## **Rational Choice And Moral Agency:**

Rational Choice and Moral Agency David Schmidtz, 1995-01 Is it rational to be moral How do rationality and morality fit together with being human These questions are at the heart of David Schmidtz's exploration of the connections between rationality and morality This inquiry leads into both metaethics and rational choice theory as Schmidtz develops conceptions of what it is to be moral and what it is to be rational He defends a fairly expansive conception of rational choice considering how ends as well as means can be rationally chosen and explaining the role of self imposed constraints in a rational life plan His moral theory is dualistic ranging over social structure as well as personal conduct and building both individual and collective rationality into its rules of recognition for morals To the why be moral question Schmidtz responds that being moral is rational but he does not assume we have reasons to be rational Instead Schmidtz argues that being moral is rational in a particular way and that beings like us in situations like ours have reasons to be rational in just that way This approach allows him to identify decisive reasons to be moral at the same time it explains why immorality is as prevalent as it is This book thus offers a set of interesting and realistic conclusions about how morality fits into the lives of humanly rational agents operating in an institutional context like our own

**Rational Choice and Moral Agency** David Schmidtz, 2016-05-17 Why be moral Philosophers have wanted to answer this question for well over two thousand years ever since Plato wrote on the subject The question turned out to be as frustrating as it is compelling A proper philosophical answer begins by saying what morality is and what it means to be moral A wise philosophical answer also steps back to ask what sort of being wants an answer Why are we asking Who wants to know What do we want and in what way might being moral serve our purposes What difference does it make whether we have any reason to be moral Do we have reason to care whether other people have any reason to be moral Why In this book David Schmidtz presents elements of a theory of humanly rational choice why we have reason to be rational why being rational about the big picture seldom involves maximizing our payoff on a day to day basis how rational agents choose ends and why rational agents choose to respect and care about other people Schmidtz also presents elements of a theory of morality how being moral connects to what is good for oneself and to what is good for others how it connects to following rules and understanding what the people around us expect from us and how it connects to the heights of human aspiration and flourishing

**Freedom and Criminal Responsibility in American Legal Thought** Thomas Andrew Green, 2014-10-27 As the first full length study of twentieth century American legal academics wrestling with the problem of free will versus determinism in the context of criminal responsibility this book deals with one of the most fundamental problems in criminal law Thomas Andrew Green chronicles legal academic ideas from the Progressive Era critiques of free will based and generally retributive theories of criminal responsibility to the midcentury acceptance of the idea of free will as necessary to a criminal law conceived of in practical moral legal terms that need not accord with scientific fact to the late in century insistence on the compatibility of scientific determinism with moral and legal responsibility and

with a modern version of the retributivism that the Progressives had attacked. Foregrounding scholars language and ideas Green invites readers to participate in reconstructing an aspect of the past that is central to attempts to work out bases for moral judgment, legal blame and criminal punishment.

**Handbook of the Philosophical Foundations of Business Ethics** Christoph Luetge, 2012-10-09 The Handbook of Business Ethics Philosophical Foundations is a standard interdisciplinary reference handbook in the field of business ethics. Articles by notable philosophers and economists examine fundamental concepts, theories and questions of business ethics: Are morality and self interest compatible? What is meant by a just price? What did the Scholastic philosophers think about business? The handbook will cover the entire philosophical basis of business ethics. Articles range from historical positions such as Aristotelianism, Kantianism and Marxism to systematic issues like justice, religious issues, rights and globalisation or gender. The book is intended as a reference work for academics, students esp. graduate and professionals.

**Agency and Autonomy in Kant's Moral Theory** Andrews Reath, 2006 Kant's theory of moral sensibility, respect for the moral law and the influence of inclination, Hedonism, heteronomy and Kant's principle of happiness. The categorical imperative and Kant's conception of practical rationality. Legislating the moral law. Autonomy of the will as the foundation of morality. Legislating for a realm of ends, the social dimension of autonomy. Agency and universal law. Self legislation and duties to oneself. Agency and the imputation of consequences in Kant's ethics.

