**The Architecture of Story** Will Dunne, 2016-04-08 Together with The Dramatic Writer's Companion

Dunne's *The Architecture of Story* is part of the most thorough course in playwriting available in print. Art Borreca, head of Dramaturgy Program and co-head of Playwrights Workshop at the University of Iowa, says: "While successful plays tend to share certain storytelling elements, there is no single blueprint for how a play should be constructed. Instead, seasoned playwrights know how to select the right elements for their needs and organize them in a structure that best supports their particular story." Through his workshops and book *The Dramatic Writer's Companion*, Will Dunne has helped thousands of writers develop successful scripts. Now in *The Architecture of Story*, he helps writers master the building blocks of dramatic storytelling by analyzing a trio of award-winning contemporary American plays: *Doubt*, *A Parable* by John Patrick Shanley, *Topdog/Underdog* by Suzan-Lori Parks, and *The Clean House* by Sarah Ruhl. Dismantling the stories and examining key components from a technical perspective enables writers to approach their own work with an informed understanding of dramatic architecture. Each self-contained chapter focuses on one storytelling component, ranging from Title and Main Event to Emotional Environment and Crisis Decision. Dunne explores each component in detail, demonstrating how it has been successfully handled in each play and comparing and contrasting techniques. The chapters conclude with questions to help writers evaluate and improve their own scripts. The result is a nonlinear reference guide that lets writers work at their own pace and choose the topics that interest them as they develop new scripts. This flexible interactive structure is designed to meet the needs of writers at all stages of writing and at all levels of experience.

#### **Bowtie Methodology** Sasho

Andonov, 2017-10-23. Bow Tie Methodology (BTM) consists of two methods: Fault Tree Analysis (FTA) and Event Tree Analysis (ETA), which are connected by a single event. The methodology is holistic and provides the tools and pre-event analysis, which is also called the risk calculations, and post-event analysis, also called the risk mitigations, of quality and safety-related events. There are plenty of articles or chapters on this methodology; however, there is no book that covers everything in one place. The book is filled with examples taken from the aviation industry and elaborates theory implemented in practice, which gives quality and safety practitioners a guidance on how to use and apply BTM in practice.

#### **Critical Reading and Writing**

Andrew Goatly, 2013-09-27. *Critical Reading and Writing* is a fully introductory interactive textbook that explores the power relations at work in and behind the texts we encounter in our everyday lives. Using examples from numerous genres such as popular fiction, advertisements, and newspapers, this textbook examines the language choices a writer must make in structuring texts, representing the world, and positioning the reader. Assuming no prior knowledge of linguistics, *Critical Reading and Writing* offers guidance on how to read texts critically and how to develop effective writing skills. Features include activities in analysis, writing, and rewriting; an appendix of comments on activities; further reading sections at the end of each unit; a glossary of linguistics terms; suggestions for five extended writing projects. Written by an experienced teacher, *Critical Reading and Writing* has multidisciplinary appeal but will be particularly relevant for use on introductory English and Communications courses.

**Grounding in English and Arabic News Discourse** Esam N. Khalil, 2000-01-01 Grounding in English and Arabic News Discourse explores the discourse notion of grounding viz the foreground background structure and examines it in the various structures that occur in short news texts A text level approach to grounding and the differentiation between several core concepts relating to the various textual and non textual structures distinguish the book from other approaches in the field A corpus based analysis focuses on sentence initial expressions and examines the grounding signalling function of several markers in both English and Arabic The analysis captures constraints on the occurrence of particular markers and the extensive illustrative examples explain the strategies that writers employ to cope with problems of recasting grounding values in news texts The author also shows how the failure to signal appropriate grounding values is likewise associated with the failure to deliver the appropriate type of text Grounding is a relatively unexplored area of investigation in Arabic text linguistics and the study identifies a series of previously unrecognized language features highlighting the discourse pragmatic function that syntax serves The book will be invaluable to researchers and students of discourse pragmatics contrastive rhetoric and communication It will also be of interest to all those involved in translation and intercultural studies

