Hughes, 2009-10-15 This guide offers parents fresh perspectives and simple skills to encourage good behavior in children and reduce stress for the entire family Emphasizing personal choice free will and dispassionate parent child interactions Dr William H Hughes s step by step approach has been developed tested and proven to work time and again by child psychiatrists Dr Hughes demonstrates how parents must allow their children to decide for themselves whether they will cooperate and how they will act Effective parenting builds character and increases self confidence Here kids learn that they can choose to behave and be rewarded for

it Dr Hughes recommends that parents Set expectations Make clear what the expected behavior is whether it s doing homework or taking out the trash Monitor behavior Keep an eye on what children are supposed to be doing but let them decide for themselves whether they will complete the task Reward Verbally praise good behavior and offer kids a reward Let them play video games for an hour or invite a friend to a sleepover Many parents are convinced that reward systems simply do not work Dr Hughes explains why his approach gets the desired results while other approaches do not By not engaging in power struggles and giving rewards only when expectations have been met parents teach their kids that in choosing good behavior they are choosing rewards and rewards will motivate kids to act better Dr Hughes also outlines a clear strategy for dealing with kids who just won t take no for an answer The book encourages parents to modify their own behavior teaching them to shift their focus away from battling with their kids and to use their energy to help their children develop winning habits and attitudes for life

How the Chicago School Overshot the Mark Robert Pitofsky,2008-10-14 How the Chicago School Overshot the Mark is about the rise and recent fall of American antitrust It is a collection of 15 essays almost all expressing a deep concern that conservative

economic analysis is leading judges and enforcement officials toward an approach that will ultimately harm consumer welfare For the past 40 years or so U S antitrust has been dominated intellectually by an unusually conservative style of economic analysis Its advocates often referred to as The Chicago School argue that the free market better than any unelected band of regulators can do a better job of achieving efficiency and encouraging innovation than intrusive regulation The cutting edge of Chicago School doctrine originated in academia and was popularized in books by brilliant and innovative law professors like Robert Bork and Richard Posner Oddly a response to that kind of conservative doctrine may be put together through collections of scores of articles but until now cannot be found in any one book This collection of essays is designed in part to remedy that situation The chapters in this book were written by academics former law enforcers private sector defense lawyers Republicans and Democrats representatives of the left right and center Virtually all agree that antitrust enforcement today is better as a result of conservative analysis but virtually all also agree that there have been examples of extreme interpretations and misinterpretations of conservative economic theory that have led American antitrust in the wrong direction The problem is not with conservative economic analysis but with those portions of that analysis that have overshot the mark producing an enforcement approach that is exceptionally generous to the private sector If the scores of practices that traditionally have been regarded as anticompetitive are ignored or not subjected to vigorous enforcement prices will be higher quality of products lower and innovation diminished In the end consumers will pay
