Rare and Endangered Biota of Florida: Mammals Ray E. Ashton, 1992 This is part of a two volume reference work on rare and endangered biota of Florida Each volume is arranged in order of species status extinct extirpated endangered threatened rare and special concern The account of each species contains data categories of taxonomy description population size and trend history and range of distribution geographic status habitat requirements and vulnerability of species and habitat The review of the environmental situation of the species includes causes of threat responses to habitat modification demographic characteristics key behaviours and conservation measures that have been taken and those proposed for the future Tables list species currently on the FCREPA list with their status Also included are the current designations of status by the US Fish and Wildlife Service and the Florida Game and Fresh Water Fish Commission Of the 43 mammals listed in this volume four subspecies have been recognized as extinct since the publication of the original edition In the case of the endangered Florida panther despite many conservation measures experts predict it will be extinct in 30 35 years without the radical intervention of captive rearing and re establishment of new populations Volume II focuses on fishes Florida Keys National Marine Sanctuary Comprehensive Management Plan, Monroe County , 1996 *Florida Keys National Marine Sanctuary: Development of the management plan : environmental impact statement* , 1995

North American Rodents David J. Hafner, 1998 The first comprehensive treatment of North American rodents of conservation concern This action plan summarizes the rodent fauna of North America and provides available information on every rodent taxon that has been considered to be of conservation concern by state provincial and private conservation agencies and regional experts It is hoped that the survey provided in this action plan will serve as a common ground for all these parties in drawing up conservation strategies for rodents *Wildlife Review* , 1992 *National Forests in Florida (N.F), USDA Forest Service and State of Florida Land Exchange* , 2004

Mammals of the Eastern United States John O. Whitaker, William J. Hamilton, 2019-05-15 The authors have done a superb job of distilling a vast amount of information on the biology of the terrestrial mammals of the eastern United States in a style that will not only satisfy the expert s need for accurate data but will also appeal to students and others interested in natural history James N Layne Archbold Biological Station In their definitive work on eastern mammals John O Whitaker Jr and W J Hamilton Jr vividly convey their sheer delight at the variety and abundance of mammalian life They have brought together a wealth of biological information and applied a biological subspecies concept to the mammals of the eastern United States Their research extends from the high reaches of Mount Katahdin in northern Maine where water shrews and moose hold company to the unglaciated hills of southern Indiana where pygmy shrews each weighing less than a dime lived undetected until 1981 From there they reach to the cypress swamps of lower Florida where the spoor of the mountain lion may be seen Describes the animals their behavior and dispersion in all 27 states east of the Mississippi River Almost entirely rewritten this edition provides an abundance of scientific information in

combination with anecdotes field notes and an underlying reverence for the fragile diversity of animal life Illustrations include 110 range maps 167 black and white photographs and 92 color images Covers 121 species 17 more than in the previous edition Uses a biological subspecies concept showing the results of evolution through differentiation Provides keys to orders and genera anatomical line drawings Summarizes information on endangered and threatened species for each of the eastern states Lists state mammal books in the literature section
