Raising Children In A Socially Toxic Environment:

Raising Children in a Socially Toxic Environment James Garbarino, 1995-08-01 **Raising Children in a Socially Toxic Environment** James Garbarino, 1999-08-31 Discusses how children are suffering from the violence drugs poverty and abuse afflicting society today and how parents and other adults can combat those influences **Lost Boys** James Garbarino, 2000-08-15 Remarkable What sets *Lost Boys* apart from the ordinary lament is the author's palpable sense of care and compassion The Washington Post Book World Our national consciousness has been altered by haunting images of mass slaughters in American high schools carried out by troubled young boys with guns It's now clear that no matter where we live or how hard we try as parents our children are likely to be going to school with boys who are capable of getting guns and pulling triggers What has caused teen violence to spread from the urban war zones of large cities right into the country's heartland And what can we do to stop this terrifying trend James Garbarino Ph D Cornell University professor and nationally noted psychologist insists that there are things that we both as individuals and as a society can do In a richly anecdotal style he outlines warning signs that parents and teachers can recognize and suggests steps that can be taken to turn angry and unhappy boys away from violent action Full of insight vivid individual portraits practical advice and considered hope this is one of the most important and original books ever written about boys *Handbook of Early Childhood Intervention* Jack P. Shonkoff, Samuel J. Meisels, 2000-05-22 Eighteen new chapters have been added to the 2000 edition of this valuable Handbook which serves as a core text for students and experienced professionals who are interested in the health and well being of young children It serves as a comprehensive reference for graduate students advanced trainees service providers and policy makers in such diverse fields as child care early childhood education child health and early intervention programs for children with developmental disabilities and children in high risk environments This book will be of interest to a broad range of disciplines including psychology child development early childhood education social work pediatrics nursing child psychiatry physical and occupational therapy speech and language pathology and social policy A scholarly overview of the underlying knowledge base and practice of early childhood intervention it is unique in its balance between breadth and depth and its integration of the multiple dimensions of the field *The Ethics of Interpersonal Relationships* Joyce Catlett, Robert W. Firestone, 2018-03-28 Writing this book springs from a deep feeling for people and a grave concern that without a proper understanding of the reasons for their inhumanity in relation to one another and the development of a compassionate world view it is likely that human beings may eventually destroy themselves and life on the planet This work is an attempt to explain the source of destructive behaviour and how it manifests itself in personal relationships between men women couples and families and in the social arena The author presents a position that offers a hope of altering the destiny of humankind's unethical behavior through better psychological understanding and education Understanding the source of a person's aggressiveness in defending the fantasy bond and learning to cope with the voice process have strong implications for child

rearing and better mental health practices *The Cost of Being Undocumented* Alix Dick, Antero Garcia, 2025-06-17 An undocumented activist and a social scientist come together to tally of the structural costs of undocumented life An inhumane math pervades this country even as our government extracts labor and often taxes from undocumented workers it excludes these same workers from its social safety net As a result these essential workers struggle to get their own basic needs met from healthcare to education from freedom of association to the ability to drive to work without looking for ICE in the rearview mirror When Alix Dick s family found themselves in the crosshairs of cartel violence in Sinaloa Mexico she and her siblings were forced to flee to the U S Many of the scenes that she shares are difficult and unforgettable escaping from a relationship in which her partner threatened to report her to immigration getting root canals done in an underground dental clinic But there are moments of triumph too founding her own nonprofit working on films that tell important stories and working with her co author Dr Garcia to tell her story in a framework that lays bare the realities of structural oppression As Alix and Antero tally the costs of undocumented life they present a final bill of what is owed to the immigrant community In this way their book flips the traditional narrative about the economics of immigration on its head *Kids of Character* Robert V. Heckel, David M. Shumaker, 2007-03-30 When psychologists Shumaker and Heckel wrote their earlier book on Children Who Murder it became clear to them that society specifically a significant portion of its young members is in crisis Focused on this crisis these authors found an everyday issue that makes life more challenging for parents who are trying to raise kids of good character The issue is this There are extensive differences now in the family the school environment the community and even religious institutions compared to previous generations For example families of today rarely have a coherent extended family And by far in most regions dual working parents are common as are single parents and stepfamilies Church activities events and agents are not as evident in the community as they were in the past Schools under increasing demand for testing and measurement take less time to devote to issues of character Altogether the changes are significant and can leave parents searching for ways to instill character in their kids Shumaker and Heckel spotlight these historical changes and also ways parents today are succeeding in creating kids of character nonetheless When authors Shumaker and Heckel wrote their earlier book on Children Who Murder it became clear to them that society specifically a significant portion of its young members is in crisis Focused on this crisis these authors found an everyday issue that makes life more challenging for parents trying to raise kids of character The challenge is this there are extensive differences now in the family the school environment the community and even religious institutions compared to previous generations For example families of today rarely have a coherent extended family Dual working parents are common Church activities events and agents are not nearly as evident in the community as they were in the past And schools under increasing demand for testing and measurement devote far less time to issues of character than they did in the past Altogether the changes are significant and can leave parents at a loss for how to best develop character in their kids Shumaker and Heckel show us how some

