Rise Of The Meritocracy:

The Rise of the Meritocracy Michael Young, 2011-12-31 Michael Young has christened the oligarchy of the future Meritocracy. Indeed, the word is now part of the English language. It would appear that the formula IQ Effort Merit may well constitute the basic belief of the ruling class in the twenty-first century. Projecting himself into the year 2034, the author of this sociological satire shows how present decisions and practices may remold our society. It is widespread knowledge that it is insufficient to be somebody's nephew to obtain a responsible post in business, government, teaching, or science. Experts in education and selection apply scientific principles to sift out the leaders of tomorrow. You need intelligence, rating, qualification, experience, application, and a certain caliber to achieve status. In a word, one must show merit to advance in the new society of tomorrow. In a new opening essay, Young reflects on the reception of his work and its production in a candid and lively way. Many of the critical ambiguities surrounding its original publication are now clarified and resolved. What we have is what the Guardian of London called A brilliant essay and what Time and Tide described as a fountain gush of new ideas. Its wit and style make it compulsively enjoyable reading from cover to cover. [The Rise of the Meritocracy](#).

The Rise and Rise of Meritocracy Geoff Dench,2006 The term meritocracy entered the English language with the publication of Michael Young s The Rise of the Meritocracy This work examines what meritocracy means how it has evolved It demonstrates that Young was right to question the viability of political systems trying to organise themselves directly around the idea **The Rise of the Mediocracy** David Tribe,2024-10-30 First published in 1975 The Rise of the

Mediocracy is exhaustive disturbing devastating yet often very funny It explodes the myth of meritocracy and the pretence of improved living standards While the doom boomers blame all our ills on trigger happy politicians Arab oil sheikhs or polluting multinational corporations the intractable problems of the world have come about through a multiplication of individual attitudes and actions whose end result is industrial anarchy civil disorders population explosion and declining standards Many of the good things of life democracy education sociology communications growth the welfare state have contributed to the overall neurosis trivialization and greed As these good things will not likely be abandoned the problems of contemporary society may well be insoluble But if there are solutions they are unlikely to be implemented because everywhere there is an elitism not of meritocracy but of mediocracy whose rise can be traced from the 18th century and has accelerated in recent years No other book relates the discrediting of religion and politics business and professions so plausibly to chaos in the arts diminishing returns in education and curbless crime in society This interdisciplinary book is an interesting read for students of humanities and social sciences

The Rise and Fall of Neoliberal Rentier Capitalism Luiz Carlos

Bresser-Pereira,2025-02-10 The Rise and Fall of Neoliberal Rentier Capitalism is an account of the political economy of capitalism in the 20th and 21st centuries Capitalism is an unjust form of economic organisation it is a culture of exacerbated individualism justified by the glorification of individual competition Today after 40 years of neoliberalism capitalism faces again a legitimization crisis The book discusses capitalism after two revolutions the Organisational Revolution and the Democratic Revolution It views capitalism since the New Deal in the US and the post war as a progressive and developmental era and the Neoliberal Turn as the change from social democracy to radical and regressive global neoliberalism which was a regressive time for almost forty years In the Neoliberal Years rentiers replaced entrepreneurs in the command of the economy and called on the financiers to manage their wealth and serve as organic intellectuals and both mounted an attack to the state which is the main capitalist institution The global crisis and in 2020 the Covid pandemic showed that the state remains the nations resource of last instance The transition of China from statism to an active developmentalism resulted in an extraordinary growth Given such realities in 2021 we saw the collapse of neoliberalism and in the United States a Developmental Turn the state is back in the economy The transition phase we live in is characterised by three main forces economic liberalism managerialism and democracy Economic liberalism is the great defeated managerialism became powerful and is developmental and democracy is the stronger force It was attacked by neoliberalism and is now being attacked by right wing populism but resisted and resists brilliantly proving that it was a conquest of the popular classes that became a universal value counting on the support of all social classes

The Chosen Jerome Karabel,2005 Drawing on decades of research Karabel shines a light on the ever changing definition of merit in college admissions showing how it shaped and was shaped by the country at large

