Politics Of Presence:

The Politics of Presence Anne Phillips, 1998-10-01 One of the most hotly contested debates in contemporary democracy revolves around issues of political presence and whether the fair representation of disadvantaged groups requires their presence in elected assemblies Representation as currently understood derives its legitimacy from a politics of ideas which considers accountability in relation to declared policies and programmes and makes it a matter of relative indifference who articulates political preferences or beliefs But what happens to the meaning of representation and accountability when we make the gender or ethnic composition of elected assemblies an additional area of concern In this innovative contribution to the theory of representation which draws on debates about gender quotas in Europe minority voting rights in the USA and the multi layered politics of inclusion in Canada Anne Phillips argues that the politics of ideas is an inadequate vehicle for dealing with political exclusion But rejecting any essentialist grounding to group identity or group interest she also argues against any either/or choice between ideas and political presence The politics of presence then combines with contemporary explorations of deliberative democracy to establish a different balance between accountability and autonomy Series description Oxford Political Theory presents the best new work in contemporary political theory It is intended to be broad in scope including original contributions to political philosophy and also work in applied political theory The series contains work of outstanding quality with no restriction as to approach or subject matter The series editors are David Miller and Alan Ryan the latest thoughtful contribution in Anne Phillip's ongoing enquiry into issues of equality gender and democracy an excellent contribution to democratic theory Political Studies

The Politics of Presence John G. Sabol Jr., 2008-08-27 A major focus of ghost excavation as opposed to ghost hunting is an archaeology of experience The emergence of this experience is unearthed through the investigative engagement of haunted space One aspect of this engagement is performance which requires a specific sociocultural and historical context of understanding This context of understanding must be understood in terms of layers of meaning Gettysburg is used as a specific example of the use of performative and dramatical activity Each of these activities performed at Gettysburg predisposes a genre a set of beliefs practices social relations manifestations and locations which together define categorically what it is that is manifesting on the battlefield and what interpretations are being used to understand these performative cultural practices The genres of performative action at Gettysburg are important because they are located at places on the battlefield where belief systems become mobilized into actual practice This book will explore various haunting uncertainties and cultural situations associated with ghostly activity and the implications of these performances as they are enacted by ghost hunters Civil War re-enactors the tourism industry and the ghosts themselves

The Politics of Presence Anne Phillips, 1995-10-05 Provides a ground breaking contribution to the widespread and controversial debate about how disadvantaged groups should be represented in politics One of the most hotly debated debates in contemporary democracy revolves around issues of political presence and whether the fair

representation of disadvantage groups requires their presence in elected assemblies Representation as currently understood derives its legitimacy from a politics of ideas which considers accountability in relation to declared policies and programmes and makes it a matter of relative indifference who articulates political preferences or beliefs What happens to the meaning of representation and accountability when we make the gender or ethnic composition of elected assemblies an additional area of concern In this innovative contribution to the theory of representation which draws on debates about gender quotas in Europe minority voting rights in the USA and the multi layered politics of inclusion in Canada Anne Phillips argues that the politics of ideas is an inadequate vehicle for dealing with political exclusion But eschewing any essentialist grounding the group identity or group interest she also argues against any either/or choice between ideas and political presence The politics of presence then combines with contemporary explorations of deliberative democracy to establish a different balance between accountability and autonomy

The Politics of Presence Anne Phillips,1998 **The Politics of Presence** Anne Phillips,1995 **The Politics of Becoming** Hans Asenbaum,2023 What roles do our identities play in democratic politics When we participate in citizens assemblies or in social movement gatherings we are judged by how we look which clothes we wear by our skin colour gender and body language Prejudice does not only lead to discrimination but also limits the freedom of expressing ourselves The Politics of Becoming explores radical democratic acts of disidentification to counter this problem Anonymity in masked protest pamphleteering street graffiti and online debate interrupts our everyday identities By concealing who we believe ourselves to be anonymity allows us to live our multiple selves In the digital age anonymity becomes an inherent part of everyday communication Through our smart devices we express our selves differently As cyborgs our identities are disrupted and reassembled We curate self representations on social media create avatars share selfies and choose the skin colour of our emojis To counter discrimination and express ourselves more freely in democratic spaces we need to embrace our inner multiplicity This argument does not break with the feminist politics of presence Claiming and reinterpreting marginalized identities is a crucial element of an emancipatory democratic strategy The Politics of becoming however re reads presence as the performative act of self creation Drawing on queer gender feminist and anarchist thinking this book argues for an interruption of the dominant order to engage in self transformation *Feminizing Politics* Joni Lovenduski,2005 This text offers an analysis of the changes in the political representation of women since the 1960s and draws on a wide range of material including interviews with women politicians policy advocates and academics

The Ashgate Research Companion to the Politics of Democratization in Europe José María Rosales,Professor Tuija Pulkkinen,Professor Kari Palonen,2013-03-28 Democratization is a concept often used in academic book titles yet not many of them deal with the initial breakthrough of democratization This research companion applies a comparative approach to analyzing debates in a number of countries It discusses the politics concepts and histories involved in European democratization as a complex of changes that has altered the conditions of political action and debate in the continent for the

past two centuries

Women's Representation in African Politics Zainab Monisola Olaitan, 2024-12-11 Does the election of more and more women into political offices mean that women's interests will be better protected This question forms the background upon which this book is written as it forms a timely intervention concerning the clamour for increased women's representation in African politics The book examines the relationship between gender quotas and gender focused legislative policy outcomes in the national Parliaments of South Africa and Botswana By investigating the utility of gender quotas to ensure the substantive representation of women in African politics the book engages the assumption that increased women's political participation will automatically improve the qualitative well being of African women The book is intended for both academic and non academic audiences with differing purposes It contributes to scholarly debates on the transcending relevance of quotas beyond numbers For non academics it provides opportunities to engage gender quotas as a policy tool to ensure the qualitative well being of African women

Politics of Inclusion Zoya Hasan, 2011-09-07 Post Mandar the demand for reservations by various groups has become a consistent feature of Indian politics Yet the focus remains on caste with little attention paid to the under representation of religious minorities in India The book takes up the case of relative disadvantage and interrogates the multiple and overlapping dimensions of deprivation Hasan argues that in view of the comparative evidence available presently excluded and disadvantaged groups should also qualify for affirmative action This book will interest students and scholars of Indian politics sociology and history
