Rational Economic Man Matthew Erramouspe, 1991 **The Real Character of "rational Economic Man"** Mary S.

Morgan, 1996 *Economics as Moral Science* Bernard Hodgson, 2013-04-17 Economics as Moral Science investigates the

problem of the ethical neutrality of mainstream economic theory within the context of the methodology of economics as a science Against the conventional wisdom the author argues that there are serious moral presuppositions to the theory but that economics could still count as a scientific or rational form of inquiry The basic questions addressed the ethical implications of economics its status as a scientific mode of theory construction and the relation between these factors are absolutely fundamental ones for an understanding of contemporary economics the philosophy of the human sciences and our current market culture Moreover the study provides a thorough philosophical analysis of the critical issues at stake from the inside from the credible perspective of a particular but foundational economic theory the neoclassical theory of rational choice **South African Human Resource Management** Ben Swanepoel, 2003 South African Human Resource

Management focuses on the knowledge and skills that managers at all levels need The authors integrate contemporary international research and implementation with a South African perspective *Robinson Crusoe's Economic Man* Ulla

Grapard, Gillian Hewitson, 2012-04-27 In this book economists and literary scholars examine the uses to which the Robinson Crusoe figure has been put by the economics discipline since the publication of Defoe's novel in 1719 The authors critical readings of two centuries of texts that have made use of Robinson Crusoe undermine the pervasive belief of mainstream economics that Robinson Crusoe is a benign representative of economic agency and that he like other economic agents can be understood independently of historical and cultural specificity The book provides a detailed account of the appearance of Robinson Crusoe in the economics literature and in a plethora of modern economics texts in which for example we find Crusoe is portrayed as a schizophrenic consumer producer trying to maximize his personal well being Using poststructuralist feminist postcolonial Marxist and literary criticism approaches the authors of the fourteen chapters in this volume examine and critique some of the deepest fundamental assumptions neoclassical economics hold about human nature the political economy of colonization international trade and the pervasive gendered organization of social relations The contributors to this volume can be seen as engaging in the emerging conversation between economists and literary scholars known as the New Economic Criticism They offer unique perspectives on how the economy and economic thought can be read through

different disciplinary lenses Economists pay attention to rhetoric and metaphor deployed in economics and literary scholars have found new areas to explore and understand by focusing on economic concepts and vocabulary encountered in literary texts

Gender in International Relations J. Ann Tickner,1992 Political Science Quarterly The Values of Economics Irene van Staveren,2013-03-07 In his Ethics Aristotle argued that human beings try to further a variety of values by balancing them stating that people try to find a middle road between excess and deficiency The author develops and applies this idea to the values of economics arguing that in the economy freedom justice and care are also balanced to further ends with scarce means Freedom is furthered through market exchange justice through a redistributive role of the state and care through mutual gifts of labour and sharing of resources in the economy The book argues that economics is and has always been about human values which guide enable constrain and change economic behaviour

The World in the Model Mary S. Morgan,2012-09-17 During the last two centuries the way economic science is done has changed radically it has become a social science based on mathematical models in place of words This book describes and analyses that change both historically and philosophically using a series of case studies to illuminate the nature and the implications of these changes It is not a technical book it is written for the intelligent person who wants to understand how economics works from the inside out This book will be of interest to economists and science studies scholars historians sociologists and philosophers of science But it also aims at a wider readership in the public intellectual sphere building on the current interest in all things economic and on the recent failure of the so called economic model which has shaped our beliefs and the world we live in
