# Rapid Biological Abatement Of The Northern Cordillera Vilcabamba Peru

**Leeanne Elizabeth Alonso**

## **Rapid Biological Assessment Of The Northern Cordillera Vilcabamba Peru:**

**Biological and Social Assessments of the Cordillera de Vilcabamba, Peru** LeeAnne Elizabeth Alonso, 2001 Under imminent threat from habitat destruction the northern Cordillera Vilcabamba in the Andes is one of Peru's biologically richest areas This report presents the results of two recent ecological surveys of this little known region Investigating both high and low elevation sites the surveys discovered several species new to science For instance nearly a third of all the butterfly and moth species studied were previously unknown and a large arboreal rodent species collected may even represent a new genus This report also provides critical recommendations for effective conservation in the Vilcabamba as well as a detailed anthropological assessment of resource use by local communities

**A Rapid Biological Assessment of North Lorma, Gola and Grebo National Forests, Liberia** Peter Hoke, 2007 Liberia's national forests are among the last refuges in West Africa for large migrating mammals This volume summarizes the findings of a biodiversity survey of three forests as part of the Liberia Forestry Initiative an effort to rehabilitate and reform Liberia's threatened woodlands The survey found each forest to harbor a wealth of biodiversity and a significant number of species of conservation concern Researchers here document the discovery of six species new to science report eighteen new findings for Liberia and present conservation recommendations based on survey results

***Antpittas and Gnateaters*** Harold Greeney, 2018-07-12 This authoritative handbook part of the Helm Identification Guide series looks in detail at the beautiful antpittas Elusive study organisms for ornithologists and highly prized additions to the birder's life list the antpittas Grallariidae and gnateaters Conopophagidae are among the most poorly known Neotropical bird groups This authoritative handbook is the first book dedicated solely to these two families combining an exhaustive review of more than two centuries of literature with original observations by the author and many knowledgeable contributors Antpittas and Gnateaters provides a thorough guide to the identification and ecology of these birds with detailed maps accompanying the text A series of superb plates illustrate most of the 156 recognized taxa supplemented by more than 250 colour photographs the immature plumages and natural history of many species are depicted for the first time This book is the ultimate reference on these remarkable and beautiful birds and an indispensable addition to the libraries of researchers and birders for many years to come

***Neotropical Primates***, 1997

**An Opportunity for a Different Peru** Marcelo Giugale, Vicente Fretes Cibils, 2007 For the first time in the republican history of Peru the presidential transition takes place in democracy social peace fast economic growth and favorable world markets In other words there has never been a better chance to build a different Peru a richer country more equal and governable There are multiple ways to achieve that goal New reforms must stem from a widespread and participatory debate one of a common vision conceived for and by Peruvians This book aims at making a technical and independent contribution to such debate it summarizes the knowledge available about the challenges to be faced by the new administration The study does not recommend silver bullets but suggests policy options It is based on the analysis of the current reality and in six

decades of relationships with Peru in which the Bank has implemented more than 100 projects and prepared more than 500 technical reports covering the wide range of development topics. When necessary, the study provides lessons that the Bank has learned elsewhere. The study provides a conceptual framework to the analysis of the country's 34 economic sectors and the two historical perspectives behind them. In doing so, it offers a comprehensive reform agenda that sheds light on possible priorities and courses of action.

**The American Naturalist**, 1999      **Pharmacognosy and the Senses in Two Amazonian Societies** Glenn Harvey Shepard, 1999      Monitoring Biodiversity Alfonso Alonso, Francisco Dallmeier, Grace P. Servat, 2014-01-01. The book compiles case studies regarding the biodiversity research and monitoring program of Andean species and habitats carefully chosen as indicators to assess the short and long term effects of a linear disturbance: the PERU LNG pipeline. Set in a scientifically unexplored region of the Andes, Monitoring Biodiversity clearly articulates the Smithsonian-led conceptual framework for the implementation in the field by scientists. It addresses scientific and conservation questions addressed by the research protocols, the experimental design, and data gathering. Moreover, the book covers a gap on how to integrate biodiversity research, monitoring, and conservation into sustainable development projects of national and international interest. The text is presented in both English and Spanish.