parents are creatively handling this challenge The authors do not argue that most American kids are out of hand cruel or immoral They are neither cynics nor prophets of doom What they do see is a disappearance of supports for parents making the adults job more demanding Yet they pinpoint ways some parents are succeeding in this new millennium This book begins by explaining the basics of moral development in children reviewing recent research findings If offers parents teachers professors administrators clergy and legislators helpful tools to promote character Child Welfare Kathleen Kufeldt,Brad McKenzie,2011-07-22 Children who receive child welfare services are a vulnerable group and their numbers are growing All who care about them need to be fully informed about current outcomes indicators of success and failure and best practices This second edition of Child Welfare Connecting Research Policy and Practice has a special focus on Canadian child welfare and contains entirely new material on these important themes The book highlights major developments in child welfare and shows how these inform directions taken in research policy and practice The book includes new sections on Indigenous issues and best practices and several of its chapters review efforts to increase supports for families in need Contributions from new and international authors illustrate the endemic nature of child welfare challenges and how we can learn from these experiences Contributors provide recommendations for promoting best practice and enhancing resilience among children and families Closing chapters within each section and at the end of the book summarize key theoretical and practice issues along with recommendations to improve the research policy and practice continuum in child welfare The challenge is to translate good research into policy and practice in ways that enhance the life chances of children who need our care and protection Neglected Children Howard Dubowitz,1999-01-20 Although child neglect is the most common form of abuse the extant research literature has mostly ignored this form of child maltreatment Now editor Howard Dubowitz and an outstanding group of leaders in the field of child abuse and neglect offer perspectives on a range of important issues pertaining to the neglect of children Neglected Children is the first book to focus on this most common type of child maltreatment presenting a comprehensive and critical portrait of the phenomenon of neglect based on theory research and clinical practice experience This extensive work includes the following topics Causes and contributors Definitions and measurement research Cultural issues Short and long term outcomes Evaluation and risk assessment Prevention and intervention Prenatal substance abuse Fatal neglect Policy issues Neglected Children conveniently captures much of what is known about child neglect and offers recommendations for future research Researchers clinicians students and policy makers in the fields of social work child maltreatment interpersonal violence family studies psychology sociology and public health will find this broad view of the subject essential to addressing the complex and pervasive underpinnings of child neglect Dead End Kids Mark S. Fleisher,1998-10-15 Dead End Kids exposes both the depravity and the humanity in gang life through the eyes of a teenaged girl named Cara a member of a Kansas City gang In this shocking yet compassionate account Mark Fleisher shows how gang girls lives are shaped by poverty family disorganization and parental neglect

School Violence Mohammad Shafii, Sharon Lee Shafii, 2008-11-01 The statistics are appalling Between 8% and 10% of U S high school students carry guns to school every day In a typical mid size city 30 to 50 cases of school violence are reported daily and half of these cases involve guns School Violence Assessment Treatment Prevention shows us the reality behind the statistics Its distinguished contributors include leading clinicians researchers school counselors and legal authorities who closely examine every aspect of this complex epidemic challenging us to solve this multifaceted public health problem and offering concrete recommendations on how to do it The comprehensive volume is divided into four parts Part I Contributing Factors presents the multiple contributing factors including those involved in creating violent children and violence prone schools the nature and context of school violence and its biological and cultural causes For example although the number of violent deaths by shooting in schools remained stable through the 1990s the number of violent acts against female students increased significantly as did gang activity and the availability of guns in schools Part II Assessment and Management details diagnostic assessment management and treatment of children and adolescents who have the potential for or have threatened school violence Eyewitnesses describe the shootings and their aftermaths in Pearl Mississippi and Littleton Colorado including the extensive measures taken to decrease the traumatic effect of these incidents on the children and adolescents and their families the educators and the community at large Also presented is a model for time limited cognitive behavioral group therapy for those who sustain or witness violent injuries in schools a model that could be adapted to other settings Part III Legal Aspects begins by putting us on notice that anyone aware of a potentially violent act by a youth has a legal responsibility to alert the intended victim s and others who could warn or protect them offering a uniquely insightful view by the plaintiff attorney for the victims of school violence in Paducah Kentucky of the Tarasoff case and its ramifications Part IV Prevention concludes with what we can do now to help prevent school violence detailing effective prevention measures that range from the innovative a method that focuses on the school as a whole rather than on individuals and uses a social system and power dynamics perspective to the everyday teaching tolerance and conflict resolution Psychiatric practitioners clinical social workers pediatricians art and activity therapists school counselors and administrators and other educators and mental health care professionals and concerned adults who want to help prevent violence in our schools and minimize its traumatic effects on children parents and the community at large will appreciate this lucid in depth treatment of what has become one of today s most disturbing issues *Children's Human Rights and Public Schooling in the United States* Julia Hall, 2013-02-11 Promotion Text for Children s Human Rights and Public Schooling in the United States Julia Hall The United States tends to portray itself as a human rights leader However human rights concerns are confronted everyday by people in this democracy including children The purpose of this volume is to bring attention to the fact that against the backdrop of neoliberal expansion serious human rights violations are taking place among children everywhere including in the US The daily struggles among groups of school children in the US are specifically considered here such as children who are sorted by