**Rational Choice Theory** Margaret S. Archer, Jonathan Q. Tritter, 2013-04-03 Rational Choice Theory is flourishing in sociology and is increasingly influential in other disciplines. Contributors to this volume are convinced that it provides an inadequate conceptualization of all aspects of decision making of the individuals who make the decisions of the process by which decisions get made and of the context within which decisions get made. The critique focuses on the four assumptions which are the bedrock of rational choice: rationality, the theory's definition of rationality is incomplete and cannot satisfactorily incorporate norms and emotions, individualism, rational choice is based upon atomistic individual decision makers and cannot account for decisions made by couples, groups or other forms of collective action. The process, the assumption of fixed, well ordered preferences and perfect information makes the theory inadequate for situations of change and uncertainty, aggregation. As methodological individualists, rational choice theorists can only view structure and culture as aggregates and cannot incorporate structural or cultural influences as emergent properties which have an effect upon decision making. The critique is grounded in discussion of a wide range of social issues including race, marriage, health and education.

**Well-Being** Neera K. Badhwar, 2014-06-02 This book offers a new argument for the ancient claim that well being as the highest prudential good, eudaimonia, consists of happiness in a virtuous life. The argument takes into account recent work on happiness, well being and virtue and defends a neo-Aristotelian conception of virtue as an integrated intellectual, emotional disposition that is limited in both scope and stability. This conception of virtue is argued to be widely held and compatible with social and cognitive psychology. The main argument of the book is as follows: the concept of well

being as the highest prudential good is internally coherent and widely held ii well being thus conceived requires an objectively worthwhile life iii in turn such a life requires autonomy and reality orientation i e a disposition to think for oneself seek truth or understanding about important aspects of one's own life and human life in general and act on this understanding when circumstances permit iv to the extent that someone is successful in achieving understanding and acting on it she is realistic and to the extent that she is realistic she is virtuous v hence well being as the highest prudential good requires virtue But complete virtue is impossible for both psychological and epistemic reasons and this is one reason why complete well being is impossible

Moral Agency within Social Structures and Culture Daniel K. Finn, 2020-05-01 Christian ethics has addressed moral agency and culture from the start and Christian social ethics increasingly acknowledges the power of social structures However neither has made sufficient use of the discipline that specializes in understanding structures and culture sociology In *Moral Agency within Social Structures and Culture* editor and contributor Daniel K Finn proposes a field changing critical realist sociology that puts Christian ethics into conversation with modern discourses on human agency and social transformation Catholic social teaching mischaracterizes social evil as being little more than the sum of individual choices remedied through individual conversion Liberation theology points to the power of social structures but without specifying how structures affect moral agency Critical realist sociology provides a solution to both shortcomings This collection shows how sociological insights can deepen and extend Catholic social thought by enabling ethicists to analyze more precisely how structures and culture impact human decisions The book demonstrates how this sociological framework has applications for the study of the ecological crisis economic life and virtue ethics *Moral Agency within Social Structures and Culture* is a valuable tool for Christian ethicists who seek systemic change in accord with the Gospel

**Aristotle's Ethics and Moral Responsibility** Javier Echeñique, 2012-05-31 Aristotle's *Ethics* develops a complex theory of the qualities which make for a good human being and for several decades there has been intense discussion about whether Aristotle's theory of voluntariness outlined in the *Ethics* actually delineates what modern thinkers would recognize as a theory of moral responsibility Javier Echeñique presents a novel account of Aristotle's discussion of voluntariness in the *Ethics* arguing against the interpretation by Arthur Adkins and that inspired by Peter Strawson that he developed an original and compelling theory of moral responsibility and that this theory has contributed in important ways to our understanding of coercion ignorance and violence His study will be valuable for a wide range of readers interested in Aristotle and in ancient ethics more broadly

The End of the Law? David W. Opderbeck, 2021-08-12 Does neuroscience show that all our ideas about law and ethics are false David Opderbeck answers this question with a broad and deep survey of the relationship between theology science and ethics He proposes that Christian theology which narrates the humanity and divinity of Christ in conversation with the new Aristotelianism in the philosophy of science provides a path through secular and religious fundamentalisms alike

**Moral Psychology Today** David K. Chan, 2008-02-03

Moral Psychology Today David K Chan Philosophers working in the eld of moral psychology concern themselves with issues and questions that straddle across more than one sub discipline in philosophy The answers that they propose and the theories that they propound have implications for moral philosophy the philosophy of mind epistemology and metaphysics Philosophers with an interest in the will or the motivational psychology of human action divide between those investigating psychological and behavioral concepts for their own sake and those working on action theory for the sake of answering larger questions especially ethical ones The essays in this volume all of which were presented at a conference on Values Rational Choice and the Will belong largely in the latter category of research The essays here contribute to debates

and discussions on a wide range of topics that are of current interest in moral psychology These essays demonstrate both the breadth of the field of moral psychology and the importance of the questions investigated Artificial boundaries between sub disciplines of philosophy are crossed in putting these essays together in the same anthology There are essays here in meta ethics and in normative ethics There are essays in ethical theory and in applied ethics There are essays that draw on discoveries in empirical psychology