*SignGram Blueprint* Josep Quer, Carlo Cecchetto, Caterina Donati, Carlo Geraci, Meltem Kelepir, Roland Pfau, Markus Steinbach, 2017-11-20 We gratefully acknowledge the financial support of COST European Cooperation in Science and Technology funded by the Horizon 2020 Framework Programme of the European Union Current grammatical knowledge about particular sign languages is fragmentary and of varying reliability and it appears scattered in scientific publications where the description is often intertwined with the analysis In general comprehensive grammars are a rarity The SignGram Blueprint is an innovative tool for the grammar writer a full fledged guide to describing all components of the grammars of sign languages in a thorough and systematic way and with the highest scientific standards The work builds on the existing knowledge in Descriptive Linguistics but also on the insights from Theoretical Linguistics It consists of two main parts running in parallel the Checklist with all the grammatical features and phenomena the grammar writer can address and the accompanying Manual with the relevant background information definitions methodological caveats representative examples tests pointers to elicitation materials and bibliographical references The areas covered are Phonology Morphology Lexicon Syntax and Meaning The Manual is endowed with hyperlinks that connect information across the work and with a pop up glossary The SignGram Blueprint will be a landmark for the description of sign language grammars in terms of quality and quantity

**Teaching and Learning in History** Ola Hallden, 2012-10-12 Research on history instruction and learning is emerging as an exciting new field of inquiry The editors prepared this volume because the field is at an important moment in its development a stage where there is research of sufficient depth and breadth to warrant a collection of representative pieces The field of research on history teaching and learning connects with both traditional research on social studies and with recent cognitive analyses

of domains such as mathematics and physics However the newer research goes beyond these activities as well Where traditional research approaches to social studies instruction and learning have focused on curriculum they have avoided the study of purely disciplinary features the textual components of history and the concomitant demands as well as the nature of various learners Where recent cognitive analyses of mathematics and physics have dealt with misconceptions and knowledge construction they have avoided topics such as perspective taking interpretation and rhetorical layerings The new work by contrast has been concerned with these issues as well as the careful analyses of the nature of historical tasks and the nature of disciplinary and instructional explanations The lines of research presented in these chapters are both compelling and diverse and include a range of topical questions such as What affects the quality of teaching How are historical documents interpreted in the writing of history How is history explained What are the classroom demands on an elementary school social studies teacher What does text accomplish or fail to accomplish in educational settings How do teachers think about particular topics for history teaching Although much of the research reflects a grounding in or the influence of cognitive psychology not all of it derives from that tradition Traditions of rhetoric curriculum analysis and developmental psychology are also woven throughout the chapters The editors envision this volume as a contribution to educational research in a subject matter and as a tool for practitioners concerned with the improvement of instruction in history They also anticipate that it will contribute to cognitive science

**Public Health Reports** ,1989      **Don't Bet the Farm** Liam

O'Brien,2014-09-01 The most comprehensive reference book on betting and gambling on the market with over 1200 cross referenced entries It explores the history systems theory law word origins and slang as well the scandals scams and the huge array of unforgettable characters and audacious coups      Spontaneous Spoken Language J. E. Miller,Regina Weinert,1998

Jim Miller and Regina Weinert investigate syntactic structure and the organization of discourse in spontaneous spoken language Using data from English German and Russian they develop a systematic analysis of spoken English and highlight properties that hold across languages The authors argue that the differences in syntax and the construction of discourse between spontaneous speech and written language bear on various areas of linguistic theory apart from having obvious implications for syntactic analysis In particular they bear on typology Chomskyan theories of first language acquisition and the perennial problem of language in education In current typological practice written and spontaneous spoken texts are often compared the authors show convincingly that typological research should compare like with like The consequences for Chomskyan and indeed all theories of first language acquisition flow from the central fact that children acquire spoken language but learn written language      News As Discourse Teun A. van Dijk,2013-10-28 First Published in 1990 This book presents a new interdisciplinary theory of news in the press Against the background of developments in discourse analysis it is argued that news should be studied primarily as a form of public discourse Whereas in much mass communication research the economic social or cultural dimensions of news and news media are addressed the present study emphasizes the

importance of an explicit structural analysis of news reports Such an analysis should provide a qualitative alternative to traditional methods of content analysis Also attention is paid to processes of news production by journalists and news comprehension by readers in terms of the social cognitions of news participants In this way news structures can also be explicitly linked to social practices and ideologies of news making and indirectly to the institutional and macro sociological contexts of the news media