race homeless children transient children child refugees children as targeted by human traffickers and or child migrant workers As the economy continues to constrict more and more young people find themselves struggling to grow up on these razor thin margins of survival Given current economic arrangements such margins are widening The definition of children s human rights as understood in this analysis is taken directly from the UN Convention on the Rights of the Child CRC Here emphasis is placed on ways in which the CRC could be used to serve more effectively the needs of the most vulnerable populations of school age children in the US and elsewhere Public schools could be the very place where children come to understand they have rights Unfortunately many children do not get this information Instead the protections stated in the CRC and the realities of the lives of so many children are often worlds apart This volume sets out to be a part of changing this

Minefields in Their Hearts , The Nation's Health Philip Randolph Lee,Carroll L. Estes,Fatima M. Rodriguez,2003 Health Systems Delivery *Work Values of Indian School Children* Arun Kumar Tiwari,2014-01-01 The book analyses the findings of the study to develop points that have great policy implications It is argued that since our present elementary schooling is lacking in this objective therefore attempts are needed to make necessary transformation in it in order to equip it with the capability to inculcate adequate work values among the students Eventually the good work habits and work values among the children would be helpful in combating another problem also that is the problem of obesity which is alarmingly increasing in our children

Parenthood in America Jack C. Westman,2001 In this outgrowth of a conference called Parenthood in America held at in April 1998 Westman emeritus psychiatry U of Wisconsin Medical School identifies the parent child relationship as the fundamental institution in our society one that fosters a lifelong ability to form and sustain intimate relationships and be a thoughtful moral person He argues for a shift in thinking toward the use of quality of life rather than material achievement as the central measure of success The work s 23 articles bring insights from research to bear on the practical aspects of childrearing and on policies that influence the context in which parenting occurs in the home and in the community Annotation copyrighted by Book News Inc Portland OR

Bowers Andrews,Robert M. George,Bong Joo Lee,L. J. Aber,2013-03-09 Today any regular newspaper reader is likely to be exposed to reports on manifold forms of physical emotional sexual child abuse on the one hand and abnormal behavior misconduct or offences of children and minors on the other hand Occasionally reports on children as victims and children as offenders may appear on the same issue or even the same page Rather seldom the more complex and largely hidden phenomena of structural hostility or indifference of society with a view to children are being dealt with in the press Such fragmentary ambiguous incoherent or even contradictory perception of children in modern society indicates that firstly there is a lack of reliable information on modern childhood and secondly children are still treated as a comparatively irrelevant population group in society This conclusion may be surprising in particular when drawn at the end of The Century of the Child proclaimed by Ellen Key as early as 1902 Actually there exist unclarties and ambiguities about the evolution of childhood in the last century not only in public opinion but also in scientific literature While De Mause with his psycho historic model of the evolution of childhood comprising different stages from infanticide abandonment ambivalence intrusion socialisation to support underlines the continuous improvement of the condition of childhood throughout history and thus rather confirms Key s expectations Aries with his social history of childhood seems to hold a more culturally pessimistic view

Social Welfare Policy John G. McNutt,Richard Hoefer,2020-11-13 We live in a changing world Globalization the rise of the Information Economy and the Global Environmental crisis are profound forces that affect all areas of human existence and are particularly important in the lives of the poor the powerless and the dispossessed This book prepares social workers to practice within the policy framework that is framed by these huge macro forces Many previous books address policy issues from the lenses of earlier times Forces like industrialization and early ideologies are far less relevant than the once were The change nature of the economy and the workforce are key drivers of change in the social welfare policy system This book provides a new perspective that is relevant to current issues This new edition features the latest in social welfare policy scholarship Completely updated it stands at the cutting edge of this vital and important field **The Battered Child** Mary Edna Helfer,Ruth S. Kempe,Richard D. Krugman,1997 Previous editions of this book have been greeted with great acclaim This edition reflects the past decade s advances in research and techniques and includes contributions from experts on every aspect of child abuse
