It also provides the relevant analytical and research tools to unearth the hidden social and ideological concerns that frequently underpin images of crime violence and transgression Framing Crime will be of interest to students and academics in the fields of criminology crime and the media and sociology *The Cruel*

Radiance Susie Linfield, 2011-05-27 In *The Cruel Radiance* Susie Linfield challenges the idea that photographs of political violence exploit their subjects and pander to the voyeuristic tendencies of their viewers. Instead she argues passionately that looking at such images and learning to see the people in them is an ethically and politically necessary act that connects us to our modern history of violence and probes the human capacity for cruelty. Grappling with critics from Walter Benjamin and Bertolt Brecht to Susan Sontag and the postmoderns and analyzing photographs from such events as the Holocaust, China's Cultural Revolution and recent terrorist acts, Linfield explores the complex connection between photojournalism and the rise of human rights ideals. In the book's concluding section she examines the indispensable work of Robert Capa, James Nachtwey and Gilles Peress and asks how photography should respond to the increasingly nihilistic trajectory of modern warfare. A bracing and unsettling book, *The Cruel Radiance* convincingly demonstrates that if we hope to alleviate political violence we must first truly understand it and to do that we must begin to look.

U.S. Foreign Policy and the Other Michael Patrick Cullinane, David Ryan, 2014-11-01 John Quincy Adams warned Americans not to search abroad for monsters to destroy, yet such figures have frequently habituated the discourses of U.S. foreign policy. This collection of essays focuses on counter identities in American consciousness to explain how foreign policies and the discourse surrounding them develop. Whether it is the seemingly ubiquitous evil of Hitler during World War II or the more complicated perceptions of communism throughout the Cold War, these essays illuminate the cultural contexts that constructed rival identities. The authors challenge our understanding of others looking at early applications of the concept in the eighteenth century to recent twenty-first century conflicts, establishing how this phenomenon is central to decision making through centuries of conflict.

*Philosophy, Crime, and Criminology* Bruce A. Arrigo, Christopher R. Williams, 2010-10-01 *Philosophy, Crime, and Criminology* represents the first systematic attempt to unpack the philosophical foundations of crime in Western culture. Utilizing the insights of ontology, epistemology, aesthetics and ethics, contributors demonstrate how the reality of crime is informed by a number of implicit assumptions about the human condition and unstated values about civil society. Charting a provocative and original direction, editors Bruce A. Arrigo and Christopher R. Williams couple theoretically oriented chapters with those centered on application and case study. In doing so, they develop an insightful, sensible and accessible approach for a philosophical criminology in step with the political and economic challenges of the twenty-first century. Revealing the ways in which philosophical conceits inform prevailing conceptions of crime, *Philosophy, Crime, and Criminology* is required reading for any serious student or scholar concerned with crime and its impact on society and in our lives.

*Rituals of Mediation* François Debrix, Cynthia Weber, 2003 A timely consideration of the meaning of transnational cultural interactions today. In an era of increasing globalization, the cultural and the international

have borders as permeable as most nations and an understanding of one requires making sense of the other Foregrounding the role of mediation understood here as a site of representation transformation and pluralization the authors engage two specific questions How might we make theoretical and practical sense of transnational cultural interactions And how are we to understand the ways in which the sites of mediation represent transform and remediate internationals Accordingly the authors consider international issues like security development political activism and the war against terrorism through the lens of cultural practices such as traveling through airports exhibiting art and photography logging on to the Internet and spinning news stories
