their courses A History of Modern Librarianship Pamela Spence Richards, Wayne A. Wiegand, Marija Dalbello, 2015-05-26
A broad comparative history of librarianship this intriguing work goes beyond the standard focus on institutions and collections to help you explore the part modern librarianship played and continues to play in forming Western cultures Previous histories of libraries in the Western world the last of which was published nearly 20 years ago concentrate on libraries and librarians This book takes a different approach It focuses on the practice of librarianship showing you how that practice has contributed to constructing the heritage of cultures To do so this groundbreaking collection of essays presents the history of modern librarianship in the context of recent developments of the library institution professionalization of librarianship and innovation through information technology Organized by region the book addresses the widely recognized international impact of Anglo American librarianship and its continuing influence over the past century combining critical analysis with chronological histories of modern librarianship in Europe North America Australia New Zealand and Africa An introductory chapter explains the origins of the project and a concluding chapter examines the effects of digitization on modern librarianship in the 21st century Current Studies in Librarianship ,1992 *Guide to Publishing Opportunities for Librarians* Carol F Schroeder, Gloria G Roberson, Peter Gellatly, 2012-10-12 This helpful guidebook makes it easy for librarians to select the most appropriate periodical or serial for their proposed articles A subject index with cross references ensures quick access to the alphabetically listed titles The Guide to Publishing Opportunities for Librarians provides the following comprehensive information for each publication listed bibliographic entry name and address of editor to whom manuscripts should be submitted names of indexing and abstracting services which include the publication editorial aim policy scope and content intended audience manuscript style requirements acceptance rate review procedures for submitted articles Both novice and experienced authors will be able to quickly select the most appropriate periodical or serial for proposed articles from a wide variety of publications In addition to the more familiar organs of national library associations societies and library schools the guide also includes regional publications newsletters bulletins scholarly journals interdisciplinary and general periodicals subject specific publications and electronic journals Public academic special and school librarians as well as other information specialists seeking to publish in the library science field will find the Guide to Publishing Opportunities for Librarians a valuable tool for promoting professional development *Access to Special Collections and Archives* Jae Jennifer Rossman, 2024-09-16 Since the early 20th century American academic libraries have collected and championed rare and unique non circulating materials now referred to as special collections Because of the rarity and value of these materials they are handled differently than materials in other parts of academic library collections Thus a different set of access policies and procedures as well as specialized staff have been employed This book provides a thorough exploration of access which is a cornerstone of the library profession It looks at how practitioners perceptions of access to special collections have changed from the formative period of the 1930s to today Using a grounded theory

approach on datasets comprised of LIS literature and interviews of special collections professionals with between 5 and 50 years of experience two conceptual models developed The two conceptual models are Aspects of Access which defines ten components that contribute to access goals Diversity Documentation Engagement Preservation Protection Provision Readers Spaces Stewardship and Technology A historical overview sets the stage for in depth discussion of each aspect Gatekeeping Model of Access which applies gatekeeping theory to chart how the Aspects of Access support or hinder the connection of readers to collection materials An exploration of access through the lens of special collections is especially meaningful because of the tension between the principles of preservation and access within the special collections community This project is also significant as the library profession explores how representation of diversity within collections and the profession impacts readers Exploring how we think about access should be part of these ongoing conversations

The Special Collections Handbook Alison Cullingford, 2016-12-22 This comprehensive and no nonsense guide to working with special collections and rare books is an essential day to day companion Working with special collections can vary dramatically from preserving a single rare book to managing and digitizing vast mixed media archives yet the role of the information professional is always critical in tapping into the potential of these collections protecting their legacy and bringing them to the attention of the wider public This book offers up to date guidance which pulls together insights from best practice across the heritage sector to build innovative co operative and questioning mind sets that will help them to cope in turbulent times The Handbook covers all aspects of special collections work preservation developing collections understanding objects emergency planning security legal and ethical concerns cataloguing digitization marketing outreach teaching impact advocacy and fundraising New to this edition coverage of new standards and concepts including unique and distinctive collections UDCs The Leeds Typology Archive Accreditation PD 5454 2012 and PAS 197 discussion of the major changes to laws affecting special collections including UK copyright law relating to library archive exception and orphan works and forthcoming changes to data protection in the EU exploration of new trends in research including the rise of digital humanities open access the impact agenda and the REF updates to the sections on marketing audience development and fundraising to include social media customer journey mapping and crowdsourcing and more consideration of impact and indicators digitization and new skills frameworks from CILIP and RBMS This is the essential practical guide for anyone working with special collections or rare books in libraries archives museums galleries and other heritage organizations It is also a useful introduction to special collections work for academics and students taking library and information courses

Art Museum Libraries and Librarianship Joan M. Benedetti, 2007 Although most art museums possess a library of some kind these facilities are often hidden from the public and seldom discussed in library schools despite the important role they play as substantial research venues Co published with the Art Libraries Society of North America Art Museum Libraries and Librarianship serves as an introduction to the field of art museum librarianship and its diverse settings Editor Joan

Benedetti has compiled contributions from practicing art museum librarians to present sixteen chapters that address the topics of leadership reader services automation security cataloging space planning collection development visual resources ephemera special collections archives fundraising public relations volunteers and interns professional development and solo librarianship Each chapter consists of several essays that deal with the distinct environment of art museum libraries from the largest research collections that serve many curatorial departments and multiple administrative layers to the smallest solo librarian venues whose unsung staff work in relative isolation The book concludes with a collection of brief institutional profiles which include statistical and descriptive information on fifteen diverse art museum libraries in the U S Canada and Europe appendixes that describe academic programs offering dual degrees in librarianship and art list international professional associations for art museum librarians and provide sample policies and procedures in use today in art museum libraries a bibliography and an index **Art Museum Libraries and Librarianship** the first publication of its kind is illustrated with over 90 black and white images of art museums their libraries and items from their collections

The Handbook of Art and Design Librarianship Paul Glassman, Judy Dyki, 2017-10-24 The Handbook of Art and Design Librarianship integrates theory and practice to offer guidelines for information professionals working in art and design environments who need to support and anticipate the information needs of artists designers architects and the historians who study those disciplines Since the first edition of this title the world of art and design libraries has been transformed by rapid advances in technology an explosion in social media and the release of new standards and guidelines This new edition offering mostly entirely new chapters provides an accessible fully updated guide to the world of academic art and design libraries from a range of international experts who reflect current practice at a global level Coverage includes case studies and library profiles providing benchmarks for developing facilities teaching and learning including the ACRL Framework teaching with special collections meta literacies instructional design and cultural differences developments in institutional repositories digital humanities and makerspaces contemporary library design spaces for collaboration and sustainability This book will be useful reading for students taking library and information science courses in art librarianship special collections and archives as well as practising library and information professionals in art and design school libraries art museum libraries and public libraries