Benign Violence: Education in and beyond the Age of Reason Ansgar Allen,2014-07-22 Education is a violent act yet this violence is concealed by its good intent Education presents itself as a

distinctly improving enabling practice Even its most radical critics assume that education is at core an incontestable social good Setting education in its political context this book now in paperback offers a history of good intentions ranging from the birth of modern schooling and modern examination to the rise and fall of meritocracy In challenging all that is well intentioned in education it reveals how our educational commitments are always underwritten by violence Our highest ideals have the lowest origins Seeking to unsettle a settled conscience Benign Violence Education in and beyond the Age of Reason is designed to disturb the reader Education constitutes us as subjects we owe our existence to its violent inscriptions Those who refuse or rebel against our educational present must begin by objecting to the subjects we have become

Handbook of Equality of Opportunity, 2024-07-12 This Handbook provides an authoritative exposition of equality of opportunity It presents the different concepts most commonly associated with equality of opportunity and discusses the many problems dominating the controversies on equality of opportunity at the theoretical policy or practical level The chapters give a concise exposition of the different conceptions and basic concepts of equal opportunities They clarify variables that are part of the algorithm of equal opportunities e g opportunity equality non discrimination fairness responsibility chance and choice excellence qualifications effort talent merit desert inequality and risk The idea of equality of opportunity has traditionally been associated with a set of largely unquestioned ideals and over the last 50 years it has been at the very centre of the major progressive social changes and firmly entrenched in political rhetoric Yet the idea of equality of opportunity is far from unquestionable or unproblematic as the only solid assumption different conceptions have in common is their rejection of fixed social relations but not hierarchy itself Disagreements over the fundamental principles criticism over the inefficiency of policies aiming to ensure equal opportunities and objections to their unfairness all pose questions that current conceptions answer in different ways This Handbook examines a wide variety of questions about issues of motivation procedures genealogy taxonomy and compensation

[The Rise of the Meritocracy, 1870-2033](#), 1958 *Michael Young, Social Science, and the British Left, 1945-1970* Lise Butler, 2020-09-02 In post war Britain left wing policy maker and sociologist Michael Young played a major role in shaping British intellectual political and cultural life using his study of the social sciences to inform his political thought In the mid twentieth century the social sciences significantly expanded and played a major role in shaping British intellectual political and cultural life Central to this intellectual shift was the left wing policy maker and sociologist Michael Young As a Labour Party policy maker in the 1940s Young was a key architect of the Party s 1945 election manifesto Let Us Face the Future He became a sociologist in the 1950s publishing a classic study of the East London working class Family and Kinship in East London with Peter Willmott in 1957 which he followed up with a dystopian satire The Rise of the Meritocracy about a future society in which social status was determined entirely by intelligence Young was also a prolific social innovator founding or inspiring dozens of organisations including the Institute of Community Studies the Consumers Association Which magazine the Social Science Research Council and the Open University Moving between

politics social science and activism Young believed that disciplines like sociology psychology and anthropology could help policy makers and politicians understand human nature which in turn could help them to build better political and social institutions This book examines the relationship between social science and public policy in left wing politics between the end of the Second World War and the end of the first Wilson government through the figure of Michael Young Drawing on Young's prolific writings and his intellectual and political networks it argues that he and other social scientists and policy makers drew on contemporary ideas from the social sciences to challenge key Labour values like full employment and nationalisation and to argue that the Labour Party should put more emphasis on relationships family and community Showing that the social sciences were embedded in the project of social democratic governance in post war Britain it argues that historians and scholars should take their role in British politics and political thought seriously

The Rise of Inequality and the Fall of Social Mobility Francesco Farina, 2025-08-13 This book examines the disappearance of upward mobility and the rise of inequality within Western societies It explores intergenerational social mobility and charts its evolution over recent decades Particular attention is given to the economic changes that have impacted social mobility trends since the introduction of neoliberal doctrine by the Reagan and Thatcher governments The promises of meritocracy and increased opportunity through education are shown to be false during a time when trickle down economics namely deregulation and austerity in public policies is driving a rise in inequality with the benefits of economic growth being collected by the wealthy elite By highlighting the negative impacts of these economic trends including the increase in poorly paid and insecure jobs a new set of public policies are presented that better utilise the skills present within the labour market to create economic equity This book challenges the neoliberal consensus and sets out economic reforms for a fair society It will be relevant to students and researchers interested in the political economy economic systems and labor economics The English translation of this book originally in Italian was done with the help of artificial intelligence The content was later revised by the author for accuracy