Oxford Studies in Normative Ethics Volume 10 Mark Timmons, 2020-10-15 Oxford Studies in Normative Ethics is an annual forum for new work in normative ethical theory Leading philosophers present original contributions to our understanding of a wide range of moral issues and positions from analysis of competing approaches to normative ethics including moral realism constructivism and expressivism to questions of how we should act and live well OSNE will be an essential resource for scholars and students working in moral philosophy

*Free Will: Free agency, moral responsibility, and skepticism* John Martin Fischer, 2005

Justice Young Kim, 2018-03-24 The moral inquiry into the nature of justice is often marginalized as contemporary discussions focus primarily on political considerations Yet the need to examine the moral framework of justice is fundamental What is the point of justice after all if not to establish a moral framework for political interactions The question resonates especially when recognizing that no monocultures exist over time and space In examining Plato's thoughts on individual and social morality dikaiosune and Aristotle's focus on individual virtue arete and the pursuit of well being eudaimonia the author proffers foundational resources for today's discussions of justice Moreover he brings this nexus of thought into conversation with theories that have emerged over the centuries such as Kant's concept of due concern and respect individual rights and responsibilities as in Hobbes Locke and J S Mill Thus he engages contemporary disputes of justice including distributive vs relational schemes choice vs chance considerations group rights theories value pluralism the right vs the good as well as international and future justice His inquiry concludes with the provision of a deontological framework set against a liberal political context justice as right actions for further examination of questions of justice

**Handbook of Legal Reasoning and Argumentation** Giorgio Bongiovanni, Gerald Postema, Antonino Rotolo, Giovanni Sartor, Chiara Valentini, Douglas Walton, 2018-07-02 This handbook addresses legal reasoning and argumentation from a logical philosophical and legal perspective The main forms of legal reasoning and argumentation are covered in an exhaustive and critical fashion and are analysed in connection with more general types and problems of reasoning Accordingly the subject matter of the handbook divides in three parts The first one introduces and discusses the basic concepts of practical reasoning The second one discusses the general structures and procedures of reasoning and argumentation that are relevant to legal discourse The third one looks at their instantiations and developments of these aspects of argumentation as they are put to work in the law in different areas and applications of legal reasoning

*Taking Animals Seriously* David DeGrazia, 1996-07-13 This book distinguishes itself from much of the polemical literature on these issues by offering the most judicious and well balanced account yet available of animals moral standing

and related questions concerning their minds and welfare Transcending jejune debates focused on utilitarianism versus rights the book offers a fresh methodological approach with specific and constructive conclusions about our treatment of animals David DeGrazia provides the most thorough discussion yet of whether equal consideration should be extended to animals interests and examines the issues of animal minds and animal well being with an unparalleled combination of philosophical rigor and empirical documentation His book is an important contribution to the field of animal ethics and will be read with special interest by all philosophers teaching such courses as well as biologists those professionally involved with animals and general readers concerned about animal welfare *Person, Polis, Planet* David Schmidtz, 2008-09-11

**Decision Making** Laszlo Zsolnai, 2017-07-28 What should I do How should I deal with this How should I behave How should I act we ask ourselves daily But this is only the first part of the sentence while the full sentence is What should I do to achieve such and such for example to complete an assigned task to do well before my boss or a client to be pleased with myself to carry out my plans to make money in the stock market to pass an exam to complete an application etc These and similar questions that people ask consciously or not openly or not are decisions What skills must we master especially when there is a need to make not only elementary decisions but also decisions that affect the existence health and even lives of people First Laszlo Zsolnai writes that we should acquire the skill of gaining knowledge Only then will we stand a chance of reacting to things that are improbable today but could become a fact tomorrow Also essential is the skill of designing i e preparing actions conceptually in order to make decisions before irreversible changes occur Finally it is essential to master the skill of multidimensional judgment within the space defined by effectiveness efficiency and ethics This is Zsolnai s attempt to build a model of making ethical decisions both effectively and efficiently Therefore the model is much broader than purely an analytical framework would be It must tell us how to act rather than limit us to reflection on actions already performed it must combine decision and praxiological analysis of human conduct The proposed model enlarges the scope of the debate and suggests new avenues of both rational and responsible decision making This is an original statement of the crossover of policy and morality
