Hassan,1998 The Kenya Maize Data Base Project MDBP was established in 1992 with the help of the Rockefeller Foundation the International Maize and Wheat Improvement Center CIMMYT and the US Agency for International Development Successes in African Agriculture Hagblade, Steven,Hazell, Peter B. R.,2010-01-01 Sub Saharan Africa is one of the poorest regions of the world Because most Africans work in agriculture escaping such dire poverty depends on increased agricultural productivity to raise rural incomes lower food prices and stimulate growth in other economic sectors Per capita agricultural production in sub Saharan Africa has fallen however for much of the past half century Successes in African Agriculture investigates how to reverse this decline Instead of cataloging failures as many past studies have done this book identifies episodes of successful agricultural growth in Africa and identifies processes practices and policies for accelerated growth in the future The individual studies follow developments in among other areas the farming of maize in East and Southern Africa cassava across the middle belt of Africa cotton in West Africa horticulture in Kenya and dairying in East Africa Drawing on these case studies and on consultations with agricultural specialists and politicians from across sub Saharan Africa undertaken in collaboration with the African Union s New Partnership for Africa s Development the contributors identify two key determinants of positive agricultural performance agricultural research to provide more productive and sustainable technologies to farmers and a policy framework that fosters market incentives for increasing production The contributors discuss how the public and private

sectors can best coordinate the convergence of both factors Given current concerns about global food security this book provides timely and important resources to policymakers and development specialists concerned with reversing the negative trends in food insecurity and poverty in Africa

Maize Production Environments Revisited A. D. Hartkamp, 2001 This publication presents a GIS based approach for revising the definitions of global maize production environments called mega environments MEs used by CIMMYT and its partners A cluster analysis was performed on climate data representing a four month growing season for key maize producing locations Assuming rainfed production the onset of the growing season was determined based on the month when the ratio of precipitation over potential evapotranspiration exceeds 0.5 Diagnostic criteria for mapping MEs were based on cluster analysis results and expert knowledge The resulting maps can be used to select appropriate target environments for maize germplasm and trials as well as in priority setting and site selection for global maize breeding programs
